

CDP Supply Chain Membership

“We have now invited over 700 suppliers to report through CDP – **nearly three times the number invited last year.** The support given by CDP to educate and on-board our suppliers to the Supply Chain program has been essential to achieve this rapid ramp up.”

Jenny Perrie, Scope 3 Lead Global Procurement,
AstraZeneca

What is CDP?

CDP is a global non-profit that has run the world's environmental disclosure system for investors, companies, cities, states and regions for 25 years. Disclosing through CDP creates the data needed to act.

With the largest, most comprehensive dataset on environmental action, the insights that CDP holds empowers investors, companies, cities, and national and regional governments to make the right choices today to build a thriving economy that works for people and planet in the long term.

Why is high-quality supply chain data important?

Gathering and analyzing supply chain data is becoming more important for companies looking to understand, and act on, their environmental impact and meet the growing pressure from investors, regulators, competitors and consumers.

What is the CDP Supply Chain program?

CDP enables you to directly engage suppliers on collecting vital environmental information, pinpoint risks, and identify opportunities, toward setting and achieving your sustainability goals.

Supply chain emissions are on average **26x times more** than operational emissions.

Operational emissions

Supply chain emissions

But companies are **2x as likely** to focus on operational emissions.

US\$162B

is tied to climate supply chain risks - but the cost of responding is only **\$59B.**

Despite these high emissions and associated risk, many companies **still overlook their supply chain.**
