Trusted by the teams behind the world's most valuable digital experiences - **Microsoft, Bank of America, Walmart, and more**. Sauce Labs is built for scale, speed, and security, when others aren't.

As the creators of Selenium, Appium, and WebDriverIO, **we've powered over 8 billion tests** across mobile and web applications. Unlike fragmented tools and limited-scale solutions, Sauce Labs is the only comprehensive solution **built for enterprises to accelerate innovation** and improve quality at every stage of the SDLC.
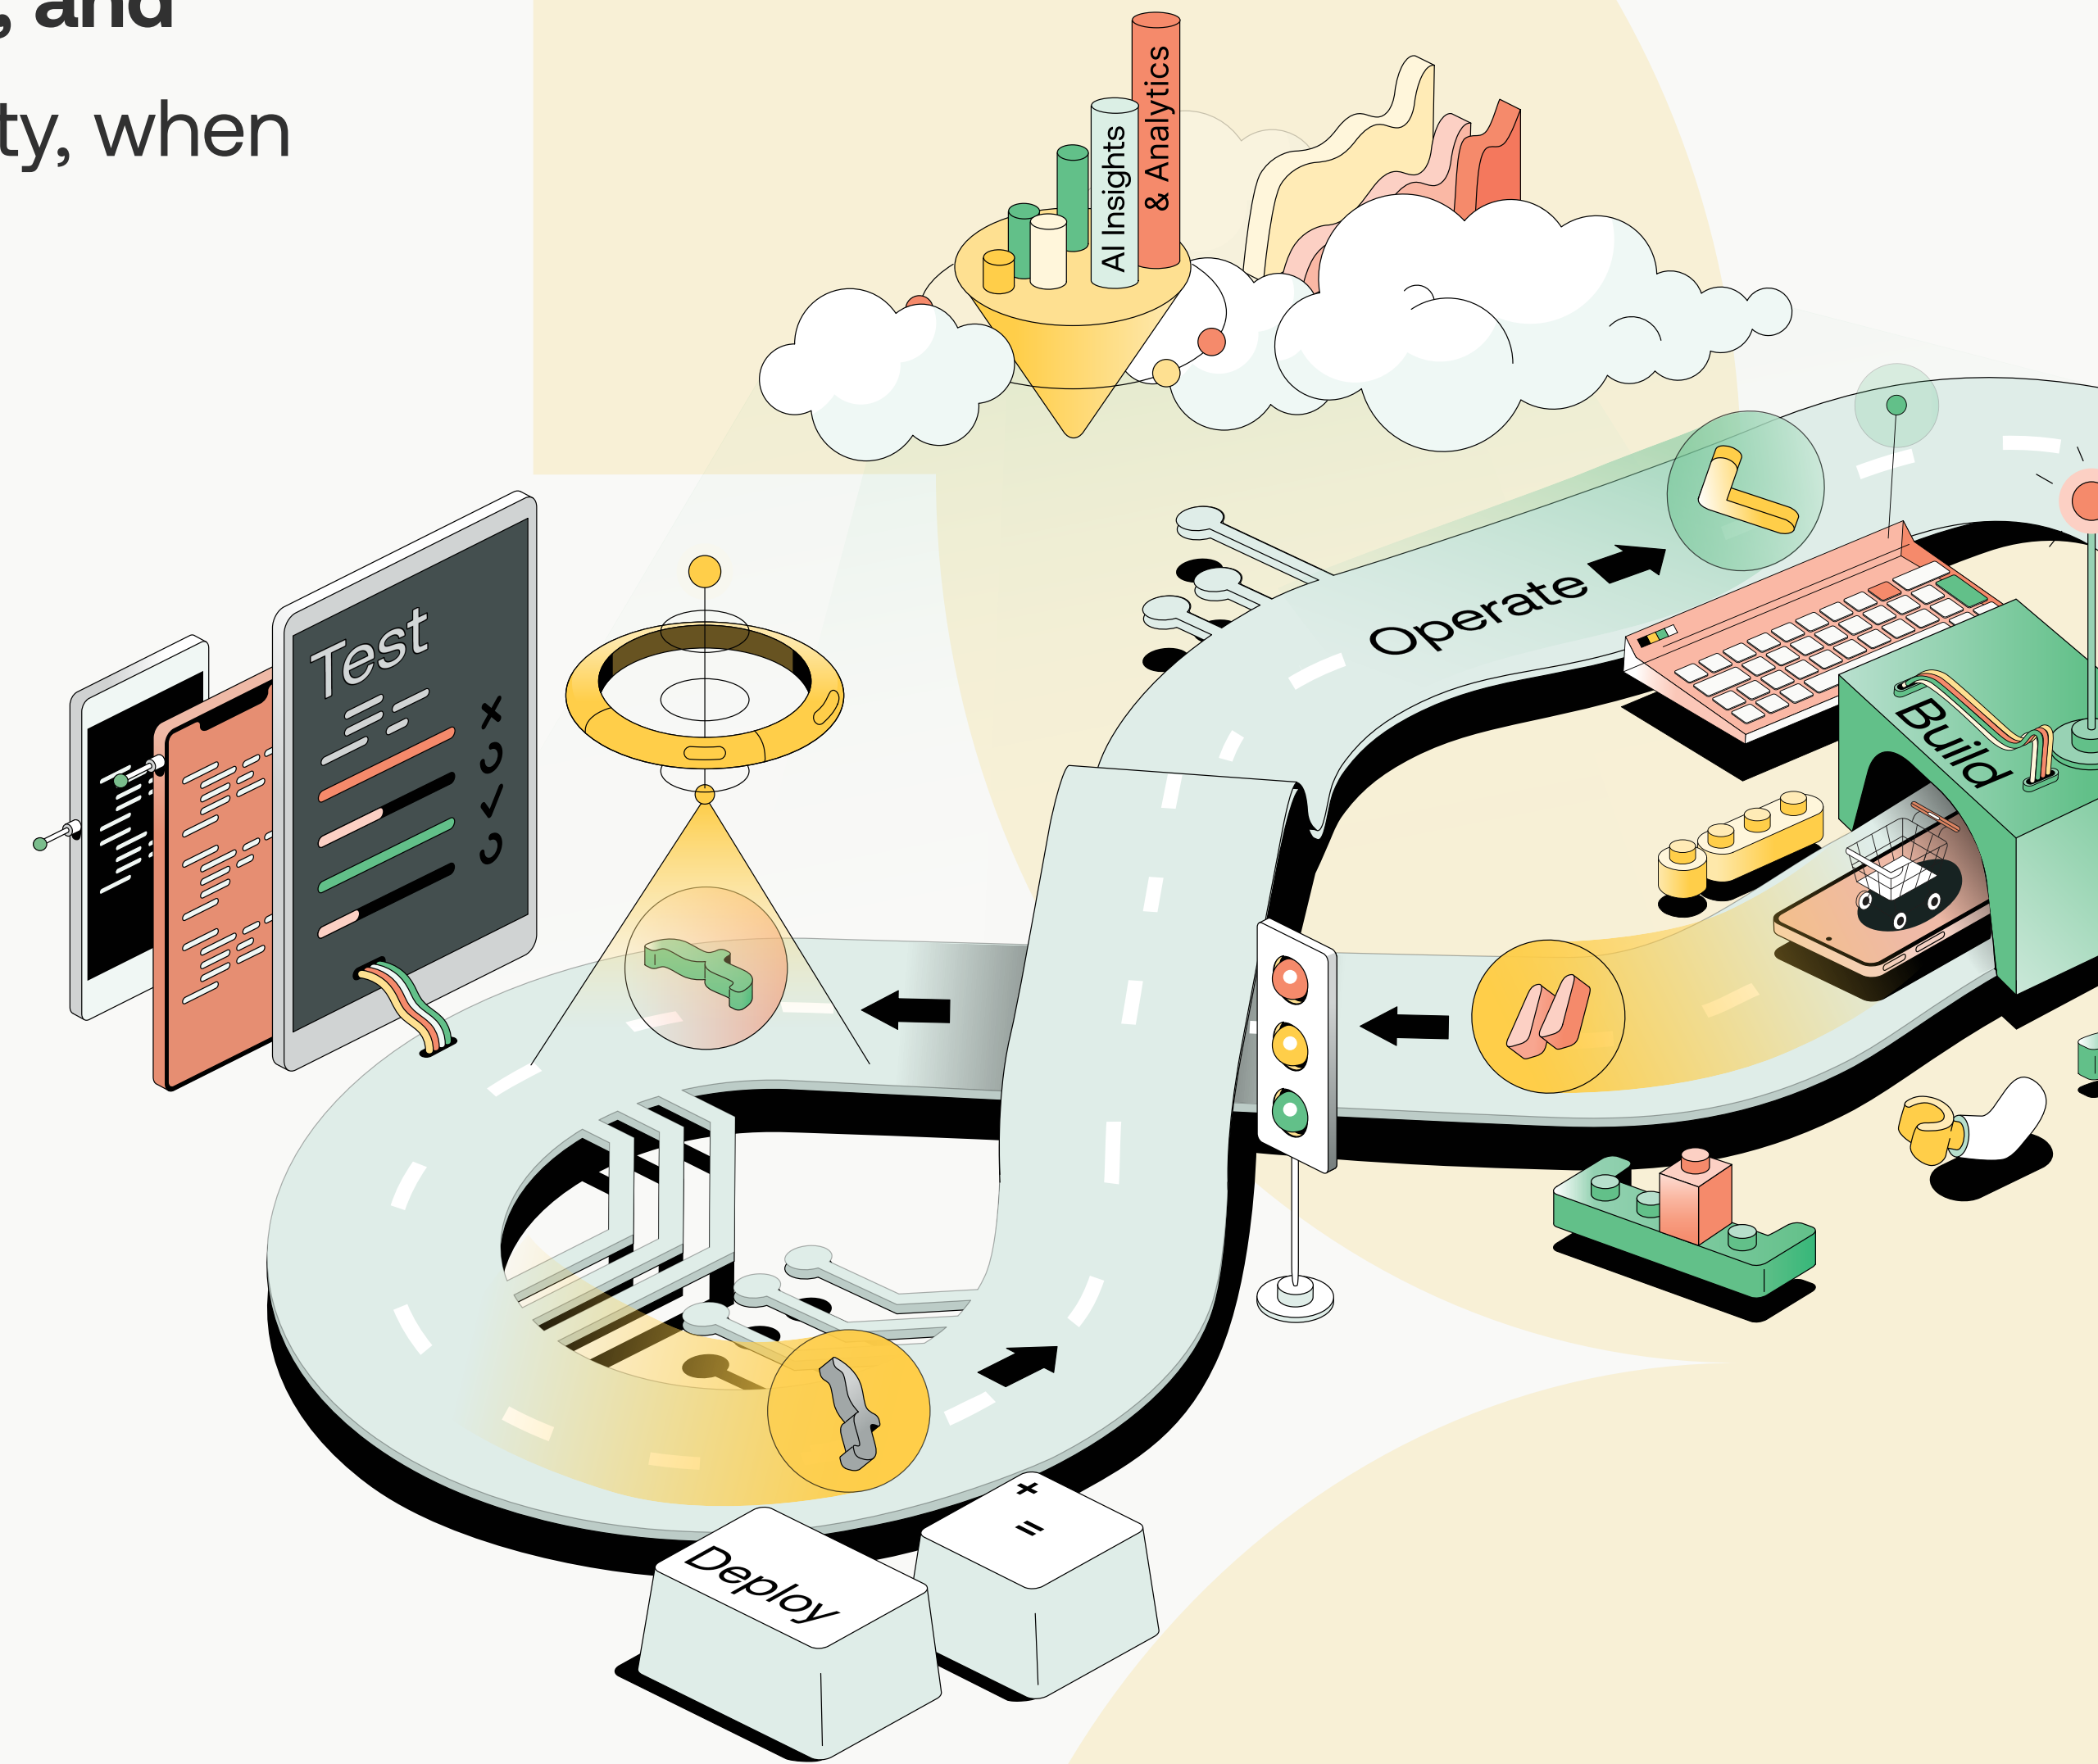

