Platform For Test

With over 15 years of test expertise and leadership, Sauce Labs stands as the leader of extensible, scalable and secure test infrastructure. Leverage our robust test environment, built to integrate seamlessly with your tools, workflows and development lifecycle. Plus, access first- and third-party applications for accelerated time-to-market, along with AI-driven data and insights to enhance observability.

Scalable Test Automation
Scale automated testing coverage across browseres and OS

- 800+ virtual browser and OS combination
- Scale testing with your framework of choice

Mobile App Testing
Deliver seamless mobile experiences

- 9000+ real devices available
- 1700+ emulators and simulators

Intelligent Debugging
Better debugging with intelligent insights

- ML-powered Failure Analysis
- Accelerate triage with root cause analysis

Visual Testing
Discover visual regressions using existing tests

- Component tests
- End-to-end visual regression testing

AI-Powered Insights
Unified intelligence platform

- Smart test result visualization
- Faster feedback loops

Crash & Error Reporting
Application error monitoring and crash reporting

- Cut resolution time up to 50%
- Proactive error detection

Sauce Labs Promise

verizon√

"Continuous Integration and Continuous Delivery are crucial for any product to provide customer value. Integrating Sauce Labs automated testing into the CI/CD pipeline accomplishes high product quality at every step."

Platform for Test

The Sauce Labs Platform for Test is an extensible, scalable and secure way to achieve continuous quality. Any team - regardless of their tech stack, target platforms, or frameworks, can leverage Sauce Labs' Platform for Test. Trusted by top enterprises and recognized as an IDC market leader.

Enterprise Ready

Founded by Selenium and Appium creators, we bring unmatched test expertise and top-notch customer support. Join the Sauce Community to get guidance from world class testing experts.

Comprehensive Coverage at Scale

With over 6 billion tests run, 1700+ emulators and simulators, support for 7500+ real devices, and 900+ browsers, we provide unrivaled scale and coverage. Run thousands of tests in parallel with your framework of choice.

Secure by Design

We ensure the highest security and data protection standards from our US HQ holdING certifications including SOC 3, SOC 2 type 2, ISO 27001, and ISO 27701 as well as GDPR, CCPA.

Intelligent Insights

AI-driven insights, customized reports, and failure analysis empower continuous improvement and intelligent debugging across the SDLC.

Highly Scalable

Achieve unprecedented test speeds with faster test execution with Sauce Orchestrate, along with a 10X speed boost through parallel testing.
