

# CDP 2025 Corporate Health Check

## The annual state of Earth-positive business action in Asia

The CDP Corporate Health Check assesses business progress across five critical climate and nature areas: disclosure, target setting, governance, strategy and progress. The analysis **identifies four key levers pulled by companies driving change with their data**: executive incentives, carbon pricing, climate transition plans and supplier engagement.

# 32%

of Asian companies on track to meet their climate targets

# 24%

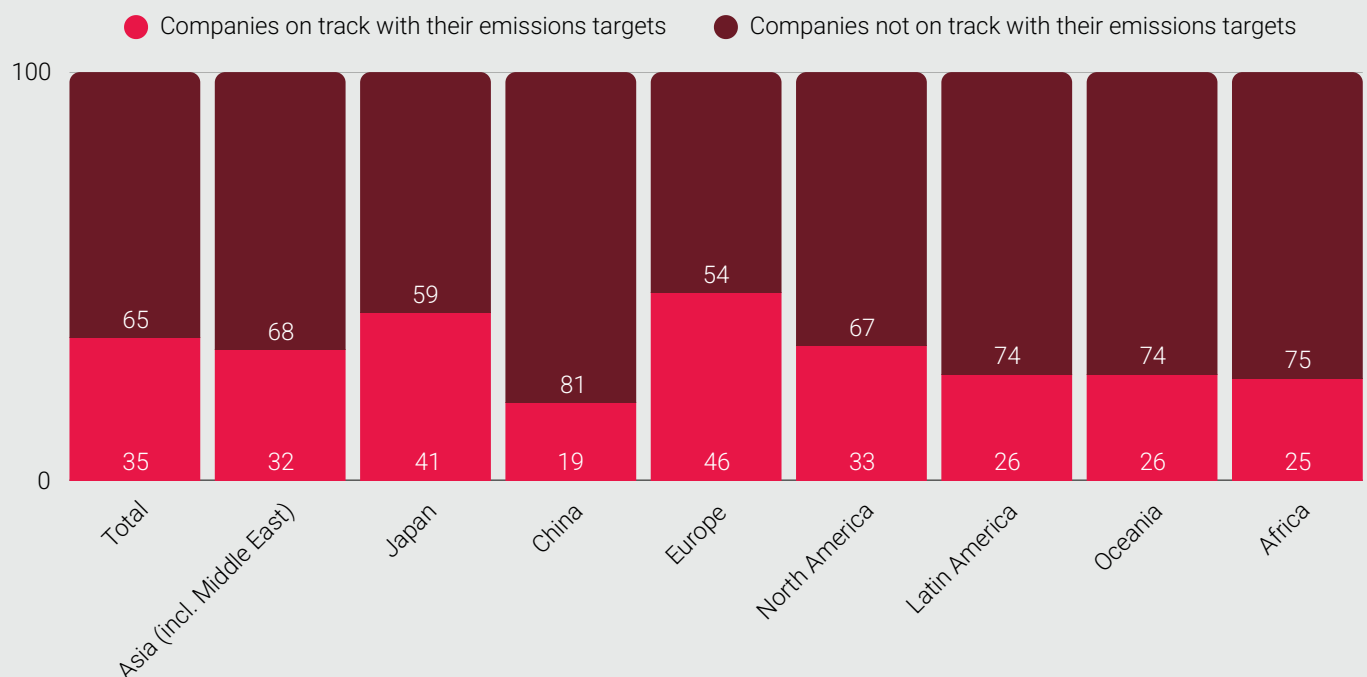

have targets covering their full value chain

### Key findings: Asia

- **32% of Asian companies assessed are on track to meet their climate targets, slightly below the global average of 35%. Japan leads at 41%, while China and Indonesia lag at 19%.**
- Of those Asian companies on track to meeting emissions reductions targets, 72% link executive-level pay to these goals, signaling strong accountability at leadership level.
- Only 24% of disclosing companies in Asia have climate targets covering their full value chain and just 11% have both climate and nature targets — revealing a major gap in comprehensive, ambitious target-setting
- **8% of Asian companies are making progress across all environmental indicators, slightly below the global average of 10%, highlighting the widespread challenge of fully integrating Earth-positive decision-making into business models.**

