

The Control and Context Plane for Modern DevSecOps

Today’s enterprise software delivery landscape runs on a patchwork of CI/CD systems, scanners, and deployment tools. Each adds value on its own, but together they create gaps in visibility, governance, and security. As AI accelerates development and automation, those gaps are widening, exposing organizations to risk faster than most teams can manage.

CloudBees Unify closes that gap.

CloudBees Unify is a DevSecOps control and context plane that sits above your existing stack, connecting every delivery system into a single governed layer of data, policy, and context.

Unlock the Value of Your Stack Starting Today

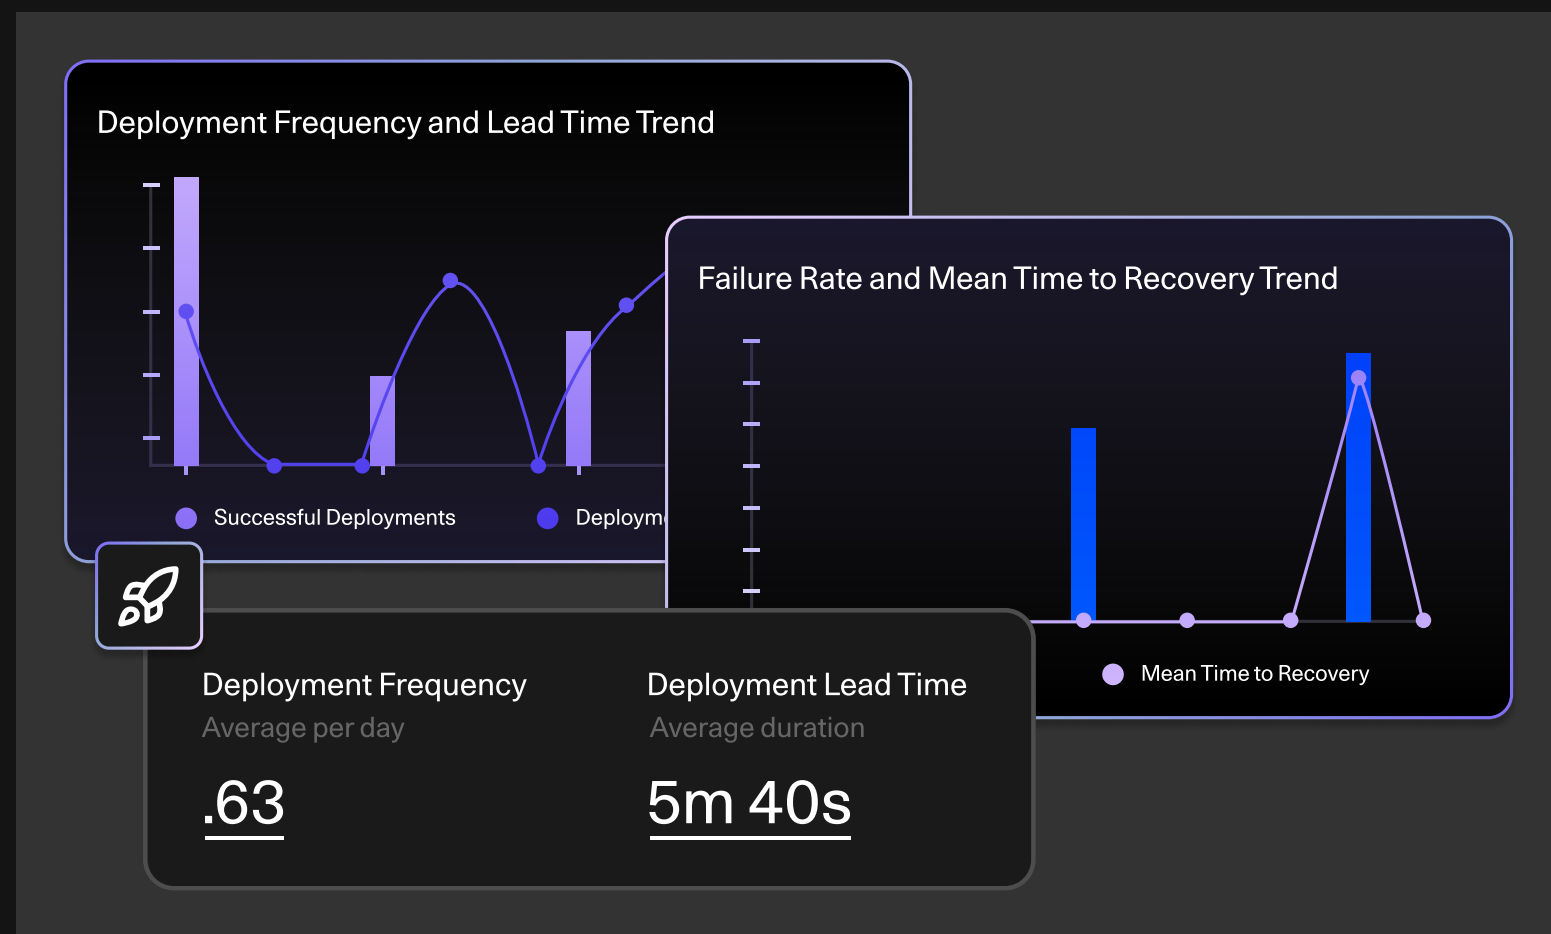

With Unify, engineering, platform, and security leaders gain unified visibility and control, while developers and agentic AI operate with consistent policies and trusted, real-time data across the entire software delivery lifecycle. And it all happens without replatforming, retraining, or replacing the tools your teams already love.

