CLIMATE ACTION

Supporting your
organization's *efforts* to
accelerate climate action

Our purpose

Contribute to the design and implementation of sustainable and resilient practices in climate change mitigation and adaptation.

We transform the challenges of climate change into an opportunity to create value

Our consulting *services* are tailored to suit the reality of each organization

Diagnosis

We quantify and verify key indicators to assess the mitigation and adaptation challenges that every organization faces, enabling their maximum contribution to climate action within their context.

Strategy

We analyze the potential impacts of climate risks, formulate mitigation and adaptation action plans, and assist in communicating organizations' progress and efforts.

Implementation

We accelerate the implementation of mitigation and adaptation projects through technology assessment, business model design, climate financing schemes, and public policy development.

Diagnosis

Reference services:

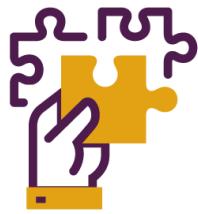

- Calculation and verification of carbon footprint.
- Calculation and verification of water footprint
- Life cycle analysis.
- Financed emissions.
- Development of MRV protocols.
- Climate risk assessment.

Strategy

Reference services:

- Analysis and modeling of climate risk impacts.
- Emission reduction objectives and trajectories consistent with Science-Based Targets (SBT).
- Climate change mitigation and adaptation strategies.
- Climate management disclosure in line with IFRS S1-S2, TCFD, DJSI, CDP, and others.
- Establishment of climate change capabilities and tools.

Implementation

Reference services:

- Technical-economic analysis for mitigation and adaptation projects.
- Development of business models and climate financing schemes.
- Implementation of public policy instruments, measures, and plans for mitigation and adaptation.
- Assistance in the assessment and access to carbon markets.
- Design and implementation of Monitoring, Reporting, and Verification (MRV) systems.

Private Sector

Our seal and *expertise*

01.

Driven by our passion for climate action, we work to infuse this commitment into the strategies co-designed with our clients.

02.

We aim to deliver the best possible outcome, enabling our clients to act in favor of the climate in a transparent and timely manner.

03.

We believe in the importance of traceability and transparency, integrating them into our models and tools.

04.

We build and adapt our teams and work dynamics to address our clients' specific challenges.

We are accredited by the Carbon Disclosure Project (CDP) and the HuellaChile program.
