Mode of Action	<ul style="list-style-type: none"> • PHOTOSYSTEM INHIBITORS
Crop Rotation REFER TO LABEL FOR DETAILS	<ul style="list-style-type: none"> • Corn: 4 months • Barley, Wheat, Peanuts: 8 months
Adjuvant Recommendation	<ul style="list-style-type: none"> • NIS • AMS
Rainfastness	<ul style="list-style-type: none"> • 6 hours
Water Volume (GPA) REFER TO LABEL FOR DETAILS	<ul style="list-style-type: none"> • Ground: 10 GPA - 40 GPA • Aerial: 2 GPA - 10 GPA • Banded: 1/4 to 1 gallon of spray mix per inch of band width regardless of row spacing
Application Tips	<ul style="list-style-type: none"> • Great tank mix partner with Dual for pre emergence applications in soybeans.

ALWAYS READ AND FOLLOW LABEL DIRECTIONS. It is a violation of federal and state/provincial law to use any pesticide product other than in accordance with its label. The distribution, sale and use of an unregistered pesticide is a violation of federal and/or state law and is strictly prohibited. We do not guarantee the accuracy of any information provided on this page or which is provided by us in any form. It is your responsibility to confirm prior to purchase and use that a product is labeled for your specific purposes, including, but not limited to, your target crop or pest and its compatibility with other products in a tank mix. This information should not be used as a replacement for consulting the applicable product label. Consult the label for the most complete and up-to-date information about any referenced product. Readers must have a valid applicator license to use restricted use pesticides. Please consult your state department of agriculture for complete rules and regulations on the use of restricted use pesticides, as some products require specific record-keeping requirements.

WILLOWOOD METRIBUZINE 75DF

Same active as *SENCOR®*

MIXING PROCEDURE

Mix Willowood Metribuzine 75DF as follows:

- Fill the spray tank $\frac{1}{4}$ to $\frac{1}{3}$ full with clean water. Add specified rate of Willowood Metribuzin 75DF while recirculating and with agitator running.
- Follow the triple rinse procedure described under "STORAGE AND DISPOSAL" to ensure that all product is removed from the container.
- Mix thoroughly and add clean water to fill spray tank to desired level.
- Add other herbicides to tank last. Mix thoroughly.
- Maintain agitation during application and until sprayer tank is empty.

CROP STAGING

- **Corn:**
 - Post Emergence: may be made to field corn after crop emergence until just before tasseling.
- **Soybeans:**
 - Pre-Emergence: application may be made up to 30 days before planting or pre emergence.
 - Burndown: can be used as part of a herbicide program for burndown of existing vegetation before crop emergence in conservation tillage systems.
- **Wheat:**
 - See label for state specific application timing.
