Mode of Action	<ul style="list-style-type: none"> • Mitochondrial complex III electron transport inhibitors
Method of Application	<ul style="list-style-type: none"> • Air, Ground, Chemigation
REI	<ul style="list-style-type: none"> • 12 hours
PHI (SEE LABEL FOR COMPLETE LIST)	<ul style="list-style-type: none"> • 1 - 14 days (<i>depends on crop</i>)
Water Volume (GPA) REFER TO LABEL FOR DETAILS	<ul style="list-style-type: none"> • Air: 10 GPA (minimum) • Ground: 50 GPA (minimum)
Rotational Crops	<ul style="list-style-type: none"> • Do not plant another crop within 30 days after last application due to chances of bifenazate residues showing up in rotational crops.

ALWAYS READ AND FOLLOW LABEL DIRECTIONS. It is a violation of federal and state/provincial law to use any pesticide product other than in accordance with its label. The distribution, sale and use of an unregistered pesticide is a violation of federal and/or state law and is strictly prohibited. We do not guarantee the accuracy of any information provided on this page or which is provided by us in any form. It is your responsibility to confirm prior to purchase and use that a product is labeled for your specific purposes, including, but not limited to, your target crop or pest and its compatibility with other products in a tank mix. This information should not be used as a replacement for consulting the applicable product label. Consult the label for the most complete and up-to-date information about any referenced product. Readers must have a valid applicator license to use restricted use pesticides. Please consult your state department of agriculture for complete rules and regulations on the use of restricted use pesticides, as some products require specific record-keeping requirements.
