To the Board of Directors  
Upper Trinity Regional Water District

Your Staff is proud to present this Comprehensive Annual Financial Report (CAFR) for the fiscal year ended September 30, 2019 – reflecting steady progress in achieving the goals of the Upper Trinity Regional Water District (“Upper Trinity” or “District”). Board Members can be proud of their role in setting priorities and providing guidance toward the desired results for this regional enterprise. This CAFR is a good source of useful information about the finances and operations of the District; and, it summarizes the condition of the enterprise and the progress of regional service. As a regional utility system, we provide water and wastewater services on a wholesale basis to cities and utilities in the rapidly growing area on the north side of the Dallas/Fort Worth Metroplex.

The CAFR was prepared by the Business Department of the District; and, responsibility for the accuracy of the data, for completeness and fairness of presentation, and for all disclosures rests with District management. For the best understanding, one should consider the information presented here in conjunction with the separate section titled *Management’s Discussion and Analysis* in the Financial Section of this report.

The information herein is accurate in all material respects; and, is reported in a manner that presents fairly the financial position of, and the operating results for, the District. Disclosures are included as necessary to enable members of the Board of Directors and other interested parties to understand more clearly the District’s activities and financial results. The financial statements in the CAFR were audited as required by the Texas Water Code, by the firm of Deloitte & Touche LLP.

## **General Information**

### *Structure of the Enterprise*

The District, headquartered in Lewisville, Texas, was created in 1989 by the Texas Legislature as a conservation and reclamation district under Article XVI, Section 59 of the Texas Constitution. The District is authorized to plan, develop, manage and provide wholesale utility services on a regional basis. For Member entities and for other Customers, the District is expected to meet present and future water supply and water reclamation needs; and, if requested by Member entities, to address future needs for solid waste management. The District was created as a governmental enterprise, without taxing power; therefore, costs of services and programs are financed through user fees and charges, and through the issuance of tax-exempt debt.

The District is organized and managed to function as an efficient enterprise in a competitive market environment. The District has specific authority to:

- develop raw water resources or to contract therefor;
- construct, own and operate water systems, including treatment, pumping and transmission facilities;
- construct, own, and operate water reclamation (wastewater treatment) systems, including interceptor trunk mains, treatment, disposal, and reuse facilities;
- provide other services authorized by the Board, not in conflict with the District's enabling statute;
- make contracts to provide for these services on a wholesale basis for municipalities, retail utilities, and others;
- recover the cost for District services through fees and charges.

The District is composed of 24 public entities (Members) – including 19 towns and cities, plus Denton County, one utility authority, and three special districts. Each Member entity appoints one Director to the Board of Directors of the District. As an exception, Denton County appoints two Directors – one to represent Denton County “at-large” and one to represent the Denton County Commissioners Court. The Board of Directors appoints an Executive Director who manages the District, its employees, and the services and programs offered. In addition to serving its Members, the District enters into “Customer” contracts for water and wastewater services with non-member cities, non-profit water supply corporations and special districts under similar terms as member entities.

This CAFR covers the various wholesale services provided by the District: raw water supply, treated water service, water reclamation (wastewater treatment) service, non-potable and reclaimed water, and collection of household hazardous waste. In addition, the District has a component unit (Upper Trinity Conservation Trust) for the purpose of promoting watershed protection.

#### *Funding of District Projects*

The District provides funds for construction of water and water reclamation facilities, primarily with tax-exempt municipal revenue bonds; and, to a limited extent, with commercial paper. For certain projects, the District has taken advantage of the State Participation program and other programs from the Texas Water Development Board. Under the Board/State Participation programs, the State of Texas encourages the development of efficient regional utility systems, by taking an equity interest in qualified projects to enable construction of adequate capacity for future needs.

For each project or service, participating entities (both Members and Customers) enter into District contracts that require certain minimum payments to cover fixed costs. The provisions of these contracts assure a stable and dependable source of revenue to cover each entity's proportionate share of the applicable cost, including administration and planning, operating and maintenance, capital and financing costs, and other relevant costs of the project and of the service being rendered. In addition, contracts with certain Fresh Water Supply Districts (FWSDs) stipulate that the contracting entity will provide initial funding for cost of specified infrastructure for water reclamation projects in the northeast portion of the District's service area. Under these agreements, the District owns and operates the system and may extend service to other Members and Customers. A portion of said initial funds so provided is subject to reimbursement when the District is ready to provide permanent financing (after growth and development assure a dependable revenue stream, fully adequate to support debt service on the permanent financing).

## *Mission, Vision, and Goals*

The following mission statement adopted by the Board of Directors guides the various programs of the District:

*The District's mission is to plan, develop and manage water and solid waste services in the interest of its Members, using consensus-based strategies that are environmentally and economically sound.*

The District's vision is to:

*Focus on Member and customer needs as the primary purpose of the District, and endeavor to be the provider of choice for the service area.*

Work Program Guidelines adopted annually by the Board of Directors help focus the energies, activities and resources of the District for maximum effectiveness and results. These Guidelines provide positive direction to management in the following areas: *Leadership, Organization, Function, Finance, Partnerships, Environment and Education.*

## *Development History*

Upon creation of the District in 1989, the Board of Directors embarked on an ambitious mission to plan, develop and implement regional water supply and regional water reclamation programs for approximately 30 towns and cities. Water supply was the most immediate challenge; but, water reclamation also was given priority attention. Prior to completion of the first regional water treatment facility in 1997, the District purchased treated water on an interim basis from other entities to resell to Members and Customers.

A Regional Water Treatment Plant with a capacity of 20 million gallons per day (mgd) was constructed in the City of Lewisville with convenient access to Lewisville Lake, the raw water source. The treatment plant became operational in 1997 to serve Members and utilities that contracted for wholesale treated water service. The District expanded its original 20 mgd treatment plant in phases to 70 mgd total treatment capacity by 2001. In 2009, the Board of Directors named the plant the Thomas E. Taylor Regional Water Treatment Plant for its long-time Executive Director. The Plant is located on an ample site that will enable staged expansion to at least 300 mgd of treatment capacity as needed to provide for future growth within the District's service area.

The initial Regional Treated Water System served eleven towns, cities and utilities. Growth has continued throughout the District's service area and many communities (both Members and Customers) have requested service. To provide for the needs of Member entities and other wholesale customers, the District has extended a network of major transmission pipelines across its service area, now providing treated water service to more than twenty five communities in the Denton County area. The District has adequate capability and capacity to provide for the needs of its Members and Customers who have contracted for service. Each community now has access to an adequate supply of water, including the peak needs that occur during periods of drought.

In accordance with long-range plans, in 2003 the District proceeded with design of the District's second regional water treatment plant, located in northeast Denton County. In Fiscal Year 2008 (FY), the Tom Harpool Regional Water Treatment Plant began operation. This new plant uses membrane technology as part of the treatment process to provide enhanced treatment and for protection of water quality. The plant site is sufficient to support 240 mgd of water treatment facilities as further growth in the service area may require. The Board of Directors chose to name this new regional facility after a local pioneer in long-range water supply planning, Mr. Tom Harpool, a past President of the Board.

The District is continuing with its strategic planning activities to achieve an adequate long-range supply of water resources for future needs. At five-year intervals, the Texas Water Development Board prepares an updated Texas Water Plan, a master plan for the State of Texas based on a consolidation of 16 regional plans prepared locally. In 2013, a survey was conducted by the local Regional Planning Group (Region C) of the District's Members and Customers to assist in preparation of the latest Plan. In May 2016, the Texas Water Development Board approved the updated final Plan and submitted it to the Texas Legislature. The approved Plan became the 2017 Texas Water Plan. The Texas Water Plan incorporates and reflects the District's own initiatives and outlines a range of recommended strategies to assure an adequate water supply for the District over the next 50 years. The current 2017 Plan provides for water supply needs through 2060. Efforts are already underway for the next five-year update.

In 2003, the District submitted an application for a water rights permit for the proposed Lake Ralph Hall to the Texas Commission on Environmental Quality (TCEQ). In 2006, the District filed a Section 404 permit application with the U.S. Army Corps of Engineers to enable the District to construct the proposed lake.

This new lake will be located in Fannin County in the North Sulphur River Basin and will provide the District and its growing customer base with a firm yield of approximately 30 mgd (million gallons per day) of new water supply. In March 2011 after a thorough technical review, the Executive Director for the TCEQ issued a draft water rights permit, after which the next step was to consider any opposition thereto. In April 2012, the State Office of Administrative Hearings began the legal process for a Contested Case Hearing regarding the proposed permit. Three entities were admitted as opposition parties to the hearing; and the Contested Case Hearing was held in Austin in January 2013. For the first time in nearly thirty years, TCEQ officially awarded a permit for a new water supply lake in Texas, voting to issue the requested permit for Lake Ralph Hall to the District in September 2013. The water rights permit was issued as of December 11<sup>th</sup>, 2013, making the District's long-term water supply more secure.

