

Little smiles deserve Invisalign First

invisalign® first

All the benefits of the Invisalign system are now available for your younger patients

The opportunity is clear

- With Invisalign First you can dramatically impact the treatment experience for younger patients, whilst providing a new way to grow your practice
- SmartTrack material when combined with SmartForce features and SmartStage technology allows more predictable tooth movement, which is unmatched by any other clear aligner system

SmartTrack Material

This highly attuned proprietary material is gentle, provides consistent force and high elasticity for a more precise fit

SmartForce Features

Generate precise forces to move teeth for simple or more complex treatments using the science behind 6 million smiles

SmartStage Sequencing

Advanced algorithms that generate the optimal path of tooth movements

Invisalign first treats a broad range of malocclusions

Invisalign First clear aligners can help treat:

- Arch development
- A-P correction
- Expansion
- Aesthetic alignment
- Spacing/Crowding
- Tooth protrusions or interferences

Additionally, improved and expanded eruption compensation makes it possible to treat patients in early to late mixed dentition. The use of Invisalign First requires that patients have erupted permanent first molars and at least any two incisors that are at least two-thirds erupted. Patients also must have at least two primary (C or D or E) or unerupted permanent teeth (3 or 4 or 5) per quadrant in at least three quadrants.'

360 Support

We offer dedicated support from a coordinated team of clinical, customer success and territory managers. Whether it's educational events or technical support that you need, we'll help you every step of the way with tailored activities designed to maximize your potential with Invisalign treatment in your practice