Proven at Scale.
Backed by Real Results.

eMoney

"Sauce Labs is the one-stop shop for all our software quality needs."

Walmart ⋆

"Sauce Labs has saved 750,000+ FTE hours with improved developer productivity and higher release confidence."

indeed

"Sauce Labs has helped us take a massively data-driven approach in our CI/CD... extending our test suite and doubling our unit test coverage."

FORRESTER®

Sauce Labs customers achieve:

217%

ROI with payback in less than 6 months
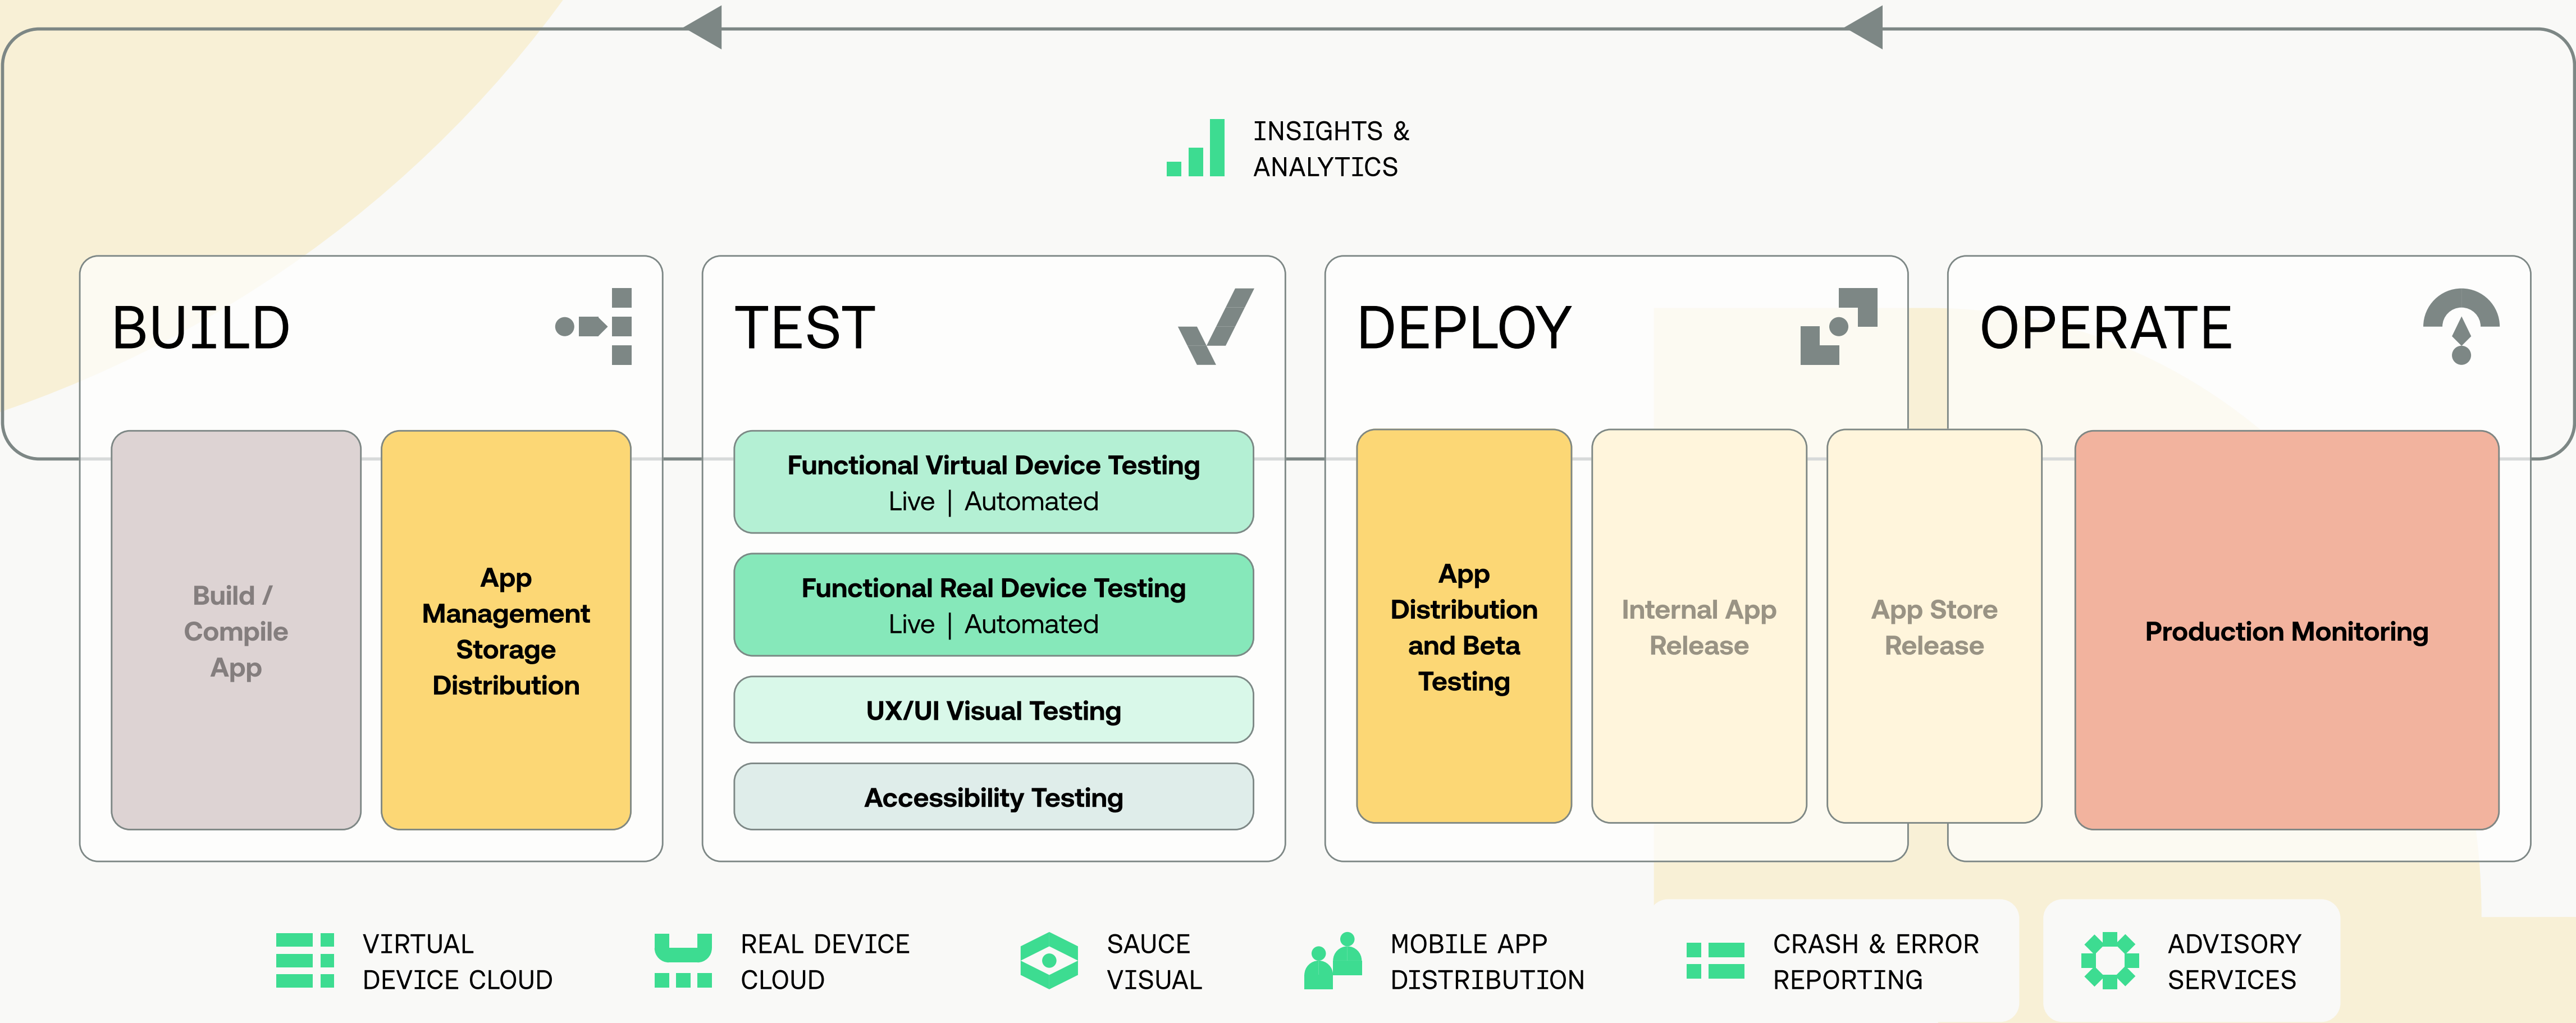

95%

reduction in software issues
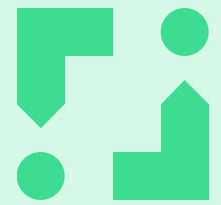

90%

faster test execution

Quality at Speed across the SDLC

Sauce Labs enables Continuous Quality across the entire SDLC - so teams can deliver faster, reduce risk, and turn quality into a strategic advantage.

Why Switch to Sauce Labs

Continuous Quality for Mobile and Web