Also, in 2007 the District filed two applications with the Water Resources Board of the State of Oklahoma (WRB), seeking the right to divert water from the Kiamichi and Boggy Creek basins, both basins being adjacent the Oklahoma/Texas boundary. In 2009, a third application was submitted to the WRB, seeking rights to use water from Lake Texoma on the Oklahoma/Texas boundary. Those applications remain on file with the WRB pending legal and policy challenges. With a more current outlook, the District is engaged with other regional water systems in evaluation of alternative water resource projects in northeast Texas.

It is important to note that the District currently has water supply resources which are adequate for about 10 to 12 years into the future. The long-range planning activities summarized above reflect the District's efforts to develop adequate sources as needed for the next 50 years.

Initial development of the District's regional water reclamation (wastewater treatment) program began in 1996 when Lake Cities Municipal Utility Authority (LCMUA), a Member entity, transferred its existing wastewater treatment plant (with 1.0 mgd capacity) to the District. By 1998, the District had organized the Lakeview Regional Water Reclamation System and had enlarged the treatment plant to 3.5 mgd to serve LCMUA plus two other Members. In 2003, the Lakeview plant was expanded to 5.0 mgd, and wholesale service was extended to three additional participants, for a total of six member entities: LCMUA, Corinth, Highland Village, Double Oak, Bartonville, and Denton County Fresh Water Supply District #7 (Lantana). During FY 2013, construction was completed to expand treatment capacity to 5.5 mgd.

In 2003, new water reclamation facilities became operational in northeast Denton County, with two new plants. The Riverbend Water Reclamation Plant and the Peninsula Water Reclamation Plant began serving seven additional Members and Customers on a wholesale basis: Oak Point, Lincoln Park, Mustang Special Utility District (Mustang SUD), and four Fresh Water Supply Districts (FWSD). In 2008, the Peninsula Plant was expanded from 375,000 gallons per day to 940,000 gallons per day; and in 2013 construction was completed for an expansion of the Riverbend Plant from 1.5 mgd to 2 mgd. The Riverbend Plant was subsequently expanded from 2 mgd to 4 mgd in 2019. Also, construction of the Doe Branch Water Reclamation Plant for 2 mgd was completed in fall of 2016 in northeast Denton County and serves the cities of Prosper and Celina, Mustang SUD and FWSD No. 10. Currently, the District is in the planning phase to expand the Doe Branch Plant to 4 mgd.

As a strategic element of an ambitious watershed protection program, the District created the Upper Trinity Conservation Trust (UTCT) in FY 2010 and began financial operations in FY 2011. The UTCT will receive donations and acquire land and conservation easements for the purpose of protecting water quality in watersheds above the District's water supply sources. The District established the UTCT as a non-profit conservancy and appointed a nine-member Board of Trustees to lead the new entity on its important mission. The UTCT acquired full tax exemption from the Internal Revenue Service (IRS) in FY 2012.

#### *Services Provided*

The chart on the following page summarizes the various services provided by the District to Members and Customers.

## **Operational Information**

### *Internal Accounting Controls*

Management is responsible for establishing and maintaining internal controls designed to assure that assets of the District are protected from loss, theft or misuse. Further, management must ensure that adequate accounting data are compiled to allow for preparation of financial statements in conformity with generally accepted accounting principles. The District has developed a *Fraud Risk Assessment and Procedures Manual*, a very helpful tool in evaluating and maintaining internal controls. Such internal controls provide reasonable, but not absolute, assurance that internal control objectives are met. The concept of reasonable assurance recognizes that:

- the cost of any given control should not exceed the benefits likely to be derived; and,
- the evaluation of costs and benefits relies on informed estimates and judgments by management.

All internal control evaluations occur within this framework of “reasonable assurance”. We believe the District’s internal accounting controls adequately safeguard assets and provide reasonable assurance of proper recording of accounting transactions.

### *Budgetary Controls*

To augment accounting controls, the District maintains budgetary controls. The objective of these controls is to ensure compliance with legal and fiscal provisions of annual operating and capital budgets approved by the Board of Directors. The level of budgetary control (i.e., the level at which expenditures cannot legally exceed the appropriated amount) is at the “fund” level. As confirmed by the statements and schedules included in the financial section of this report, the District continues to meet its responsibility for sound financial management.

### *Risk Management*

The District participates in the Texas Municipal League Intergovernmental Risk Pool to manage risks associated with District property, and for liabilities related to District operations. On the District’s books, liabilities are recognized when incurred, rather than when claims are actually reported.

## **Other Information**

### *Submission for Award*

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the District for its CAFR for the most recent fiscal year, through September 30, 2018. This was the District’s nineteenth consecutive Certificate of Achievement award from GFOA. In order to be awarded a Certificate of Achievement, the District must publish an easily readable and efficiently organized CAFR, which conforms to program standards. Each CAFR must satisfy both generally accepted accounting principles and applicable legal requirements.

Each Certificate of Achievement applies to a CAFR that presents the financial position and results of operations for one particular year. We believe this year’s CAFR will conform to

Certificate of Achievement Program requirements; and, we will submit it to GFOA for consideration.

In addition, GFOA awarded the Distinguished Budget Presentation Award to the District for the FY 2019 budget year. This was the District's tenth year to submit and to receive this award. The Distinguished Budget Presentation Award encourages and assists state and local governments in preparation of budget documents of the highest quality that reflect both the guidelines established by the National Advisory Council on State and Local Budgeting, and the GFOA's best practices on budgeting. Awards are given by the GFOA to recognize individual governments that succeed in achieving that goal.

The Distinguished Budget Presentation Award is given on annual basis. We believe that the budget submitted for the FY 2020 budget year continues to satisfy the requirements to receive the Award. Therefore, the FY 2020 budget was submitted in November 2019 for consideration.

#### *Acknowledgements*

Preparation of this CAFR report could not have been accomplished without the efficient and dedicated support of the entire staff of the Business Department, augmented by expert assistance from the Administration, Operations and Engineering Departments. We wish to express our appreciation to all District personnel who assisted and contributed to the preparation of this report.

Especially, we want to express appreciation to the Board of Directors for their continued vision in governance of the District, and for their guidance and support to management in planning and conducting the operations of the District in an efficient manner. With dedicated Members working together, the District continues to excel, fulfilling the regional mission for adequate long-range water supply and for excellent wastewater services – for the people and communities in our service area.

Respectfully submitted,

Larry N. Patterson, P.E.  
Executive Director

William A. Greenleaf  
Chief Financial Officer

## **INDEPENDENT AUDITOR'S REPORT**

Members of the Board of Directors  
Upper Trinity Regional Water District  
Lewisville, Texas

### **Report on the Financial Statements**

We have audited the accompanying financial statements of the business-type activities and discretely presented component unit of the Upper Trinity Regional Water District (the "District"), as of and for the year ended September 30, 2019, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

### **Management's Responsibility for the Financial Statements**

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### **Auditor's Responsibility**

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

## **Opinions**

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the business-type activities and the discretely presented component unit of the District, as of September 30, 2019, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## **Other Matters**

### ***Required Supplementary Information***

Accounting principles generally accepted in the United States of America require that *management's discussion and analysis* be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### ***Other Information***

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Upper Trinity Regional Water District's basic financial statements. The Supplemental System and Project Schedules, the Introductory Section, the Statistical Section, and the Supplemental Schedules Required by the Texas Commission on Environmental Quality are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Supplemental System and Project Schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Supplemental System and Project Schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The Introductory Section, the Statistical Section, and the Supplemental Schedules Required by the Texas Commission on Environmental Quality have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

*Deloitte & Touche LLP*

# UPPER TRINITY REGIONAL WATER DISTRICT

## MANAGEMENT'S DISCUSSION AND ANALYSIS FISCAL YEAR ENDED SEPTEMBER 30, 2019 (UNAUDITED)

---

Your interest in the financial results of the Upper Trinity Regional Water District (the District) is appreciated. We hope this financial report will be interesting and informative about the District's mission to provide for wholesale water and wastewater needs in our growing service area on the north side of the Dallas/Fort Worth Metroplex. Management is pleased to provide this overview and analysis of the District's financial activities for the fiscal year ended September 30, 2019.

### PROGRAM HIGHLIGHTS

- An improving financial condition. A key indicator is "Net Position", which is the remainder after deducting total liabilities from total assets and deferred outflows. Net Position as of the end of FY 2019 was over \$169 million, an increase of approximately 25% for the year. The increase was largely due to:
  - Vigilance of the Board and Staff in controlling costs.
  - Taking advantage of available low-cost capital financing.
  - A steady commitment to funding reserve accounts.
- Favorable interest rates remained through FY 2019. Use of Commercial Paper for capital improvements in the Regional Treated Water System saved substantial money. Interest rates on Commercial Paper ranged from a low of 1.36% to a high of 1.90%.
- Total net capital asset additions were nearly \$34 million, of which over \$32 million was for the Regional Treated Water System.

You may find comparative financial information to be worthwhile; and, considerable information is provided in other sections of this Management's Discussion and Analysis.

