## Introduction

CDP recognizes the importance of environmental transparency in incentivizing positive and effective actions to mitigate risks due to climate change, water security, and deforestation. To establish a consistent reporting baseline across CDP scores, essential criteria for climate change are applied across multiple scoring levels to ensure that critical gaps in disclosure are addressed. By combining the application of these essential criteria with a requirement for organizations to achieve a minimum score at each level, CDP recognizes organizations that provide key data points vital for understanding how they assess and respond to environmental challenges.

Prior to their expansion in the 2024 disclosure cycle, CDP applied essential criteria to the A List only. In 2024, CDP introduced extra layers of essential criteria for organizations responding to the full corporate questionnaire for climate change – criteria are applied across Awareness, Management, Leadership and A List levels, whereby all criteria must be met to progress a score to the next level. Essential criteria both set a consistent reporting baseline at each scoring level and ensure that high scoring organizations are comprehensively disclosing on the critical data points that sufficiently demonstrate commitment towards holistic transparency in their environmental disclosure.

In 2025, there are minimal changes to the CDP essential criteria for climate change. The updates primarily involve clarifying existing criteria and enhancing the 'Additional guidance' accompanying the criteria. For more information on changes made to the essential criteria in 2025, please refer to the 2025 full corporate scoring changes document.

Essential criteria are only applied to organizations responding to the full corporate questionnaire – the criteria do not apply to the SME corporate questionnaire.

## How to use this document

This document outlines the essential criteria for climate change for all levels up to and including the A list. The content is structured to follow the sequence of topics presented in the full corporate questionnaire. For each essential criteria topic, there is a table that outlines the following:

**Essential criteria level** – Essential criteria for climate change will be applied at Awareness, Management, Leadership and/or A list levels. Not all topics will have criteria applied to all levels. If a criterion is applied to Awareness level and the check is not met, this will limit an organization's final score to a D. Similarly, if the Awareness essential criteria are met and the Management level criteria are not met, the final score will be capped at a C.

**Question** – Each essential criterion will be linked to a single question or multiple questions from the full corporate questionnaire for climate change. Each question will be listed in this column in line with the corresponding criterion. Where two or more question numbers are referenced, this indicates that a combination of questions are assessed to meet the overall essential criteria at that level. Question numbers that are combined with an 'OR' indicate that the essential criterion can be met through data points in either question.

**Scored data points** – The essential criteria have been broken down into their individual components based on key data points that they assess. In this column, each criterion is outlined in detail. Organizations must meet all criteria within a level to meet the overall essential criteria, unless stated otherwise. An 'AND' indicates where multiple criteria must be met for clarity. Some criteria may specifically link to criteria that are present within the CDP full corporate scoring methodology 2025 - Climate change.

**Essential criteria identifier** – Each essential criteria in this document has an accompanying unique identifier. These are composed of 'EC' for 'essential criteria,' a dash followed by an 'CC' for climate change, and a specific number e.g. EC-CC1. Essential criteria may be referred to using their essential criteria identifiers in this document.

## Common terms used in this document

For consistency, we have used common wording to identify actions or references in this document. These are clarified below:

**Partial disclosure** – In some cases, we do not require the entirety of a row in a question to be completed for it to qualify for assessment for the essential criterion. Criterion like this can be identified through the phrases outlined below. Please note, this is in addition to any other required datapoints outlined in the criterion:

### Scenario 1

Request for an essential criterion that requires only the 'Environmental Issue...' column in a question to be complete. No additional disclosure is required.

#### Example wording

Only selection of 'Climate change' in column 'Environmental issue...' is assessed.

#### Example essential criteria

- EC-CC5 Leadership
- EC-CC12 A List

## Scenario 2

Request for an essential criterion that requires both the 'Environmental Issue...' column in a question to be complete AND evidence from additional column(s) as indicated in the criteria.

### Example wording

One row disclosed where 'Climate change' is selected in column 'Environmental issue' is assessed.

One 'Climate change' row is assessed.

### Example essential criteria

- EC-CC3 Awareness, Management and Leadership
- EC-CC4 Leadership and A List
- EC-CC11 A List

## Scenario 3

Request for an essential criterion that references questions without an 'Environmental issue...' column. Unless the above partial disclosure scenarios or the below complete disclosure scenarios are requested, please assume that partial disclosure requirements are based on the datapoints specified within the essential criterion itself.

### Example essential criteria

- EC-CC1 Awareness
- EC-CC6 A List
- EC-CC15 Leadership

**Complete disclosure** – Some questions within essential criteria require all relevant information to be disclosed in accordance with the full corporate scoring methodology. Unless stated otherwise, completion does not include 'Comment' columns. The following distinct phrases are used to identify these:

## Scenario 4

Request for complete disclosure within one row as per criteria outlined in the full corporate scoring methodology for climate change. Please note, eligibility criteria and question level scores in the full corporate scoring methodology are not assessed in this scenario.

### **Example wording for integrated questions**

---

One complete row disclosed where 'Climate change' is selected in column 'Environmental issues...' as per the Awareness level criteria in the CDP full corporate scoring methodology 2025 - Climate change is assessed.

### **Example essential criteria for integrated questions**

---

- EC-CC1 Management and Leadership

### **Example wording for questions without 'Environmental issue...' column**

---

One complete row disclosed as per the Awareness level criteria in the CDP full corporate scoring methodology 2025 - Climate change is assessed.

### **Example essential criteria for questions without 'Environmental issue...' column**

---

- EC-CC8 Leadership
- EC-CC18 A List

## **Scenario 5**

Request for complete disclosure as per fulfilling the criteria outlined in the full corporate scoring methodology for climate change. Please note, eligibility criteria and question level scores in the full corporate scoring methodology are assessed in this scenario.

### **Example wording**

---

Awareness level eligibility and criteria in the CDP full corporate scoring methodology 2025 - Climate change must be fulfilled.

### **Example essential criteria**

---

- EC-CC7 A List
- EC-CC17 Leadership and A List
