

Headspace Care

Training Institute

Training coaches and clinicians
dedicated to the future of mental health

**APPROVED
TRAINING
PROGRAM**

Certificate in Mental Health Coaching

The Headspace–Mental Health Coaching Program provides a comprehensive curriculum with immersive training activities designed to prepare students to earn a Certificate in Mental Health Coaching (CBHC). This course will provide learning and application of evidence–based best practices in health and wellness coaching and in the field of mental health coaching.

Our program is rooted in the Headspace values of Diversity, Equity, Inclusion, and Belonging which is threaded throughout as students learn about the vast social inequities of health, Social Determinants of Health, cultural humility, and how to provide culturally responsive and identity–affirming care.

The Headspace–Mental Health Coach Training Program is an Approved Health and Wellness Coach Training & Education Program by the National Board for Health and Wellness Coaching (NBHWC). Graduates of this program are eligible to apply for the HWC Certifying Examination to become National Board Certified Health & Wellness Coach (NBC–HWC). Learn more about the NBHWC and becoming a NBC–HWC [here](#).

Our program is based on 3 modalities of learning:

1. **Dialogic:** Engaging, leading–edge, research–based curriculum delivered live, virtually, in small co–learning groups.
2. **Action:** Learning by doing, through discussion, and then practice coaching in regular, weekly Live Education and Training Sessions (LETS Connect). Student cohorts are facilitated by a course instructor in a safe, supportive environment.
3. **Reflection:** Ample time and opportunities for written, monthly self–reflection as part of in–group learning, peer–to–peer practice coaching sessions, and module content.

How the program is structured

Live Education and Training Sessions with Peer and Faculty Connection (LETS Connect)

Students will participate in 20 required, weekly live sessions via Zoom, held in small cohorts in a supportive co-learning environment. Each session is 3.25 hours.

Sessions will take place over six (6) months and are led by experienced NBC-HWC faculty course instructors. They consist of lesson presentations, large and small group discussions, and weekly application of the current module content in practice coaching sessions.

Weekly Practice Coaching

During the second half of each LETS Connect, students will participate in trios to each conduct a 20-minute practice coaching sessions utilizing skills learned in that week's LETS Connect session. Students will receive 10 minutes of peer feedback and participate in a group debrief. Each student will also serve in the role of client and observer for another student during the sessions.

Peer Coaching Sessions with Faculty Feedback - Practical Skills Development (PSD)

Students will participate in three, peer-coaching sessions with another student and an NBC-HWC faculty course instructor during the live training sessions. These sessions provide valuable coach practice, as well as the experience of being a client, along with both peer and faculty feedback. Students will receive faculty feedback following each session.

Further Learning and Discussion

Module Reflection

Students will reflect on the topics and skills learned in each module and write a reflection about one key learning and how they will use it in the coming month. Course instructors will review module reflections and provide students with written feedback.

Other Modalities of Learning

Students will watch recorded webinars, engage in required and recommended reading, written assignments, quizzes, journaling exercises, and will watch both live and recorded coaching sessions.

How the program is structured cont.

Module Reflection

Students will reflect on the topics and skills learned in each module and write a reflection about one key learning and how they will use it in the coming month. Course instructors will review module reflections and provide students with written feedback.

Other Modalities of Learning

Students will watch recorded webinars, engage in required and recommended reading, written assignments, quizzes, journaling exercises, and will watch both live and recorded coaching sessions.

Weekly Faculty Office Hours

Students can attend weekly office hours with faculty members to discuss curriculum or any aspect of the program, get support for staying on track, or to discuss career goals.

Extracurricular Practice Coaching Sessions

Students are encouraged to conduct regular practice coaching sessions with their peers outside of LETS Connect practice coaching sessions. Students who are interested in coaching students from another cohort than their own may sign up to participate.

Private Course Discussion Group

Students will participate in a private, faculty-moderated all-class discussion group where they can connect with other students for updates, resources, and discussion of curriculum content.

Estimated Time Commitment

Students can expect to spend 6-8 hours each week on coursework including:

- A weekly 3.25-hour live, virtual training and education session, which includes practice coaching sessions.
- Asynchronous coursework followed by short quizzes
- Self-paced weekly reading assignments with written reflections

Learning Objectives

By the end of this program you will be able to:

- Demonstrate understanding and application of coaching tools and skills which demonstrate dignity, respect, cultural humility, appreciation of each individual's diverse and intersecting identities and social determinants of health to provide culturally responsive and competent care.
- Build and maintain rapport with clients in a client-centered relationship rooted in unconditional positive regard that guides the client to their own self-discovery and solutions. The coach sets the expectation of themselves as not an expert who diagnoses or advises, but as a facilitative partner who supports the client in setting relevant, realistic goals.
- Understand and communicate your scope of practice as a health coach, distinguishing between your role and related professions with appropriate referrals; determine if a client is appropriate for coaching.
- Demonstrate NBC-HWC core coaching competencies in practice coaching sessions with peers and receive feedback from both peers and faculty.
- Explain the coaching process to a client, including the specific stages, exploration of values, vision, purpose and priorities, ongoing follow-up sessions, maintenance, and termination.
- Establish a coaching agreement with a client that sets clear expectations, confidentiality, and accountability measurements.
- Demonstrate the ability to establish and maintain a positive and psychologically safe environment through rapport building, active listening and presence, that facilitates client self-expression, discovery, and intrinsic motivation for behavior change.
- Demonstrate the ability to expand a client's perspective and discourse for deeper self-reflection by utilizing the tools of Motivational Interviewing and values, vision, and strengths-based exploration.
- Assist the client in choosing realistic and self-determined goals that focus on the process of sustainable behavior change achieved through small steps and growth from setbacks and small wins.

