# Robust *blue* for hard candy

Spirulina concentrate\* specially  
developed for hard candy,  
FruitMax® Blue 1506 WS

\*Patent pending

**Recommended for:** sugar-based hard candy, sugar-free hard candy

# Robust *blue* for hard candy

Spirulina concentrate\* specially developed for hard candy, FruitMax® Blue 1506 WS has multiple benefits.

Heat resistant to prevent color degradation and spots

Suitable for sugar and sugar-free hard candy and lozenges

Natural alternative to Brilliant Blue / FD&C Blue1

## Versatile for boiled sweets

Various blue to greenish-blue hues can be obtained in boiled sweets depending on type of sugar used and the amount of acid applied.

## Improved heat resistance

Delivers even coloration despite high temperature. Standard spirulina formulations often start to degrade when production temperatures reach 110°C / 230°F, Color is often added at approx. 130°C / 266°F.

Sugar-free

**FruitMax® Blue 1506 WS**  
added at 130°C / 266°F

**Standard** liquid spirulina  
added at 130°C / 266°F

Sugar-based

## Well-suited for blends

This liquid formulation blends easily to match flavors like mint, herbal, as well as as fruity greens and dark berries.

FruitMax® Blue 1506 WS
