OVERVIEW

The world-class Terminal 5 at Chicago O'Hare is the result of a \$26 million transformation completed in 2014 featuring an entirely new retail and dining lineup, redesigned TSA checkpoint, and cutting-edge design. Terminal 5 captures the spirit of Chicago by showcasing the city's vibrant neighborhoods, flavors, shops, art, and architecture.

Currently, URW is working with the Chicago Department of Aviation on a \$1.2 billion terminal expansion coming in 2023 that will add 350,000 square feet of terminal space and 10 gates along with upgraded infrastructure and new dining, retail, and service amenities. We look to continue to raise the bar and showcase Chicago's rich diversity and character in the expanded space, offering unique experiences tailor-made for the Delta Air Lines customer.
