## Introduction

The Supplier Engagement Assessment methodology provides a score which assesses supplier action as reported by a company's CDP response. The score assesses the level of detail and comprehensiveness of the content, as well as the company's awareness of climate change issues, management methods and progress towards action taken on climate change as reported in the response.

## Essential reading

This methodology should be used in conjunction with the '2026 Full corporate questionnaire guidance - Climate change', the 'Introduction to CDP scoring 2026' document, as well as the '2026 Supplier Engagement Assessment Introduction'. It is strongly recommended to familiarize yourself with the contents of these documents before using the scoring methodology. Please note that the '2026 Supplier Engagement Assessment introduction' document contains information essential for the understanding and correct use of this scoring methodology.

## Status of this methodology

This methodology is intended to provide guidance to companies on how their response will be scored.

*CDP reserves the right to remove, amend or alter scoring criteria as displayed in the scoring methodology at any time during the disclosure cycle, without notice or notification. Such changes will only be made in exceptional circumstances when necessary to ensure that the methodology remains fair, impartial and effective for the purpose of assessing progress towards environmental stewardship.*

It is important to note, within the CDP Full Corporate questionnaire - Climate change organizations are asked about their absolute emissions targets (7.53.1) and their intensity emissions targets (7.53.2).

There are two things to note about the scoring of these two questions:

- Where an organization has both absolute and intensity targets, either question 7.53.1 or 7.53.2 will contribute to an organization’s final score. All targets will be scored, and the score which has the most positive impact on the company’s score will be recorded (either the question relating to an absolute target or to an intensity target). This is applied using our ‘Best scored question’ approach, please see the CDP Supplier Engagement Assessment Scoring Introduction for more details.
- Targets which are set relative to a future "business as usual" (BAU) scenario are not eligible for points. To be eligible, targets must have a base year in or before the reporting year.

**Supplier Engagement Assessment criteria for all sectors excluding Financial services companies**

Both columns 'Scopes' AND 'End date of target' must be completed to be eligible for points.

i) Points will be awarded per Leadership points awarded for question 7.53.1 in for 2026 Full Corporate Scoring Methodology - Climate change - up to 3/3 points

ii) 'Category 1: Purchased goods and services' selected in column 'Scope 3 categories' - 2/2 points

OR

Any of the following options selected in column 'Scope 3 categories' - 1/2 point

- 'Category 2: Capital goods'
- 'Category 3: Fuel-and-energy-related activities (not included in Scopes 1 or 2)'
- 'Category 4: Upstream transportation and distribution'
- 'Category 5: Waste generated in operations'
- 'Category 6: Business travel'
- 'Category 7: Employee commuting'
- 'Category 8: Upstream leased assets'

A maximum of 5/5 points is available for this question.

(Please note: If an organization’s CDP Climate change 2026 overall score is a C or lower, 0/3 points will be awarded for criterion (i).)

**It is important to note, within the CDP Full Corporate questionnaire - Climate change organizations are asked about their absolute emissions targets (7.53.1) and their intensity emissions targets (7.53.2).**

**There are two things to note about the scoring of these two questions:**

- **Where an organization has both absolute and intensity targets, either question 7.53.1 or 7.53.2 will contribute to an organisation’s final score. All targets will be scored, and the score which has the most positive impact on the company’s score will be recorded (either the question relating to an absolute target or to an intensity target). This is applied using our ‘Best scored question’ approach, please see the CDP Supplier Engagement Assessment Scoring Introduction for more details.**
- **Targets which are set relative to a future "business as usual" (BAU) scenario are not eligible for points. To be eligible, targets must have a base year in or before the reporting year.**

**Supplier Engagement Assessment criteria for all sectors excluding Financial services companies**

Both columns 'Scopes' AND 'End date of target' must be completed to be eligible for points.

i) Points will be awarded per Leadership points awarded for question 7.53.2 in 2026 Full Corporate Scoring Methodology - Climate change - up to 3/3 points

ii) 'Category 1: Purchased goods and services' selected in column 'Scope 3 categories' - 2/2 points

OR

Any of the following options selected in column 'Scope 3 categories' - 1/2 point

- 'Category 2: Capital goods'
- 'Category 3: Fuel-and-energy-related activities (not included in Scopes 1 or 2)'
- 'Category 4: Upstream transportation and distribution'
- 'Category 5: Waste generated in operations'
- 'Category 6: Business travel'
- 'Category 7: Employee commuting'
- 'Category 8: Upstream leased assets'

(Please note: If an organization’s CDP Climate change 2026 overall score is a C or lower, 0/3 points will be awarded for criterion (i).)

A maximum of 5/5 points is available for this question.