### OVERVIEW OF THE FINANCIAL STATEMENTS

This financial report is composed of financial statements, plus the appropriate notes for the Enterprise Fund. For a complete analysis, one also needs to examine the supplementary information to the basic financial statements, containing the financial information for the individual systems and projects. In this context, the following discussion and analysis serves as an introduction to the District's basic financial statements.

**Financial Statements**—The financial statements are designed to provide a reader with an overview of the District's finances, in a manner similar to a typical private enterprise.

The *Statements of Net Position* presents information on all District assets, deferred outflows, and liabilities, with the difference between assets, deferred outflows, and liabilities being reported as *net position*. Over time, increases or decreases in net position can serve as an indicator of the long-term trend of the District's financial condition.

The *Statements of Revenues, Expenses and Changes In Net Position* shows activity and changes during the fiscal year. Changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flow. Thus, revenues and expenses are reported for some items that will not affect cash flow until future fiscal periods (e.g., earned but unused vacation leave and accounts receivable for services).

The *Statement of Cash Flows* presents information showing the District's cash activities, cash receipts and cash disbursements. The statement of cash flows is presented in three broad categories: (1) cash flows from operating activities, (2) cash flows from capital and related financing activities, and (3) cash flows from investing activities. The statement of cash flows is a useful tool in understanding the District's cash position.

**Notes to the Financial Statements**—The notes provide additional information that is essential to a full understanding of the data provided in the financial statements.

## **ENTERPRISE FUND FINANCIAL ANALYSIS**

The trend of changes in net position over time serves as an indicator of the District's financial condition. Year-end assets and deferred outflows exceeded liabilities by over \$169 million—an approximate increase of 25% in net position compared with fiscal year 2018. As noted on page 1, the increase was due to controlling costs, use of low-cost capital financing and a commitment to fund the District's reserves.

The District and most of its member entities practice cash-basis budgeting. Further, the District does not consider depreciation expense when setting rates for utility services rendered to members and customers. Considering this, a relevant view of the District's financial strategy would be the original cost of the District's assets, less indebtedness, without any reduction for accumulated depreciation expense. Accordingly, the District only recovers the original cost of the acquired assets, plus related financing costs in its rates and charges.

Another major element of the District's financial strategy has been the use of funds provided by the Texas Water Development Board (TWDB) under the State Water Implementation Fund for Texas (SWIFT) *Board Participation Program*. Board Participation funds were received for the purpose of acquiring land and for other aspects of the Lake Ralph Hall Project, a key component of the Regional Treated Water System. Board Participation funds allow for added flexibility -- with repayment to occur more closely to the time when Lake Ralph Hall is completed and in use. As a result, there is minimal cost to the current customer when Board Participation funds are used.

Similar to the structure of the *Board Participation Program* is the *State Participation Program* of the TWDB. Under this Program, the State of Texas invests capital funds in specific projects for equity participation to enable growing regional systems like the District to oversize facilities in an efficient manner - that is, to construct extra capacity for anticipated future growth. This Program enables the District to prepare for the future, with little cost to current customers. In the future, when pipeline or plant capacity is needed to meet the needs of a growing customer base, the District is required to repurchase from the State such constructed capacity as needed, at original cost. Such original oversize cost could be a fraction of what the cost would be to construct stand-alone capacity in the future to meet such growth requirements. Therefore, for sound financial reasons, the District has made extensive use of State Participation funds to help construct extra capacity to prepare for expected future growth needs.

In addition, the flexibility of both the Board Participation and State Participation Programs affords the District time to refund the debt in more favorable interest rate environments financially beneficial to achieve the greatest savings. As a result, the District has taken advantage of historically low rates to refund nearly all of the debt issued under the State Participation Program since FY 1993. Board Participation and the remaining State Participation are discussed further in the **Debt Administration** section of the MD&A.

To help coordinate the timing of debt repayment with beneficial use, the District uses certain funding sources that offer deferred payment of principal. Such sources include the previously discussed Board Participation and State Participation financing. Other sources including Commercial Paper financing, Participant Advance Funding and other SWIFT programs such as the *Deferred Interest Program* all serve as integral components of the District's financial strategy. This strategy enables the District to plan effectively for future growth needs by not placing an undue financial burden on current customers. However, as a side effect of this practice, there could be a temporary decline in *Net Investment in Capital Assets* for an interim period. Such a decline can occur when the depreciation of capital assets is taken at a faster rate than the corresponding and related reduction in debt. When principal payments on debt are made, *Net Investment in Capital Assets* would then begin to increase.

To clarify, the amount noted as *Net Investment in Capital Assets* represents long-term capital assets minus the related debt, the District uses to provide services to its members and customer entities. These assets are not cash and cannot be immediately converted to cash; therefore, they cannot be used to satisfy current outstanding liabilities.

The District's net position also reflects the fact that \$15,035,662 is *Restricted for Debt Service*, and \$15,868,792 is *Restricted Contributions for Capital Improvements*, limiting how these funds may be used. The remaining *Unrestricted Net Position* may be used to meet ongoing obligations of the District.

**CAPITAL ASSET AND DEBT ADMINISTRATION**

The District's total capital assets as of September 30, 2019, were \$388,319,852 (net of accumulated depreciation). This investment in capital assets includes land and buildings, treatment plants, pump stations, pipelines, water rights, an emergency water supply reservoir, and other equipment and fixtures. Additional information regarding the District's capital assets is reflected in Note 5 to the basic financial statements.

For FY 2019, the most significant additions to capital assets were for the Regional Treated Water System -- which increased by approximately \$32 million. The investments in capital assets in the Regional Treated Water System were for on-going planning, regulatory permitting and land

purchases for the Lake Ralph Hall Water Supply Project and various other capital improvement projects.

**Upper Trinity Regional Water District's Capital Assets**  
**(Net of accumulated depreciation)**  
**As of September 30, 2019**  
**(With Comparative Totals As Of September 30, 2018)**

	<b>FY 2019</b>	<b>FY 2018</b>
Land	\$ 13,978,972	\$ 13,857,688
Furniture and Equipment	3,039,954	2,695,835
Plant/Pipeline Facilities	269,517,077	236,996,563

Other construction costs	<u>58,172,935</u>	<u>69,241,557</u>
 Total	 <u>\$ 388,319,852</u>	 <u>\$ 354,175,476</u>

**Debt Administration**

As mentioned earlier, over a period of years, the District received significant funding from the Texas Water Development Board (TWDB) *State Participation Program* for equity participation in construction of extra capacity in water and wastewater regional systems to meet future growth needs, reaching a peak of approximately \$55.5 million. Taking advantage of low-interest opportunities, the District has purchased most of the State's equity ownership at original cost, reducing the outstanding State Participation to \$2.1 million. The State's equity ownership under the State Participation program, plus non-current accrued interest remaining to be reimbursed when timely, was approximately \$2.21 million at fiscal year-end.

Early in FY 2016 the District received \$15.565 million from a TWDB program that is essentially the same in structure and nature as the State Participation Program – the *Board Participation Program*. Board Participation funding is part of the State Water Infrastructure Fund for Texas (SWIFT) Program of the TWDB that is specifically designed to assist for future water needs. Board Participation funding is being used for land purchases and other associated costs of the Lake Ralph Hall Project in the Regional Treated Water System. The State's equity ownership under the Board Participation program, plus non-current accrued interest remaining to be reimbursed when timely, was approximately \$17.80 million at fiscal year-end.

During FY 2016, the District also acquired \$29,115,000 as part of the SWIFT *Deferred Interest Program*. Under Deferred Interest, the District pays no principal or interest until construction is completed for Lake Ralph Hall or FY 2024, whichever is earlier. Also during that period, interest is not accrued. This funding source is being used for various planning costs associated with Lake Ralph Hall. The District classifies Deferred Interest funding as "Revenue Bonds" for financial reporting purposes.

During FY 2008, the District also received project funding for its Lake Ralph Hall Project from the TWDB *Water Infrastructure Fund - 10 (WIF-10) Program*. This state-wide program was established by the Texas Legislature to provide funding for the planning and permitting phases of water projects included in the State Water Plan. Under this innovative program, both interest and principal payments are waived for the first ten years after receipt of funds. Of special note, the interest is not “deferred”; rather, it is simply set at 0% for ten years. The District is using this favorable source of planning monies for the Lake Ralph Hall Water Supply Project. Like Deferred Interest, the WIF-10 funds are classified as “Revenue Bonds” for financial reporting purposes.

Further, the total of outstanding debt (including both State Participation and Board Participation) and other long-term liabilities is approximately \$352.76 million. Of this total, 72% is for the Regional Treated Water System; 21% is for the Northeast Regional Water Reclamation System (Riverbend and Doe Branch Plants); and, the remaining 7% is for the Lakeview Water Reclamation System and the Peninsula Water Reclamation Plant.