Sauce Labs offers a unified platform built for enterprises that combines robust test infrastructure, visual testing, mobile app distribution, and error reporting. It's a complete solution to support quality across every stage of the software development lifecycle.

Industry Experts & Framework Founders

As pioneers in testing, Sauce Labs delivers unparalleled support and deep expertise. Our leadership in open source translates into enterprise-grade innovation and guidance whenever you need it.

Unrivaled Scale & Coverage

With over 8 billion tests executed, Sauce Labs delivers unmatched coverage across the broadest range of real devices (over 9000), browser/OS combinations (800+), and emulators & simulators (1700+). Leverage high-concurrency parallel testing and high-availability infrastructure to test faster and more reliably.

Enterprise-Ready Security & Compliance

We prioritize enterprise-grade security and compliance with industry-leading certifications and privacy standards, including SOC 2 Type II, GDPR, ISO 27001, ISO 27701, and KY3P. Features like secure proxy tunnels (Sauce Connect) and private device clouds protect your data and tests.
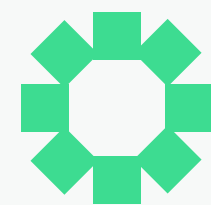

AI-Powered Insights

Transform billions of raw data points into actionable insights. AI-powered Insights delivers real-time analytics and visibility so teams can track performance, act quickly, and deliver quality apps faster than ever.
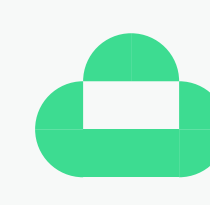

Virtual Device Testing & Performance

Speed up mobile testing with high-performance virtual device cloud. Our simulators and emulators are optimized for scale and speed - now including support for iOS 18+ on Apple Silicon. Start tests up to 65% faster and run them with 40% higher execution throughput, all while reducing infrastructure costs and developer wait time.
