

Growing Cube From weaning to 3 years

High-quality proteins

Growing Cube is a pellet specially developed for young horses aged one to three years. This pellet ensures optimal skeletal hardening and supports the tendons and joints, which are the basis for legwork later in life. The addition of OS Complex reduces the risk of OCD and OC. This mineral complex contains copper, zinc and manganese combined in the balanced ratios required for the optimal development of joints, cartilage, tendons and the skeletal system.

- From weaning to 3 years
- High-quality proteins
- For an optimal start

NUTRITIONAL ADVICE:

Per 100 kg body weight: **0.5 kg > 1 kg**

Depending on the breed, intensity of exercise and quality of roughage.

Unlimited roughage supplementation.

COMPOSITION:

Barley, Wheat middlings, Oat hulls, Rapeseed meal, Maize gluten feed, Wheat, Sugar cane molasses, Wheat gluten feed, Maize, Soybean meal, Linseed, Linseed flakes, Calcium carbonate, Oats, Sodium chloride, Magnesium oxide, Monocalcium phosphate

Crude protein	16%
Crude fat	3.8%
Crude fibre	8%
Crude ash	9%
Starch	25%
Sugars	6.5%
Calcium	1.4%
Phosphorous	0.6%
Magnesium	0.6%
Sodium	0.45%
Calculated values (/kg):	
Horse Forage Units (UFC)	0.83
Digestible nitrogenous matter / degradable crude protein (Ma	dc/MPBd-c) 12%
Total energy value (VRE)	12%
Digestible energy-horses (DE-p)	9.8
Energy value horses (EW pa)	0.83