**Upper Trinity Regional Water District's Outstanding Debt  
As of September 30, 2019  
(With Comparative Totals As Of September 30, 2018)**

	<b>FY 2019</b>	<b>FY 2018</b>
Revenue Bonds	\$ 272,625,000	\$ 267,065,000
State/Board Participation Debt	17,665,000	17,665,000
Commercial Paper	45,000,000	27,350,000
Water Supply Obligations	4,883,080	4,983,282
Notes Payable	10,123,222	10,965,097
State/Board Participation Accrued Interest	<u>2,465,280</u>	<u>2,078,027</u>
 Total	 <u>\$ 352,761,582</u>	 <u>\$ 330,106,406</u>

As of September 30, 2019, the District's revenue bonds were rated as follows:

	<b>Moody's Investors</b>	<b>Standard &amp; Poor's</b>
Regional Treated Water System	A2	A+
Lakeview Regional Water Reclamation System	A2	A+
Northeast Regional Water Reclamation System	n/a	A+
Peninsula Water Reclamation Plant	n/a	AA-

Additional information on the District's long-term debt can be found in Notes 6 and 7 to the basic financial statements.

**ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES**

In FY 2019, the Board of Directors continued to take a proactive approach to monitor costs and to adjust rates accordingly. The Board adjusted rates as necessary to maintain and improve the District's financial condition. Of special note, FY 2019 represented the fifteenth consecutive year that the District has achieved an increase in total Net Position, with an increase of 25% for this fiscal year.

During FY 2019, the national economy's continued improvement positively impacted the growth and development in the District's service area as a whole. Accordingly, the District will continue to make adjustments in its Capital Improvement Program, Operations and Planning to pace expenditures according to economic conditions and customer needs. It is important that the District maintain a close watch on all aspects of its financial plan – capital planning, revenue projections, and cash management.

With continued growth in the District's service area, capital planning continued at a steady pace. Accordingly, the District proceeded with key capital projects: (1) acquisition of land and permitting for the important future water supply source in Lake Ralph Hall; (2) projects to improve efficiency and service in the Regional Treated Water System; and (3) planning for the expansion of services in the Northeast Regional Water Reclamation System.

As a strategic element of the District's watershed protection program, the District established the Upper Trinity Conservation Trust (UTCT) as a component unit during FY 2010. The District established the UTCT as a charitable entity and appointed a Board of Trustees. During FY 2012, the UTCT experienced its first full fiscal year of operations and received IRS approval for full tax exemption. In future years, the UTCT is expected to receive donations and acquire land and conservation easements for the purpose of protecting water quality in watersheds above the District's water supply sources.

In September 2019, the Board of Directors approved new rates and charges for Fiscal Year 2020:

- Lakeview Regional Water Reclamation System. There was no increase for various fees and charges.
- Northeast Regional Reclamation System. The average increase for various fees and charges was 3.70%.
- Peninsula Water Reclamation Plant. The average increase for various fees and charges was 6.00%.
- Regional Treated Water System. Combined, the blended rate increase for the fixed "Demand" components and the variable "Volume" components averaged 2.25%.

The District has maintained its full readiness and capacity to serve, and is prepared for economic growth, with the accompanying financial requirements. In the meantime, management continues to be vigilant in its oversight of District budgets, investments, finances, rates, and expenditures.

## **REQUESTS FOR INFORMATION**

This financial report is designed to provide a general overview of the District's finances, with a glimpse at enterprise planning and operating strategies. We believe that the results confirm the District's responsible stewardship and accountability for all funds and resources entrusted to the District. The District is proud of its commendable track record in development of regional systems, in extension of water and wastewater service throughout the service area, staying ahead of growth demands—and, in preparation for the future. Management of the District believes that the

District's motto on the cornerstone of its headquarters building is very apt:

***Providing for the present and future needs of this region.***

***With vision and courage we plan.***

***With cooperation and commitment we serve.***

Questions concerning any of the information provided in this report, and requests for additional financial information may be addressed to the Chief Financial Officer, P.O. Box 305, Lewisville, Texas 75067.

# UPPER TRINITY REGIONAL WATER DISTRICT

## NOTES TO FINANCIAL STATEMENTS AS OF AND FOR THE YEAR ENDED SEPTEMBER 30, 2019

---

### 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Upper Trinity Regional Water District (District) is a political subdivision of the State of Texas and a body politic and corporate, created as a conservation and reclamation district under Article XVI; Section 59 of the Constitution and chapter 1053, Acts of the 71st Legislature of Texas, Regular Session, 1989. Under the Constitution and the statutes the District has broad powers for water conservation and use of storm and flood waters and unappropriated flow waters. The District has specific authority to construct, own, and operate water supply, treatment and distribution facilities and wastewater gathering, treatment, and disposal facilities, to charge for such services; and to make contracts for such purposes with municipalities and other entities.

A board of directors appointed by member entities governs the District. Each member entity appoints one representative, who is not an elected official of the entity, to serve as a director for a term of four years. In order to fund the water and wastewater services to member entities, members pay a proportionate share of the administrative, planning, operating and maintenance, and financing costs of projects based upon their usage of services from each project in which they participate. Non-member entities (customers) pay fees at a slight premium compared to member entities.

The accounting policies of the District conform to accounting principles generally accepted in the United States of America (GAAP) applicable to governments. The following is a summary of the more significant policies:

#### **District's Systems and projects**

- A. **Reporting Entity** – The District's basic financial statements include all organizations and activities determined to be part of the District's reporting entity. The following are descriptions of the systems and projects, which are sub funds of the District and the Upper Trinity Conservation Trust (UTCT) which is the component unit of the District.

The District's Regional Treated Water System (RTWS) was placed in service in June of 1994 and currently provides treated water service to 19 customers in Denton County. The total subscribed capacity for RTWS' customers is 78.12 million gallons per day (mgd). Flower Mound is the RTWS's largest customer with a subscribed capacity of 30 mgd.

The District initiated wholesale wastewater treatment service to customers of the Lakeview Regional Water Reclamation System (LRWRS) in 1996. It was completed in two phases and currently serves Bartonville, Corinth, Denton County Fresh Water Supply District (DCFWS) #7 (Lantana), Double Oak, Highland Village, and Lake Cities MUA. The total combined subscribed capacities for these customers are currently 5.329 mgd, with Highland Village having the highest subscribed capacity at 1.65 mgd.

In March of 1995 the District entered into a contract for non-potable water service with DCFWS #1A. This system, which consists of a pump station and non-potable pipeline, was placed in operation in 1998. The system provides both treated effluent and raw water service to DCFWS #1A.

The Northeast Regional Water Reclamation System (NERWRS) is composed of the Riverbend and Doe Branch Plants. Riverbend currently provides wastewater treatment service to Mustang Special

Utility District (MSUD), Providence Village, and DCFWSD's #8A, #10, and #11. The Doe Branch Plant provides wastewater treatment services to Celina, Prosper, MSUD and DCFWSD #10. The combined contracted capacities for the two plants are 5.45 mgd.

The Peninsula plant is also located in Northeast Denton County and became operational in 2003. The Peninsula plant serves Mustang SUD. Peninsula has a contracted capacity of .94 mgd.

The other sub funds include the Household Hazardous Waste Program. The District's Growth Project is used to account for the acquisition of land for projects. Administration and Project Development are used to report administrative fee revenue and expenses and to account for various expenses before the construction of projects begins.

#### **Discrete component unit**

The UTCT is a component unit of the District that was established in June 2010. The purpose of the UTCT is to receive, acquire, invest and maintain financial, real property and other assets for the purpose of protecting designated watersheds and water quality. The District appoints the board members that are separate from the District's Board of Directors and provides significant funds for the UTCT's operations. Therefore, the UTCT is accounted for as a discretely presented component unit, which is reported as a business type activity, as it charges fees for services to users. The UTCT does not issue separate financial statements.

- B. **Fund Accounting** — The accounts of the District are organized into one Enterprise Fund, a proprietary fund. The operations of the fund are accounted for using a set of self-balancing accounts that comprise the fund's assets, liabilities, net assets, revenues and expenses. Enterprise Funds are used to account for operations that are financed and operated in a manner similar to private business enterprises — where the intent of the governing body is that the costs (expenses, excluding depreciation and amortization) of providing services to the contracting users on a continuing basis be financed or recovered primarily through user charges; and for which the governing body has decided that periodic determination of revenues earned, expenses incurred and/or net income is appropriate for capital maintenance, management control, accountability or other purposes.
- C. **Basis of Accounting** — The proprietary fund is accounted for on a cost of services or "economic resources" measurement focus, using the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recognized when incurred.

The statement of net position presents information on all of the District's assets, deferred outflows, and liabilities, with the difference between the two reported as net position.

The statement of revenues, expenses and changes in net position presents information showing how the District's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., earned but unused vacation leave).

The District distinguishes operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services in connection with the District's principal ongoing services. Operating expenses include the cost of providing the services, administrative expenses, depreciation of capital assets and general overhead. General overhead expenses such as the District's management and support staff's salary, benefits, supplies, rent and utilities are allocated to all operating systems and construction projects based on percentage of the total expenses for the year. All other expenses and revenues not meeting the definition outlined above are reported as non-operating revenues and expenses.

