

# CDP 2025 Corporate Health Check

The annual state of Earth-positive business action in the UK

The CDP Corporate Health Check assesses business progress across five critical climate and nature areas: disclosure, target setting, governance, strategy and progress. The analysis **identifies four key levers pulled by companies driving change with their data**: executive incentives, carbon pricing, climate transition plans and supplier engagement.

## 50%

of British companies on track to meet their climate targets

## 86%

of on-track UK businesses link executive-level pay to their emissions reductions goals

### Key findings: UK

- 50% of UK companies assessed are on track to meet their climate targets - above the 35% global average.
- Of those UK businesses on track to meeting emissions reductions targets, 86% link executive-level pay to these goals.
- 6 in 10 UK companies (62%) have emissions targets in place across their value chain, compared with 33% globally.
- UK businesses with climate transition plans align almost 10% of their capital expenditures with their plan on average - in line with companies globally (9%).
- Although slightly above the global average of 10%, just 15% of UK companies are embedding Earth-positive decision-making into their business models.

### Sector market capitalization growth breakdown (global)

The Corporate Health Check assesses companies in aggregate and assigns one of four levels:

- **Level 1:** Falling Behind
- **Level 2:** Meeting the Minimum
- **Level 3:** Showing Ambition
- **Level 4:** Charting Change

Based on their progress upon five critical areas of climate and nature (disclosure, environmental targets, governance and incentives, strategy and plans, and progress), the data shows one in 10 companies globally reaching at least Level 3, while less than 1% of companies globally are at Level 4.

### Companies reaching Level 4 in the UK and globally

### About the CDP Corporate Health Check

The CDP Corporate Health Check assesses companies, representing 67% of global market value for their climate and nature transparency, targets, governance, strategy and progress to cut impacts. In partnership with Oliver Wyman, the indicators for the CDP Corporate Health Check were developed as part of the World Economic Forum’s State of Nature and Climate publication.
