

**The next
generation**
of the Invisalign
clear aligner
system has
arrived.

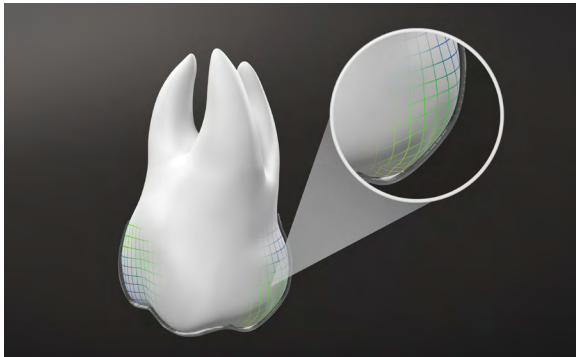

Introducing Invisalign® G8 with Smartforce® aligner activation.

Our proprietary clinical innovations help you efficiently deliver excellent clinical results for you and your patients. Now we're proud to introduce Invisalign G8 with SmartForce aligner activation to further improve predictability, so that you can be even more confident of delivering great clinical outcomes.

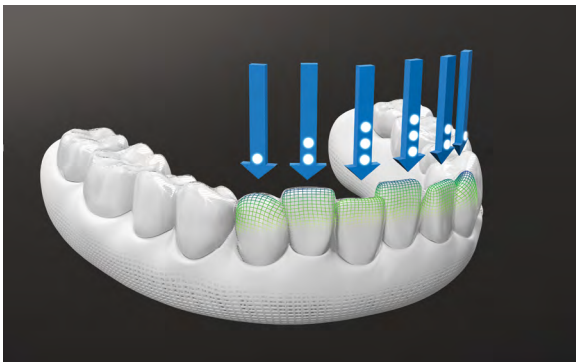

SmartForce® technology just got smarter.

- ▶ SmartForce aligner activation ensures areas on the aligner surfaces are contoured to apply forces to the tooth in the proper direction.

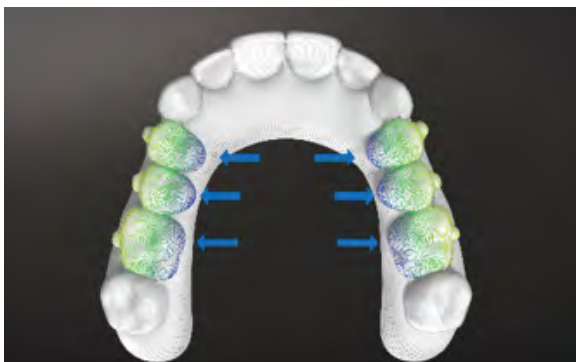

Throughout every stage of treatment, the location, direction, and intensity of the force work in harmony to create the optimal force system unique to your patient.

- ▶ Invisalign G8 improves predictability for the challenging clinical cases you encounter most frequently.

Deep bite correction:

- Improves clinical predictability of incisor intrusion in deep bite cases by up to 2x*
- Intrusion force levels are optimized for each tooth
- Automatic placement of precision bite ramps—clinically proven to improve lower incisor intrusion by up to 30%**

Posterior arch expansion in crowding and crossbite cases:

- Automatically programmed to apply and distribute the required force to each posterior tooth
- Designed to minimize unwanted molar tipping by automatically applying buccal root torque to the premolars and first molars

- ▶ **To learn more about Invisalign G8 with SmartForce aligner activation, talk to your Align representative.**

For professional dental use only – Rx only. In rare cases, allergic reactions can occur.
