

PRE-WORKSHOP ACCOUNT SETUP

Please complete the following steps ahead of your Ruminati Emissions Reporting workshop. For any questions or support, please email hello@ruminati.com.au.

1 A

VISIT THE LANDING PAGE

https://ruminati.com.au/landcare-collaboration

- Read the full contents of the page, including the offer from Landcare Australia.
- Download the relevant checklist and fill out the data before attending the workshop. You will use this on the day.

Welcome to Ruminati

Landcare Australia is excited to announce their partnership with Ruminati, a leading Australian ag-tech service provider dedicated to helping producers across Australia track and manage their emissions.

With reporting emissions and reduction strategies fast becoming the industry standard, Landcare Australia wants to give producers access to the most efficient emissions tracking tools on the market. Furninalit's streamlined platform aligns with the GAF tools and best practice, helping you stand out and get ahead of upcoming regulations and

As part of this collaboration, Landcare Australia is offering you 1 year of access to the Ruminati PRIME platform (valued at \$600 + GST\$) at no direct cost.

(B)

CHECK THE DATA SHARE REQUEST

- Before accepting the offer, read the data share request and download the data sharing guide.
- Accept the offer using the orange button at the bottom of the page.

Step 3: Read and agree to our data sharing guide

By taking advantage of this offer you're consenting to sharing summary data about your enterprise, emissions report results and reduction plans with Landcare Australia. By granting consent, you agree to Landcare Australia being provided with access to view these specific data points on the Ruminati platform and aggregate them with other data points to estimate their emissions profile. This consent does not provide Landcare Australia with the authority to share your information directly with any other parties (except in aggregated form) or attribute the information directly to your enterprise in communication with other parties.

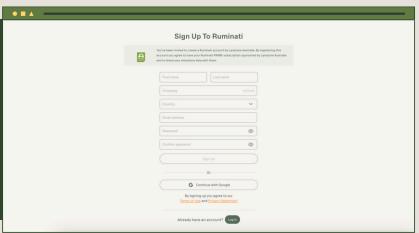

This summary data will enable Landcare Australia to better understand and estimate emissions levels and mitigation action across their supply chain. You will be provided with the option to revoke data sharing with Landcare Australia once the offer period has been completed (1 year).
