

# TRIO AMMONIUM SULPHATE HERBICIDE ADJUVANT

## OVERVIEW

Trio Ammonium Sulphate is a spray grade herbicide adjuvant to be used with glyphosate-based herbicides to minimise antagonism when tank mixed with flowable herbicides and to improve performance under adverse environmental conditions

## KEY CROPS

Can be used on all broadacre and pasture land prior to seeding

## PACKAGING

- 25kg

## PRODUCT SPECIFICATIONS

### ACTIVE INGREDIENT

980 g/kg Ammonium Sulphate

### RATES

800 g/100 L of spray solution  
(See label for rates by situation)

### WEED SPECTRUM

Annual and Perennial Grasses and Broadleaf weeds

### APPLICATION TIMING

To be used in conjunction with pre & post emergent spraying

## Technical Use Guidelines

<b>Crop Rotation</b> Refer to label for rates	See Label
<b>Adjuvant Recommendation</b>	See Label
<b>Rainfastness</b>	See Label
<b>Water Volume</b> Refer to label for details	<ul style="list-style-type: none"><li>• Contingent on Glyphosate type usage</li></ul>
<b>Application Tips</b>	<ul style="list-style-type: none"><li>• Should only be used with non-selective herbicides as use with some selective herbicides may result in loss of selectivity and therefore crop damage.</li><li>• Is a completely soluble product. However in circumstances of high humidity this product may “cake” when exposed to the air.</li></ul>
