

CloudBees' Platform for DevOps/DevSecOps enables development teams to automate capability development and the Risk Management Framework (RMF) Assessment and Authorization (A&A) processes for updating or creating applications for the warfighter.

Compliance, visibility, speed, and so much more

For leading organizations, the CloudBees Platform is how software delivery gets done.

Benefits

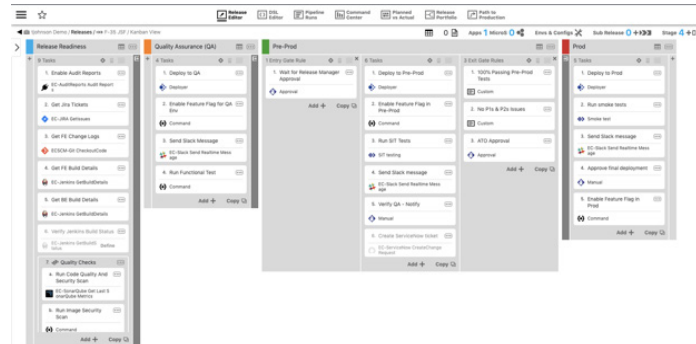

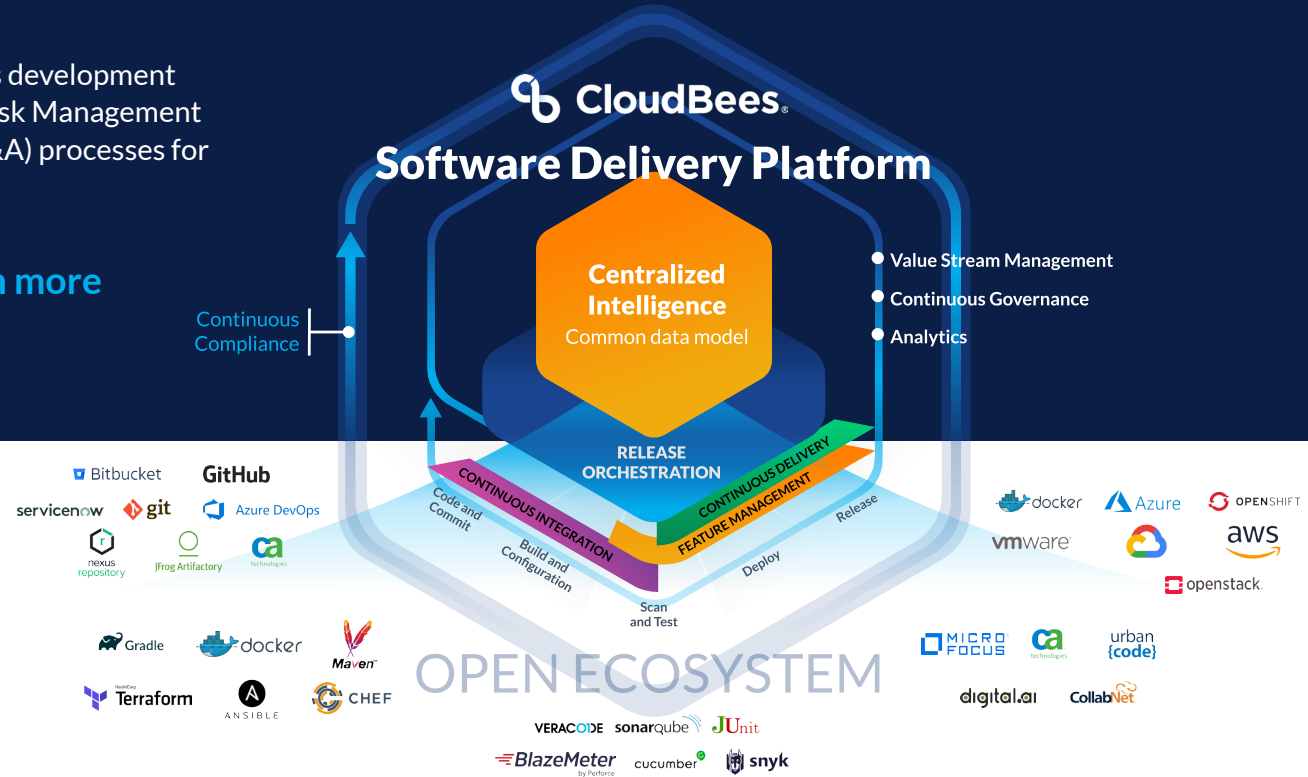

- Zero Trust DevSecOps
- Secure Software Supply Chain
- Built with Open Source
- Repeatable without being Prescriptive
- Enterprise Ready, Scalable
- Legacy and Cloud Native Support

Immediate Impact

- Engineering hours - 21k saved by the IRS
- Productivity increase - 10x at Autodesk
- Upgrade frequency - 1,100% achieved by Salesforce

The mission impact of this project on the Air Force and the Department of Defense will be to significantly reduce the time and cost to field new, secure software applications, generate SBOMs and validate the security of the software supply chain.

CloudBees Software Delivery Platform

Steps embedded within your CI/CD and release pipelines expedite approvals and ensure continuous authorization worthiness.
