INSECTICIDE

WILLOWOOD ABAMECTIN 0.15LV

OVERVIEW

Willowood Abamectin 0.15LV is a low-volatility formulation of abamectin that provides the same efficacy as other abamectin brands while at the same time, reducing VOC emissions. Specifically designed for areas under geographical VOC regulations, Abamectin 0.15LV provides the control you need while reducing air emission concerns.

ALWAYS READ AND FOLLOW LABEL DIRECTIONS. It is a violation of federal and state/provincial law to use any pesticide product other than in accordance with its label. The distribution, sale and use of an unregistered pesticide is a violation of federal and/or state law and is strictly prohibited. We do not guarantee the accuracy of any information provided on this page or which is provided by us in any form. It is your responsibility to confirm prior to purchase and use that a product is labeled for your specific purposes, including, but not limited to, your target crop or pest and its compatibility with other products in a tank mix. This information should not be used as a replacement for consulting the applicable product label. Consult the label for the most complete and up-to-date information about any referenced product. Readers must have a valid applicator license to use restricted use pesticides. Please consult your state department of agriculture for complete rules and regulations on the use of restricted use pesticides, as some products require specific record-keeping requirements.