Rates charged for services to member and customer entities are established during the budget process and approved by the Board of Directors for each fiscal year. The Board provides final

approval for the next fiscal year rates during the September meeting preceding the end of the fiscal year.

- D. **Cash, Cash Equivalents, and Investments** — Cash equivalents are defined as cash, public funds investment pools, and investments purchased within three months of maturity. Investments are recorded at fair value, defined as the amount at which two willing parties would complete an exchange.

The District reports cash and cash equivalents related to the acquisition or construction of capital assets or for debt service as a restricted non-current asset.

- E. **Restricted Cash and Cash Equivalents** — Certain cash and cash equivalents related to the acquisition or construction of capital assets and certain proceeds of revenue bonds, as well as certain resources set aside for their repayment, are classified as restricted assets on the balance sheet because their use is limited by applicable bond covenants and agreements. When both restricted and unrestricted resources are available for use, it is the District's policy to use restricted resources first, and then unrestricted resources as they are needed. This is exemplified in the resources first being used for debt service payments and construction costs. Escrow funds are held in UTRWD's name but are restricted for construction. The following table lists the categories and amounts of cash and cash equivalents that are restricted.

<u>Restricted Cash and Cash Equivalents</u>	<u>Amount</u>
<u><b>Current Restricted Cash and Cash Equivalents</b></u>	
Self Insurance Reserve	\$ 1,068,031
Total Current Restricted Cash and Cash Equivalents	<u>1,068,031</u>
<u><b>Non-current Restricted Cash and Cash Equivalents</b></u>	
Interest and Sinking Reserve	2,102,225
Debt Service Reserve	9,400,037
Construction Funds	41,966,864
Dfund cash held in escrow	1,543,091
Board Participation cash	592,057
Board Participation cash held in escrow	633,403
State Water Infrastructure Fund for Texas (SWIFT) - cash	12,467,915
State Water Infrastructure Fund for Texas (SWIFT) - escrow	14,937,708
Total Non-current Restricted Cash and Cash Equivalents	<u>83,643,300</u>
Total Restricted Cash and Cash Equivalents	<u>\$ 84,711,331</u>

- F. **Capital Assets** — Capital assets are recorded at historical cost. In the case of gifts or contributions, such assets are recorded at their acquisition value at the time received. Depreciation on property, plant and equipment in the financial statements are recorded for each major class of depreciable property utilizing the straight-line method over the following estimated useful lives:

Furniture and equipment	3–15 years
Plant/pipeline facilities	10–50 years
Reservoirs	50 years
Water Rights	100 years

The District's capitalization threshold for assets is \$5,000. A full year of depreciation on plant/pipeline facilities is taken in the fiscal year following the year the asset is put in service.

- G. **Compensated Absences** — The District's employees earn vacation and sick leave that may be used or accumulated up to certain limits. Unused vacation is paid upon retirement, termination or death. Unused sick leave is reduced to a percentage of the accumulated balance when paid upon retirement, certain terminations or death.

A liability is recorded for vacation and sick leave earned by employees attributable to past service. The maximum amount of vacation that can be accrued is equal to 2 years of annual eligibility for each employee. The maximum amount of sick leave that can be accrued is 1,200 hours for each employee. Employees are eligible to take accrued sick leave and vacation after 30 days and 6 months, respectively, from initial employment with the District.

The District calculates the current portion of the compensated absences liability based on a 3-year rolling average of amount used by employees. In addition, a liability is recorded for certain salary-related payments associated with the payment of accrued vacation and sick leave. Current portion of \$637,365 is included in accrued wages and benefits.

As of September 30, 2019, liabilities relating to accrued vacation and sick leave have been recorded as shown:

	<b>Sick Leave</b>	<b>Vacation</b>
Beginning of fiscal year	\$ 821,327	\$ 576,217
Decrease	(217,968)	(365,842)
Increase	297,764	456,489
End of fiscal year	\$ 901,123	\$ 666,864

The District does not provide post-employment benefits that meet the definition of GASB Statement 74, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans* that became effective for the District in FY2018.

- H. **Net Position** – Net position on the Statements of Net Position includes the following:

*Net investment in capital assets* – the component of net position that reports the difference between capital assets less both the accumulated depreciation and the outstanding balance of debt net of premiums, discounts and debt issue costs, excluding unspent proceeds, that is directly attributable to the acquisition, construction or improvement of these capital assets. It does not include long-term accrued interest on State Participation debt.

For the calculation of this portion of net position for individual projects as sub-funds, all debt related to capital assets is considered. For the entity-wide financial statements, loans between sub-funds are not included for the calculation of net investment in capital assets, because the debt is not owed to an outside party and does not represent a debt of the District as a whole.

*Restricted for Debt Service* – the component of net position that reports the difference between assets to be used for debt service and associated liabilities.

*Restricted Contributions for Capital Improvements* – the component of net position that reports the amounts restricted for capital improvements.

*Unrestricted* – the difference between the assets, deferred outflows, and liabilities that is not reported in Net Investment in Capital Assets and Restricted Net Position.

## 2. CASH AND INVESTMENTS

The Board designates a financial institution to serve as the depository for the funds of the District in accordance with its enabling statute. To the extent that funds held by the depository bank are not insured by the Federal Deposit Insurance Corporation, they are secured in the manner provided by law of the State of Texas. At September 30, 2019, the District's cash and cash equivalents included deposits with carrying amount of \$3,802,459 for the District and \$67,611 for the UTCT. The bank balance as of September 30, 2019 was \$5,599,035 for the District and \$67,525 for the UTCT. Both bank balances at September 30, 2019, were entirely covered by federal depository insurance or by collateral held by District's independent third party agent (BNY Mellon) in the District's name.

As of September 30, 2019, the District had the following investments:

Investment Type	Fair Value	Weighted Average Maturity (Years)
J.P. Morgan Commercial Paper	\$7,744,428	0.3562

**Statutory Risks – Investments** – To ensure that the District is in compliance with all applicable laws, the District adheres to a Board approved Investment Policy in accordance with Chapter 2256, Texas Government Code (Texas Public Funds Investment Act).

**Interest Rate Risk** — In accordance with the District's Board approved investment policy and with Chapter 2256, Texas Government Code (Texas Public Funds Investment Act), investments are made to ensure the primary objective of preservation of capital and the safety of principal in the overall portfolio. Interest rate earnings and reasonable returns are the secondary objectives. As a result, each investment transaction seeks to ensure first that capital losses are avoided, whether they be from security defaults or erosion of market value. Therefore, the District does not expose itself to significant interest rate risk.

**Credit Risk** — In accordance with the District's Board approved investment policy and with Chapter 2256, Texas Government Code (Texas Public Funds Investment Act), the District's investments in public funds investment pools include investments with TexPool. As of September 30, 2019, TexPool was rated as an AAA by Standard & Poor's. TexPool is a public funds investment pool created by the Treasurer of the State of Texas, acting and through the Texas treasury Safekeeping Trust Company, is empowered to invest funds and act as a custodian of investments purchased with local investment funds in full compliance with the Public Funds Investment Act. As of September 30, 2019, the District's investment in TexPool was \$117,627,516.

**Custodial Credit Risk – Investments** — For an investment, this is the risk that, in the event of the failure of the counterparty, the District will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. All investments held by third parties are held in the District's name.

**Public Funds Investment Act** – Audit procedures related to the Public Funds Investment Act are conducted as part of the audit of the basic financial statements. The District adheres to the requirement of the Act in the areas of investment practices, management reports an establishment of appropriate policies.

The District recognizes the net unrealized gain/loss on investments as investment income/loss.

## **Fair Value Measurements**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is a market based measurement, not an entity specific measurement.

The fair value hierarchy categorizes the inputs to valuation techniques used to measure fair value into three levels. These three levels are as follows:

**Level 1** - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities in active markets that a government can access at the measurement date. An active market for the asset or liability is a market in which transactions for an asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. Accordingly, a quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.

**Level 2** - Inputs other than quoted prices included within Level 1 that are observable for an asset or liability, either directly or indirectly. If an asset or liability has a specified term to maturity, then to qualify for Level 2 designation, an input must be observable for substantially the full term to maturity of the asset or liability.

Level 2 inputs include the following: (a) Quoted prices for similar assets or liabilities in active markets; (b) Quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or price quotations vary substantially either over time or among market makers (for example, some brokered markets), or in which little information is released publicly (for example, a principal-to-principal market); (c) Inputs other than quoted prices that are observable for the asset or liability (for example, interest rates and yield curves observable at commonly quoted intervals, implied volatilities, prepayment speeds, loss severities, credit risks, and default rates); (d) Inputs that are derived principally from or corroborated by observable market data by correlation or other means (market--corroborated inputs).

**Level 3**- Inputs that are unobservable for an asset or liability.

## **Discounted CP Investments**

The District holds investments in J.P. Morgan Commercial Paper, which are categorized based on trade activity. As they have little to no recent trade activity, they are categorized as Level 2. They are valued using benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing and has a fair value as of September 30, 2019 of \$7,744,428.