Learning Objectives cont.

- Demonstrate the ability to elicit the client's intrinsic motivation for change and develop self-efficacy based on their individual values, preferences, strengths, and optimal state of health and well-being, not external factors.
- Understand and apply principles of Positive Psychology that prioritize positive emotions, strengths, efforts, optimism, open-mindedness, and a growth mindset for the client.
- Help clients develop a rich support system, both personally and in their communities, to enable their ongoing success both during and after the coaching relationship.
- Understand the need for a whole-person perspective that recognizes multiple aspects of one's health, including the impact, risk factors, and measurement standards of various chronic disease states such as hypertension, diabetes, obesity, cardiovascular disease, high cholesterol, metabolic syndrome and the role of inflammation in disease.
- Understand the health behaviors, social and behavioral risk factors and social determinants of health for common topics of lifestyle medicine including healthy weight, nutrition and hydration, physical activity, sedentary lifestyle, sleep, stress, and emotional wellness, avoiding tobacco and substance use/abuse, positive mental health, self-awareness of thoughts, feelings, and behaviors whether positive or negative.
- Help clients explore and discover a sense of meaning or purpose and how it is linked to positive health outcomes and achievement of sustainable behavior change.
- Understand and adhere to the NBHWC Code of Ethics, legal standards, and high level of professional conduct required of healthcare providers, while maintaining ethical and professional treatment of each client; coach self-awareness around emotional regulation, lifestyle behaviors, and self-care.

Learning Objectives cont.

- Professional conduct and legal competencies to include: confidentiality, conflicts of interest, HIPAA, demonstrating unconditional positive regard, dignity and respect for all people, honoring diversity and cultural sensitivity, true representation of your training, experience credentials, maintaining scope of practice and referring to other professionals as appropriate, maintaining professional boundaries, informed consent, relevant federal and state regulations that affect health coaching, and seeking supervision and consultation as needed.
- Help clients to develop skills for managing stress, resilience, positive mental health, well-being, and flourishing, understanding the role of healthy relationships with self and others; adjusting to and managing change, mindfulness techniques including the power of meditation; utilizing principles of positive psychology and strengths-based approaches in coaching.
- Prioritize and practice personalized coach self-care through various tools, techniques and practices to support emotional well-being, physical, and mental health.

Program Modules

Module 1

Foundations of Health and Wellness Coaching

- Foundations of Health Coaching/Scope of Practice
- Foundations of Positive Psychology
- Foundations of Strengths-Based Coaching
- Creating a Client-Centered Relationship
- Building Trust & Rapport
- Health and Wellness: A Whole Person Perspective and Health Equity Barriers

Module 2

Foundations of Coaching Structure

- Health and Wellness: A Whole Person Perspective
- Preparation, First and Early Coaching Sessions
- Routine, Ongoing Coaching Sessions Through Termination
- Active Listening, Presence, and Sharing Information Appropriately
- Foundations of Motivational Interviewing
- Positive Psychological Resources to Support Behavior Change
- Reflective Listening to facilitate client self-discovery
- SMART and SMARTER Goals
- Working through Ambivalence, Resistance and Obstacles to Change

Module 3

Orientation and Foundations

- Foundations of Motivational Interviewing
- Exploring Values, Purpose, Meaning, and Intrinsic Motivation
- Applying the Transtheoretical Model of Change - Stages of Change
- Goals and Goal Setting Strategies
- Professional Conduct, Code of Ethics and Legal Compliance in Coaching

Program Modules cont.

Module 4

Expanding Perspective: Culturally Responsive and Identity Affirming Care

- Building a Foundation of Cultural Competency in the Coaching Relationship
- LGBTQ+ affirmative coaching and Intersecting Identities
- Continuous Self-examination of Bias, Conditioned Beliefs, Privilege
- Environmental and Structural Support Systems and Social Determinants of Health
- Enhancing Client Awareness and Broadening Perspectives
- Expanding and Focusing the Conversation - Evoking Change Talk

Module 5

Disease Prevention and Mental Health/Holistic Health Promotion

- Pre-diabetes, Diabetes, and Metabolic Syndrome
- Obesity and Physical/Sedentary Lifestyle
- Healthy Weight and Optimal Nutrition
- Sleep and Sleep Hygiene
- Hypertension, Lipids and Cardiovascular Disease
- Arthritis and inflammation
- Substance Use, Harm/Use Reduction
- Client Emotions and Energy
- Prioritizing Mental Health through Behavior Change
- Mindfulness, Meditation, Gratitude, and other Relaxation Techniques to Support Stress Management and Emotional Well-Being
- Coaching Clients with Mild Anxiety and Mood Disorders, Making Referrals
- Integrating spirituality into coaching
- Coaching Best Practices
- Cultivating Self-Efficacy and Self-Compassion
- Coach Self-Care Strategies and Tools

Accommodations

Headspace complies with the requirements and spirit of Section 504 of the Rehabilitation Act and the Americans with Disabilities Act Amendments of 2008. Students may self-identify and seek adjustments by notifying the Program Director. Headspace seeks to reasonably accommodate students with disabilities on an individual basis if supported by specific information and assessment data documented by appropriate licensed professionals.

Admissions

Who may apply

1. Current full-time Headspace employees with a minimum of six months employment with the company.
2. Individuals that are not employees of Headspace.
3. Have an associate's degree or higher or 4,000 hours work experience in any field (if you plan to sit for the NBHWC national board exam).

We encourage all who are interested to express their goals, experience, and education in their application.