### Percentage of companies on track with their emissions targets

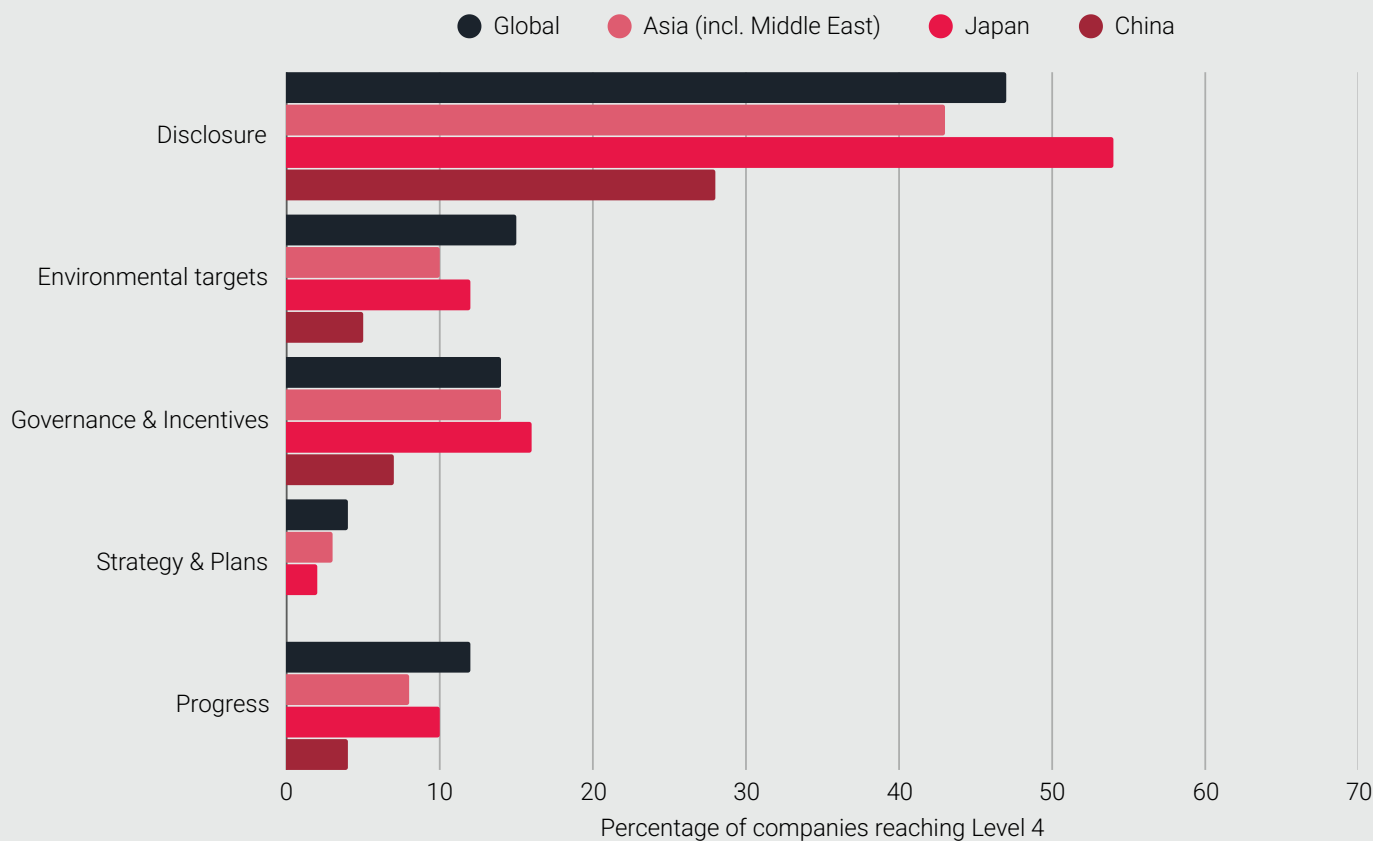

The Corporate Health Check assesses companies in aggregate and assigns one of four levels:

- **Level 1:** Falling Behind
- **Level 2:** Meeting the Minimum
- **Level 3:** Showing Ambition
- **Level 4:** Charting Change

Based on their progress upon five critical areas of climate and nature (disclosure, environmental targets, governance and incentives, strategy and plans, and progress), the data shows one in 10 companies globally reaching at least Level 3, while less than 1% of companies globally are at Level 4.

## Companies reaching Level 4

## About the CDP Corporate Health Check

The CDP Corporate Health Check assesses companies, representing 67% of global market value for their climate and nature transparency, targets, governance, strategy and progress to cut impacts. In partnership with Oliver Wyman, the indicators for the CDP Corporate Health Check were developed as part of the World Economic Forum’s State of Nature and Climate publication.
