

## CloudBees Platform

# Code is Customer Experience

Mission success relies on creating amazing user experiences that scale. Software delivery defines how those experiences are built and delivered, with quick, secure releases to adapt to ever-changing mission demands. Winning hinges on transforming smartly, using a DevSecOps approach from planning through deployment, with continuous alignment between the developers creating the code and the end users in the field.

CloudBees Platform gives you the ingredients for modern software delivery so you can:

**Create fast** with scalable repeatable workflows.

**Continuously improve** by progressively delivering features to enable feedback loops between the developers building the code and the customers using it.

**Command everything** with higher-order visibility, management, and intelligence across tools, teams, pipelines, and process.

... all at enterprise scale.

**21,000**

Engineering  
hours saved

**90%**

Less Jenkins  
maintenance

accenture

*"The early results helped us get buy-in from the stakeholders and showed them how much more CloudBees CI can do beyond what open source can provide. That's when the decision was made to create an enterprise standard within the IRS around CloudBees CI."*

IRS,  
**Amin Qazi**, Technical Advisor

# The Complete DevOps Platform

Designed for the world's most complex distributed applications in on-premise and multi-cloud environments, CloudBees empowers your software delivery teams to transform your business.

## How does CloudBees change my world?

### DEVELOPERS

#### More coding, less hassle

Stop rewriting scripts, fixing bugs, and waiting for builds. Serve yourself with fast, secure workflows, and feature management.

### IT OPS

#### Balance risk and innovation

Automatically enforce governance, security, and compliance without hindering flexibility. You're confident, and developers are happier.

### PRODUCT AND MISSION OWNERS

#### Empower the mission

Have confidence that your software factory is continuously advancing mission outcomes.
