Join the World's Largest Supply Chain Network

CDP Supply Chain Membership

What is CDP Supply Chain membership?

CDP's Supply Chain Membership connects you to the world's largest supplier network and environmental disclosure platform, giving your company unparalleled access to supplier-level data.

Trusted by hundreds of leading corporate buyers worldwide, CDP empowers you to manage risk, cut emissions, and build long-term resilience. With insights across climate, forests, water, biodiversity, and plastics, members gain the visibility needed to make smarter procurement decisions and unlock measurable sustainability impact.

Without supplier-level data, businesses face critical blind spots - exposing themselves to rising costs, compliance pressures, and missed opportunities. CDP helps connect you to your supply chain. Creating transparency, resilience, and preparedness.

How can this help you?

Proven environmental leadership
With 18 years of supply chain expertise and 25 years driving environmental disclosure, CDP disclosure represents best practice and continually evolves to meet market demands.

Actionable insights
Access standardized primary supplier-specific environmental data across climate, forests, water, biodiversity, and plastics.

Smarter procurement decisions
Use CDP data to inform purchasing strategies, strengthen supplier engagement and benchmark performance at scale.

Cut emissions and costs
Companies reducing emissions through their supply chains are saving up to US$54.4 billion. By acting on Scope 3, you can reduce costs, boost efficiency, and improve resilience.

Impactful supplier engagement
In 2025, nearly 45,000 suppliers were requested to disclose through CDP's Supply Chain Membership. CDP streamlines engagement, helping members connect with suppliers at scale.

Connect with a global network of peers
Join a community of sustainability leaders. Benefit from expert guidance, 1-1 support, member events, and working groups to accelerate your impact.

Unlock powerful data tools

Membership includes access to a range of data products and tools to help you track performance, meet disclosure requirements, and manage Scope 3 emissions with confidence.

What CDP data products deliver

Comprehensive supplier level data

Insights that reduce risk and inform strategy

Global coverage across complex, cross-border supply chains

CDP's flagship data products: Designed to drive smarter procurement

Scope 3 Report

Integrate real-world supplier emissions data into your Scope 3 inventory, including emissions intensity, five-year sector emissions averages, and integration-ready outputs that compliment Life Cycle Assessments or input-output models.

Metrics Report

View key environmental indicators across your supply chain at a glance. These metrics cover Scope 1, 2, and 3 emissions, targets, renewable energy use, risk management practices and more.

Supply Chain Engagement Tool (CSET)

CSET helps you segment suppliers by maturity level (beginner, intermediate, advanced) and tailor engagement strategies.