## **TexPool**

The \$117,627,516 of District's investments in Texpool is in a public funds investment pool which measures its investments at amortized cost in accordance with GASB Statement 79. The District has accordingly measured its investments in Texpool at amortized cost and as such, they are not subject to the fair value hierarchy categorization.

## **3. CONTRACTUAL AGREEMENTS RECEIVABLE**

Contractual Agreements made with other entities refers to financing provided by the District for facilities for the benefit of Mustang SUD and Argyle Water Supply Corporation (WSC). The amount of \$2,606,866 represents the principal and interest to be paid by these entities, of which \$659,337 is recorded in accounts

receivable from customers is to be repaid in the next fiscal year. The interest rates of the agreements range from 3.60% to 6.077% and are expected to be repaid in full by the entities by fiscal year 2026.

#### 4. UNEARNED REVENUE

The unearned revenue amount is comprised of the total interest that will be earned in future periods from Contractual Agreements. The unearned revenue will be recognized as revenue in future periods when service is performed.

#### 5. CAPITAL ASSETS

The following is a summary of changes in capital assets for the year ended September 30, 2019:

	Beginning Balance	Additions	Retirements	Reclassifications	Ending Balance
Capital assets not being depreciated:					
Land	\$ 13,857,688			\$ 121,284	\$ 13,978,972
Construction in progress:					
Land - General purpose	1,735,201	1,215,985	(166,510)		2,784,676
Reservoir land	22,303,201	10,777,078			33,080,279
Other construction costs	69,241,557	33,832,505	(87,862)	(44,813,265)	58,172,935
	<u>107,137,647</u>	<u>45,825,568</u>	<u>(254,372)</u>	<u>(44,691,981)</u>	<u>108,016,862</u>
Total capital assets not being depreciated					
Capital assets that are being depreciated:					
Plant/pipeline facilities	373,680,647		(1,653,722)	44,691,981	416,718,906
Water rights	8,801,511	523,242			9,324,753
Reservoirs	1,556,416				1,556,416
Furniture and equipment	5,511,448	758,467	(56,524)		6,213,391
	<u>389,550,022</u>	<u>1,281,709</u>	<u>(1,710,246)</u>	<u>44,691,981</u>	<u>433,813,466</u>
Less accumulated depreciation for:					
Plant/pipeline facilities	136,684,084	11,070,374	(552,629)		147,201,829
Water rights	2,638,960	91,586			2,730,546
Reservoirs	373,536	31,128			404,664
Furniture and equipment	2,815,613	408,695	(50,871)		3,173,437
	<u>142,512,193</u>	<u>11,601,783</u>	<u>(603,500)</u>		<u>153,510,476</u>
Total depreciable capital assets — net	<u>247,037,829</u>	<u>(10,320,074)</u>	<u>(1,106,746)</u>	<u>44,691,981</u>	<u>280,302,990</u>
Capital assets — net	<u>\$ 354,175,476</u>	<u>\$ 35,505,494</u>	<u>\$ (1,361,118)</u>	<u>\$</u>	<u>\$ 388,319,852</u>

For the year ended September 30, 2019, the total amount of interest cost incurred was \$11,434,260. Capitalized interest of approximately \$1,132,135 was added to construction in progress.

#### 6. NOTES PAYABLE, LONG-TERM DEBT, AND OTHER LIABILITIES

Long-term debt of the District at September 30, 2019 includes bonded indebtedness consisting of revenue bonds payable, State and Board Participation debt, notes payable, related non-current accrued interest payable, and other financing proceeds not to be repaid within one year. Revenues from customers participating in these projects will be used to pay debt service on the long-term debt.

The District entered into a master agreement with the Texas Water Development Board (TWDB) on February 20, 2002 related to the Northeast Water Reclamation System and received \$2,325,000 of State Participation funding. The funding was for improvements to pump stations and transmission and distribution pipelines.

On October 1, 2015, the District entered into another master agreement related to the Regional Treated Water System and received \$15,565,000 of Board Participation funding as part of the SWIFT Program of the TWDB. The funding is for land purchases and associated costs related to the Lake Ralph Hall Project.

Under the master agreements regarding State Participation and Board Participation funding, the District is allowed to defer payment of a portion of interest costs until future periods. However, the full amount of the interest is currently being expensed on an annual basis. The amount of unpaid interest is being recorded as a non-current liability under long-term accrued interest. The District has a remaining balance of \$2,465,280 in long-term accrued interest as of September 30, 2019.

In addition to the Board Participation funding for Lake Ralph Hall, the District received \$29,115,000 of Deferred Interest funding for Lake Ralph Hall as part of the SWIFT Program. Under this program, the District pays no principal or interest until FY 2024. During that period, interest is also not accrued. The District classifies Deferred Interest funding as revenue bonds for financial reporting purposes.

Previous funding specifically for Lake Ralph Hall also includes Water Infrastructure Funding (WIF-10) from the TWDB. In FY 2008, the District received \$10,400,000 to be used for the planning phase of the District's Lake Ralph Hall Project. Under the WIF-10, the District neither pays nor accrues interest for the first 10 years after issuance of the debt and also pays no principal during that same time period. The District classifies the WIF-10 funding as revenue bonds for financial reporting purposes.

Because the interest rate market remained favorable in FY 2019, the District refunded principal of \$12,705,000 in outstanding revenue bonds in the Northeast Regional Water Reclamation System. With the refunding, the District recognized a refunding loss of approximately \$28,870. In addition, the District realized a total debt service savings of approximately \$1 million and a total present value cash savings of approximately \$748,000.

When the District issues revenue refunding bonds, the proceeds are placed in an irrevocable trust to pay all future debt service on certain refunded debt. The refunded bonds are considered defeased and neither the trust accounts nor the liability for the defeased bonds are included in the District's combined financial statements. As of September 30, 2019, none of the defeased bonds are still outstanding.

During fiscal year 2019, the District continued to make use of its Commercial Paper program for the Regional Treated Water System. The Commercial Paper program was established during fiscal year 2005 through partnerships with Banc of America Securities, LLC and Wachovia Bank, N.A. (now replaced by US Bank). The Commercial Paper program enables the District to drawdown the funds when necessary to pay for Capital Improvement Expenditures and to rollover the principal portions of the liability until the District sees fit to retire the principal balance.

In accordance with the terms of the Commercial Paper agreement ("Agreement"), the District has recorded the amount outstanding as of year-end as a long-term liability in the Statement of Net Position since the Agreement includes a long-term irrevocable financing option in the form of a Letter of Credit (LOC) in the amount of \$50,000,000. The LOC originally had an expiration date of December 31, 2019. A new LOC was made with an extended expiration date of December 30, 2022. The LOC carries an annual interest rate not to exceed 10% and can be used as a liquidity facility to ensure direct payment of principal and interest of the maturities of the commercial paper program as they become due. For fiscal year 2019, the annual interest rate for Commercial Paper ranged from 1.36% to 1.90%.

During the year ended September 30, 2019, the District used the LOC to pay principal and interest amounts on the Agreement as maturities have become due. Principal amounts drawn on the LOC have been repaid by the proceeds of new draws on the Commercial Paper program. The District repaid the interest amounts drawn from revenues of the RTWS. As of year-end there was no balance owed by the District on the LOC.

If market condition provide favorable interest rates for long-term debt, the District may refund a part or all of the Commercial Paper outstanding at any point in the future. In FY 2017, such conditions allowed the District to refund \$18,000,000 of Commercial Paper with revenue refunding bonds. The outstanding principal balance of the Commercial Paper program as of September 30, 2019 was \$45,000,000.

Also included as a significant portion of the District's long-term debt is the obligation due to the Army Corps of Engineers for Chapman Lake Water Rights through the City of Commerce. The District had a remaining balance of \$4,883,080. See note 7 for further explanation of this obligation.

The District had a remaining balance of \$10,123,222 of Notes Payable as of September 30, 2019. The District received these funds from certain fresh water supply districts for the construction of water and wastewater systems and operational contingencies. These notes have no interest costs or payment schedule associated with them. The District may repay the Notes Payable at such time as the respective service areas have developed sufficiently that the District deems it appropriate to arrange other long-term financing or repay amounts available from non-restricted assets. The notes payable are reduced by 90% of the permit fees received by the District from the Denton County Fresh Water Supply Districts.

