# FARMERS FIRST™ ZINC EPC™

Soil-Applied Zinc Source (2-0-0)

## What Is Zinc EPC™?

Zinc EPC™ is a highly efficient, soil-applied zinc source designed specifically for use with Inhabit P™ (high-uptake phosphorus starter) for a more complete in-furrow nutrient package. Unlike traditional chelated zinc products, Zinc EPC is derived from an enhanced peptide chelation that contains more connection points with the zinc molecule resulting in increased stability, decreased tie-up of additional nutrients, and enhanced abiotic stress tolerance.

Benefits of Zinc EPC include:

- Reduction of zinc deficiency
- Enhanced root development
- Improved enzyme function
- Increased chlorophyll and hormone production
- Equal performance when used at a 1 Pt/A rate vs. 1 Qt/A of traditional chelated zinc,\* leading to a decrease in product required at an equal cost

## HOW IT WORKS

THE PEPTIDES (CHAIN OF GRAY, RED, BLUE, AND GREEN ELEMENTS) SURROUND AND "HOLD" THE MICRONUTRIENTS (YELLOW) UNTIL PLANT UPTAKE.

## How Do I Use Zinc EPC™ for Best Results?

- Recommended use rate of 1.0 Pt/A
- Apply in-furrow with Inhabit P™
- Mixing of Zinc EPC should come after Inhabit P has been diluted 10:1 with water
