LIGHTING INSPIRATION OUTDOOR LIVING

OUTDOOR LIVING

DESIGNED TO SHINE

The way we light the outdoors has evolved tremendously in recent years, moving beyond basic functionality to become a key element in creating beautiful, versatile outdoor spaces.

DESIGNED FOR THE ELEMENTS

We provide a full range of outdoor lighting collections, including ones that can withstand a variety of weather conditions. These include fixtures crafted with UV-resistant composite, durable brass finishes that develop a rich, natural patina over time and Weather+™ ceiling fans that are built to withstand saltwater and harsh environmental conditions.

SAFE. SMART. SECURE.

Thoughtfully designed outdoor lighting creates safe, welcoming environments that guide guests along pathways while providing reliable security through smart, timer-controlled landscape fixtures. From elegant wall lights that frame doorways to sophisticated step lighting, every fixture serves dual purposes, while enhancing both safety and style.

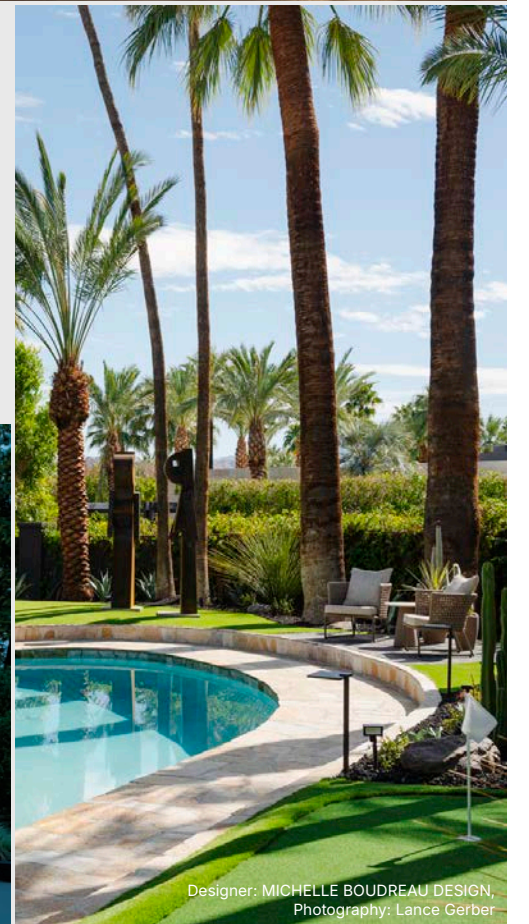

ENHANCE OUTDOOR BEAUTY

We know an entryway sets the tone for an entire home, and transforming it into a welcoming statement is surprisingly simple. The right lighting placement, perfectly scaled fixtures, and thoughtful styling can turn any ordinary entrance into an inviting gateway.

ENTERTAINING IN THE LIGHT

Every outdoor space, from expansive patios to intimate balconies, deserves the same thoughtful design attention as interior rooms. With the right lighting and styling approach, an outdoor living area becomes the perfect backdrop for any gathering.

HIGH-PERFORMING

OUTDOOR FIXTURES

Where a home is located shouldn't limit what you can use when it comes to outdoor lighting. That's why many of our outdoor fixtures come equipped to handle almost any weather Mother Nature can create while our DarkSky Approved fixtures direct light with intention of keeping nature safe and thriving.

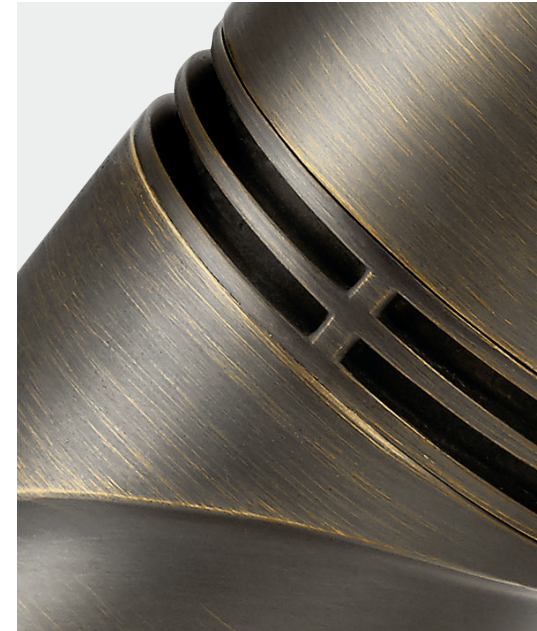

CLIMATES™

Our Climates fixtures are made of a weather-resistant composite material with UV protectant to create an anti-fading finish resistant to acidic and alkali elements, corrosion, rust and saltwater spray.