Total activity for notes payable, long-term debt and other liabilities for the year ended September 30, 2019 was as follows:

	<b>Beginning Balance</b>	<b>Additions</b>	<b>Reductions</b>	<b>Ending Balance</b>	<b>Due Within One Year</b>
Revenue bonds	\$ 267,065,000	\$ 35,980,000	\$ (30,420,000)	\$ 272,625,000	\$ 15,575,000
Board/State participation	17,665,000			17,665,000	
Discount	(28,871)		28,871	-	
Premium	7,671,209	2,560,247	(1,242,189)	8,989,267	
	<u>292,372,338</u>	<u>38,540,247</u>	<u>(31,633,318)</u>	<u>299,279,267</u>	<u>15,575,000</u>
Revenue bonds and board / state participation debt					
Commercial paper	27,350,000	232,300,000	(214,650,000)	45,000,000	
Water supply obligation	4,983,282		(100,202)	4,883,080	103,462
Notes payable	10,965,097	3,248,550	(4,090,425)	10,123,222	
Non-current accrued interest	2,078,027	500,568	(113,315)	2,465,280	113,315
	<u>45,376,406</u>	<u>236,049,118</u>	<u>(218,953,942)</u>	<u>62,471,582</u>	<u>216,777</u>
Other long-term liabilities					
Total notes payable, long-term debt and other liabilities	<u>\$ 337,748,744</u>	<u>\$ 274,589,365</u>	<u>\$ (250,587,260)</u>	<u>\$ 361,750,849</u>	<u>\$ 15,791,777</u>

The following is a detailed listing of the long-term debt of the District as of September 30, 2019:

<b>Series</b>	<b>Amount</b>	<b>Final Maturity</b>	<b>Interest Rates</b>
<b>Regional treated water system:</b>			
Revenue bonds:			
Series 2008 (WIF-10)	\$ 8,455,000	2027	2.01-2.83%
Series 2010 (refunding)	2,680,000	2026	2.00-4.35%
Series 2010A	13,090,000	2025	2.00-4.00%
Series 2012 (refunding)	8,960,000	2029	2.00-3.75%
Series 2012A (refunding)	28,910,000	2037	2.00-5.00%
Series 2013 (refunding)	13,190,000	2030	3.11%
Series 2015 (refunding)	33,345,000	2044	2.00-5.00%
Series 2015A (SWIFT)	29,115,000	2045	2.14-4.11%
Series 2016 (refunding)	22,690,000	2032	2.00-5.00%
Series 2017 (refunding)	17,275,000	2047	2.00-4.00%
Series 2018 (SWIFT)	7,310,000	2043	1.4-3.01%
<b>Lakeview water reclamation system:</b>			
Revenue bonds:			
Series 2006 (refunding)	1,330,000	2027	4.00-4.25%
Series 2011	3,215,000	2030	3.00-5.00%
Series 2012 (refunding)	2,855,000	2028	2.00-4.00%
Series 2012A (refunding)	10,795,000	2028	2.00-5.00%
Series 2014 (refunding)	2,235,000	2030	2.00-3.50%
Series 2015	3,030,000	2035	2.00-4.00%
<b>Northeast water reclamation system:</b>			
Revenue bonds:			
Series 2016 (D-Fund)	11,560,000	2045	1.57-3.63%
Series 2017 (D-Fund)	23,990,000	2045	1.88-4.28%
Series 2019 (refunding)	27,670,000	2048	3.00-5.00%
<b>Peninsula water reclamation system:</b>			
Revenue bonds:			
Series 2016	925,000	2035	2.00-3.00%
Total revenue bonds	<u>\$ 272,625,000</u>		
<b>Regional treated water system:</b>			
Board participation:			
Series 2015	\$ 15,565,000	2050	3.98-4.11%
<b>Northeast water reclamation system:</b>			
State participation:			
Series 2003	2,100,000	2036	5.58-5.78%
Total state participation	<u>\$ 17,665,000</u>		
<b>Regional treated water system:</b>			
Water rights:			
Initial water	\$ 1,065,657	2040	3.25%
Future water	3,817,423	2050	3.25%
Total water rights	<u>\$ 4,883,080</u>		

The District plans to repay both the principal and interest on the Revenue Bonds, State Participation Obligation and Water Rights based on the following schedule:

Years Ending September 30	Revenue Bonds		Board /State Participation		Water Supply Obligation		Total
	Principal	Interest	Principal	Interest	Principal	Interest	
2020	\$ 15,575,000	\$ 9,386,510	\$ -	\$ 358,577	\$ 103,462	\$ 158,847	\$ 25,582,396
2021	15,935,000	8,810,249	-	421,147	106,827	155,481	25,428,704

Total	<u>\$272,625,000</u>	<u>\$ 109,369,389</u>	<u>\$ 17,665,000</u>	<u>\$ 19,131,301</u>	<u>\$4,883,080</u>	<u>\$2,825,046</u>	<u>\$ 426,498,816</u>

Debt of the District's water, wastewater and non-potable systems includes revenue refunding and revenue bonds, State/Board Participation funding, Water Supply Obligation and payments related to Commercial Paper. This debt is secured by and payable from net revenues of each of the District's systems. Some of the District's debt contains provisions that allow the District to prepay or call the debt.

Specifically, net revenues of the District's various systems have been pledged for repayment of the District's outstanding debt. All debt was originally issued to provide for construction of the various systems. The pledge continues for the life of the debt. For the Regional Treated Water System, net pledged revenues for the year ended September 30, 2019 were \$31,114,429 and actual annual debt service was \$21,272,393. For the Lakeview Regional Water Reclamation System, net pledged revenues were \$5,106,618 and actual annual debt service was \$3,127,225. For the Northeast Regional Water Reclamation System, net pledged revenues were \$4,475,655 and actual annual debt service was \$2,893,937. For the Peninsula Water Reclamation Plant, net pledged revenues were \$370,197 and actual annual debt service was \$69,940.

The District uses a method that approximates the effective interest rate to amortize premiums and discounts on bond issuance.

There is no amortization schedule for the Commercial Paper or Notes Payable because these liabilities have undetermined payment schedules.

## 7. WATER RIGHTS/WATER SUPPLY OBLIGATIONS

In 1990 the District entered into a 50-year contract with the City of Commerce, Texas to obtain raw water rights in Chapman Reservoir. On January 31, 2006, the Corps of Engineers (COE) notified the Sulphur River Municipal Water District (SRMWD) of its final accounting for construction. The final construction cost allocated to water supply was \$14,930,738. The District's share of SRMWD's obligation is 41.81%, or \$6,242,542. As of September 30, 2019, the District had paid \$1,359,462 for principal, leaving a remaining liability of \$4,883,080. Inclusive of capitalized costs during the construction period of the reservoir, the net book value, net of amortization, of the District's water rights was \$6,594,208 at September 30, 2019.

During FY 2019, the contract was extended for an additional 50 years. Therefore, the District changed the amortization of its water rights over the new life of the contract, on a straight-line basis for 100 years.

## 8. EMPLOYEES' RETIREMENT PLANS

**Defined Contribution Plan** — A retirement plan is provided for all regular employees of the District and is administered by the ICMA Retirement Corporation. It is a single-employer defined contribution retirement plan created in accordance with Internal Revenue Code Section 401(a), which provides retirement benefits for all regular employees. The retirement plan is established by the District's Board, which may periodically amend the plan and its respective contributions. The District's employer contribution to the 401(a) plan is 10% of the employees' gross compensation.

Employees hired before October 1, 2000, become fully vested after five years of employment or upon attaining age 60, whichever occurs first, and are eligible to receive benefits upon retirement. Full vesting for employees hired after September 30, 2000, occurs at seven years of employment or upon reaching age 62, whichever occurs first.

During fiscal year 2019, the District contributed the required employer contribution of 10% of the employees' gross compensation. The District also contributed the required employees' contribution of 6.2% of the employees' gross compensation pursuant to the IRC Section 414(h)(2) Pick-Up Election under the Plan. Under the Pick-Up Election, any plan established by a governmental unit can have its employees tax defer the required employee contribution since the employer "picks-up" the required contribution from the employee and makes the payment to the Plan on behalf of the employee. The employer and employee contributions were \$901,615 and \$487,009 respectively, based on a covered payroll of \$7,854,994. Total payroll for the District was \$8,116,217.

The District makes contributions to the 401(a) plan by matching, dollar-for-dollar, employees' contributions to the deferred compensation plan, discussed below, up to 2% of each employee's gross income. The District contributed \$116,116 to the 401(a) plan as a result of employee contributions into the deferred compensation plan.

The market value of the balance in the District's forfeiture account at September 30, 2019 was \$12,334.

**Deferred Compensation Plan** — The District also offers its regular employees a deferred compensation plan created in accordance with Internal Revenue Code Section 457. The plan permits participants to defer a portion of their salary until future years. Any withdrawal requires a penalty, except upon termination, retirement, death or an unforeseeable emergency. The District does not make any contribution to the deferred compensation plan.

All amounts of compensation deferred under the plan are placed into a trust for the benefit of participants. The plan is administered by ICMA Retirement Corporation. These deferred amounts; all property and rights with those amounts, and all income attributable to those amounts are solely the property and rights of the employees. As such, these assets are not included in the financial statements of the District as of September 30, 2019.

## 9. CONTRIBUTIONS

The District recorded a total of \$15,377,375 in capital contributions in fiscal year 2019. The contributions received by the District were for the Riverbend and Doe Branch Plants of the Northeast Regional Water Reclamation System and the Regional Treated Water System.

