Introduction

The Supplier Engagement Assessment methodology provides a score which assesses supplier action as reported by a company's CDP response. The score assesses the level of detail and comprehensiveness of the content, as well as the company's awareness of climate change issues, management methods and progress towards action taken on climate change as reported in the response.

Essential reading

This methodology should be used in conjunction with the 2025 Full corporate questionnaire guidance - Climate change, and the "Introduction to CDP scoring 2025" document, as well as the "2025 Supplier Engagement Assessment Introduction". It is strongly recommended to familiarize yourself with the contents of both the 2025 guidance, the 2025 Scoring introduction document and the 2025 Supplier Engagement Assessment document before using the scoring methodology. Please note that the "2025 Supplier Engagement Assessment introduction" document contains information essential for the understanding and correct use of this scoring methodology.

Status of this methodology

This methodology is intended to provide guidance to companies on how their response will be scored.

"CDP reserves the right to remove, amend or alter scoring criteria as displayed in the scoring methodology at any time during the disclosure cycle, without notice or notification. Such changes will only be made in exceptional circumstances when necessary to ensure that the methodology remains fair, impartial and effective for the purpose of assessing progress towards environmental stewardship."

7.53.1 - Scoring criteria

Within the CDP Corporate Climate change questionnaire organizations are asked about their absolute emissions targets (7.53.1) and their intensity emissions targets (7.53.2). There are two things to note about the scoring of these two questions:

- **Where an organization has both absolute and intensity targets, all targets will be scored and the question for which the score which has the most positive impact on the company's Supplier Engagement Assessment score will be recorded (either the question relating to an Absolute target or the question relating to an Intensity target).**
- **Targets which are set relative to a future "business as usual" (BAU) scenario are not eligible for points. To be eligible, targets must have a base year in or before the reporting year.**