WEATHER+™

Our Weather+ ceiling fans are designed to withstand wet rated weather conditions while combating the effect of environmental factors like saltwater spray and UV rays.

TRIED AND TRUE FINISHES

From our Intertek Satellite Level 4-accredited lab testing, to simulating extreme weather conditions and verifying lumen and color specifications, we go the extra mile so the brilliance you see on day one lasts for years to come. Our landscape finish options, including Centennial Brass and Black Brass are a testament to this durability, quality and lasting beauty our fixtures deliver year-over-year.

DARKSKY APPROVED LIGHTING

DarkSky Approved lighting preserves night skies by reducing light pollution and protecting wildlife. Designed with downward-directed light or integrated shielding, these fixtures are ideal for coastal, rural, residential, and protected areas where DarkSky compliance is essential.

OUTDOOR LIGHTING STYLES

Just like interiors, a home's exterior is shaped by fixture finishes, silhouettes, and light output. Choosing pieces that complement the architecture ensures a cohesive, inviting look.

INCREASED

SAFETY & SECURITY

Creating a safe, welcoming environment is what good lighting is all about. Whether you're hosting friends or want peace of mind when away, the right outdoor lighting makes all the difference.

SAFETY

Beautiful outdoor lighting guides guests safely after dark. Path lights welcome visitors along walkways, stylish wall lights frame doorways, and step lights illuminate staircases.

SECURITY

Smart lighting, timers, and transformers provide reliable protection during the evening hours – ensuring walkways and pathways are illuminated and guests can travel safely to their destination.

ACHIEVING

CURB APPEAL

The entryway into a home can say so much about the homeowner and their style. Inviting people in with flair is simpler than it appears. A quick coat of paint, a few accessories and, of course, the right lighting can turn a mundane entryway into a welcoming statement. These on-trend ideas make it achievable.

DESIGN THAT MOVES BEYOND THE WALLS

Outdoor spaces should feel like extensions of the home—comfortable, welcoming and reflective of the homeowner's style. Additionally, outdoor and landscape lighting can create a sense of spaciousness, integrating the aesthetic appeal of the outdoors into the overall living environment, even when viewed from inside the home.

GRAND EXTERIOR ILLUMINATION

Oversized statement fixtures are not limited to the interior of the home. Large wall lights, outdoor ceiling fans, or pendants are all great options to elevate the style in your outdoor space and complement the increasing size of home exteriors.

SEAMLESS STYLE, INSIDE AND OUT

A home's style shouldn't be limited to the space within its walls. The décor outside the home can set the tone for the homeowner's style, even before guests set foot through the front door.

Front Door & Garage - Wall Lights

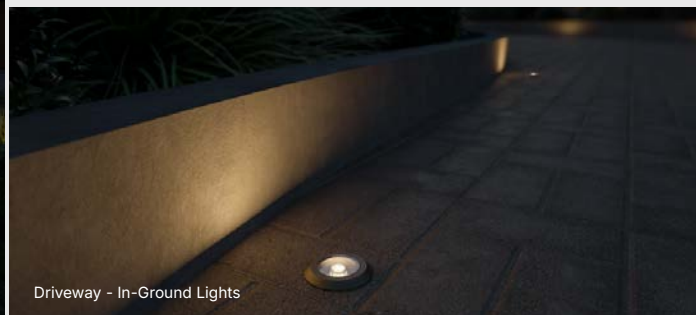

Front Porch - Ceiling Fans

Front Walkway - Path Lights

LIGHT LAYERING FOR IMPACT

Did you know you can use light layering outside to add depth and dimension, switch the mood in an instant and showcase aesthetics of your outdoor living space?

Driveway - In-Ground Lights

Optimal Lighting Experience

COORDINATING THE OUTDOORS

Our collections complement and elevate any style, allowing you to expand the beauty and security of the outdoors.

SPACES FOR

ENTERTAINING

Making a home ready for entertaining means blending the outdoors, indoors and everything in between. A home with a seamless flow is one where everyone will feel comfortable to mingle and relax.

NATURE'S DESIGN ILLUMINATED

It's easy to see why every outdoor space is an opportunity to show off style, celebrate the beauty of nature, work with the climate and add an element of security. Lighting is the shining beacon in the dark that lets an outdoor space become so much more than just the wild expanse of nature. It becomes an extension of a home. And a place homeowners will enjoy for years to come.