The UTCT recorded a total of \$25,000 in contributions. The contributions were received from the District. The contributions were made to assist the financial position of the UTCT.

## 10. SEGMENT INFORMATION

The three condensed schedules on the next two pages represent a breakdown of the financial information of the three major segments of the District. The Water segment is composed of the Regional Treated Water System; the Water Reclamation segment is composed of the Lakeview System, the Northeast Water

Reclamation System and the Peninsula Water Reclamation Plant; the Non-Potable Segment is composed of the Non-Potable Water System.

Condensed Schedule of Net Position by Segment	September 30, 2019				
	Water	Water Reclamation			Non-Potable
		Lakeview	Riverbend/Doe Branch	Peninsula	
Assets:

## 11. RISK MANAGEMENT

The District is exposed to various risks of loss related to torts; workers' compensation; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. These risks are managed through the purchase of commercial insurance policies. Claims expenditures and liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. These losses include an estimate of claims that have been incurred but not reported. The District has a partially self-funded health care insurance program. This is subject to stop-loss of \$35,000 per year per covered person. The District had estimated partially self-funded health insurance liabilities as follows:

	Year ended 9/30/19	Year ended 9/30/18	Year ended 9/30/17
Unpaid claims, beginning of fiscal year	\$ 314,000	\$ 218,001	\$ 136,000
Incurred claims ( including IBNRs)	1,495,287	1,252,059	1,071,212
Claim payments	(1,332,287)	(1,156,060)	(989,211)
Unpaid claims, end of fiscal year	<u>\$ 477,000</u>	<u>\$ 314,000</u>	<u>\$ 218,001</u>

No significant reductions in insurance coverage have occurred. No settlements have exceeded coverage in the past three years.

## 12. COMMITMENTS AND CONTINGENCIES

The District frequently enters into contractual commitments for construction of water and wastewater facilities, pipelines and other related construction costs. Commitments for construction projects not completed at September 30, 2019, had a total contracted amount of \$43,264,130 of which \$36,683,504 has been spent. Funds to pay these obligations are provided by debt proceeds, internally generated capital (Non-Bond Reserve Funds) and from entities that participate in projects.

The District from time to time is the condemnor in eminent domain cases and is subject to other suits in the normal course of business, for which the ultimate cost is unknown. The exposure to the District in condemnation matters depends on testimony as to the value of the right taken. Management does not expect the potential exposure in these cases to be material, and has not recorded an accrual at September 30, 2019.

## 13. SUBSEQUENT EVENTS

The District issued \$18,640,000 in Revenue Bonds for the Regional Treated Water System during the month of November 2019. The interest rates for the Bonds were between 0.96% and 2.46%. The final repayment will occur during FY 2044.

The District also issued Refunding Bonds for the Regional Treated Water System during the month of November 2019. The Bonds had a par value of \$19,710,000. The interest rates for the Bonds were between 2.50% and 4.00%. The final maturity of the Bonds will occur during FY 2049.

Also in November 2019, the District received \$30,000,000 of Board Participation Funds from the Texas Water Development Board for the Regional Treated Water System. These funds have interest rates between 2.27% and 3.46%. The final repayment of these funds will occur in 2054.

#### 14. NEW ACCOUNTING PRONOUNCEMENTS

The Governmental Accounting Standards Board (GASB) has issued the following statements that are not yet effective:

In January 2017, the GASB issued Statement No. 84, *Fiduciary Activities*. This Statement is effective for the District beginning in fiscal year ending September 30, 2020.

In June 2017, the GASB issued Statement No. 87, *Leases*. This Statement is effective for the District beginning in fiscal year ending September 30, 2021.

In June 2018, the GASB issued Statement No. 89, *Accounting for Interest Cost Incurred before the End of a Construction Period*. This Statement is effective for the District beginning in fiscal year ending September 30, 2021.

In August 2018, the GASB issued Statement No. 90, *Majority Equity Interests-an amendment of GASB Statements No. 14 and No. 61*. This Statement is effective for the District beginning in fiscal year ending September 30, 2020.

In May 2019, the GASB issued Statement No. 91, *Conduit Debt Obligations*. This Statement is effective for the District beginning in fiscal year ending September 30, 2021.

In January 2020, the GASB issued Statement No. 92, *Omnibus 2020*. This Statement is effective for the District beginning in fiscal year ending September 30, 2020.

Management has not yet determined the impact of these statements on the basic financial statements.

# UPPER TRINITY REGIONAL WATER DISTRICT

## SERVICES AND RATES

YEAR ENDED SEPTEMBER 30, 2019

### 1. Services Provided by the District:

- |   |  |                                     |
|---|--|-------------------------------------|
| <input type="checkbox"/> Retail Water   | <input checked="" type="checkbox"/> Wholesale Water      | <input type="checkbox"/> Drainage   |
| <input type="checkbox"/> Retail Wastewater  | <input checked="" type="checkbox"/> Wholesale Wastewater | <input type="checkbox"/> Irrigation |
| <input type="checkbox"/> Parks/Recreation   | <input type="checkbox"/> Fire Protection                 | <input type="checkbox"/> Security   |
| <input type="checkbox"/> Solid Waste/Garbage  | <input type="checkbox"/> Flood Control                   | <input type="checkbox"/> Roads      |
| <input type="checkbox"/> Participates in joint venture, regional system and/or wastewater service (other than emergency interconnect) |  |                                     |
| <input checked="" type="checkbox"/> Other (specify): <u>Household Hazardous Waste Disposal, Non-Potable Water</u>                     |  |                                     |

### 2. Retail Rates Based on 5/8" Meter:

☒ Retail Rates Not Applicable

Most prevalent type of meter (if not a 5/8"):

	Minimum Charge	Minimum Usage	Flat Rate Y/N	Rate per 1000 Gallons Over Minimum	Usage Levels
WATER:	\$ _____	_____	_____	\$ _____	_____ to _____
				\$ _____	_____ to _____
WASTEWATER:	\$ _____	_____	_____	\$ _____	_____ to _____
				\$ _____	_____ to _____
SURCHARGE:	\$ _____	_____	_____	\$ _____	_____ to _____

District employs winter averaging for wastewater usage? Yes ☐ No ☐

Total water and wastewater charges per 10,000 gallons usage (including surcharges). \$ \_\_\_\_\_

### 3. Retail Service Providers: Number of retail water and/or wastewater\* connections within the District as of the fiscal year end. Provide actual numbers and single family equivalents (ESFC) as noted:

	Active Connections	Active ESFC	Inactive Connections (ESFC)**
Single Family	_____	_____	_____
Multi-Family	_____	_____	_____
Commercial	_____	_____	_____
Other - recreational centers government & VFD	_____	_____	_____
<b>TOTAL</b>	=====	=====	=====

\* Number of connections relates to water service, if provided. Otherwise, the number of wastewater connections should be provided.

\*\* "Inactive" means that water and wastewater connections were made, but service is not being provided.

4. **Total Water Consumption (In Thousands) During The Fiscal Year:**

Gallons pumped into system: 10,925,070

Gallons billed to customers: 10,418,958

5. **Standby Fees:** Does the District assess standby fees? Yes ☐ No ☒

For the most recent full fiscal year, FYE \_\_\_\_\_,

Debt Service:	Total levy	\$ _____
	Total Collected	\$ _____
	Percentage Collected	_____ %

Operation & Maintenance:	Total levy	\$ _____
	Total Collected	\$ _____
	Percentage Collected	_____ %

Have standby fees been levied in accordance with Water Code Section 49.231, thereby constituting a lien on property? Yes ☐ No ☐

6. **Anticipated sources of funds to be used for debt service payments in the district's following fiscal year:**

a.	Debt Service Tax Receipts	\$ _____
b.	Surplus Construction Funds	\$ _____
c.	Water and/or Wastewater Revenue	\$ <u>25,428,704</u>
		\$ _____
d.	Standby Fees	\$ _____
e.	Debt Service Fund Balance To Be Used	\$ _____
f.	Interest Revenues	\$ _____
g.	Other (Describe)	
	_____	\$ _____
	_____	\$ _____
	_____	\$ _____

**TOTAL ANTICIPATED FUNDS TO BE USED\*** \$25,428,704

\* This total should equal the district's total annual debt service for the fiscal year following the fiscal year reported or in the audited financial statements.

7. **Location of District:**

County(ies) in which district is located. Denton, Collin, Dallas

Is the District located entirely within one county? Yes ☐ No **X**

Is the District located within a city? Entirely ☐ Partly **X** Not at all ☐

City(ies) in which district is located. \_\_\_\_\_ \*See List of Board Members and Entity Represented

Is the District located within a city's extra territorial jurisdiction (ETJ)?  
Entirely ☐ Partly **X** Not at all ☐

ETJ's in which district is located. \_\_\_\_\_ \*See List of Board Members and Entity Represented

Is the general membership of the Board appointed by an office outside the district?  
Yes **X** No ☐

If Yes, by whom? Governing Body of Member Entities, plus Denton County Commissioners Court