CloudBees gave us a way to unify governance across Jenkins and GitHub Actions without forcing our teams to change the way they work. It gave us visibility, consistency, and confidence at scale.

— Anan Siharath, Sr. Manager, Enterprise Applications, Synaptics

CloudBees Unify Capability that Create Unified, Governed Delivery

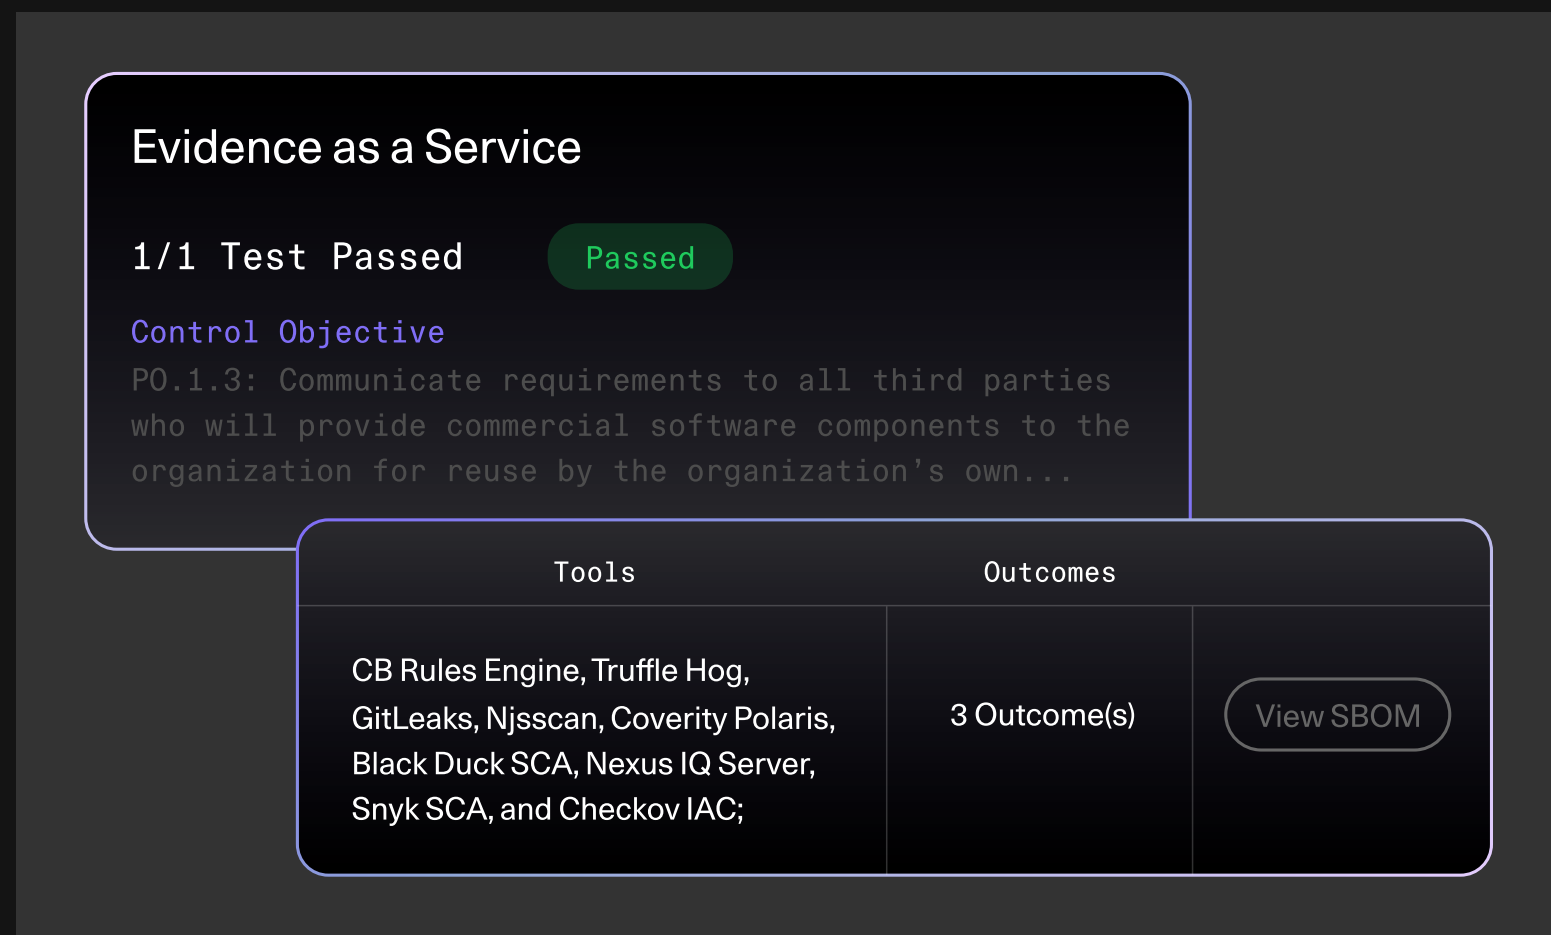

Gain unified visibility and control across delivery systems

Standards		
Activated (9)	Available (18)	
Name	Mandatory	# of Controls
CISA SSDF Standards - KS - v1.1	No	15 Controls
G-Generic-AWS Best in Practice in REGO (Prod)	No	7 Controls
K-FISCAM (Prod)	No	17 Controls
S2-NIST Secure Software Development Framework (SSDF)	No	41 Controls
S9 - FedRAMP Rev 4 V3	Yes	23 Controls

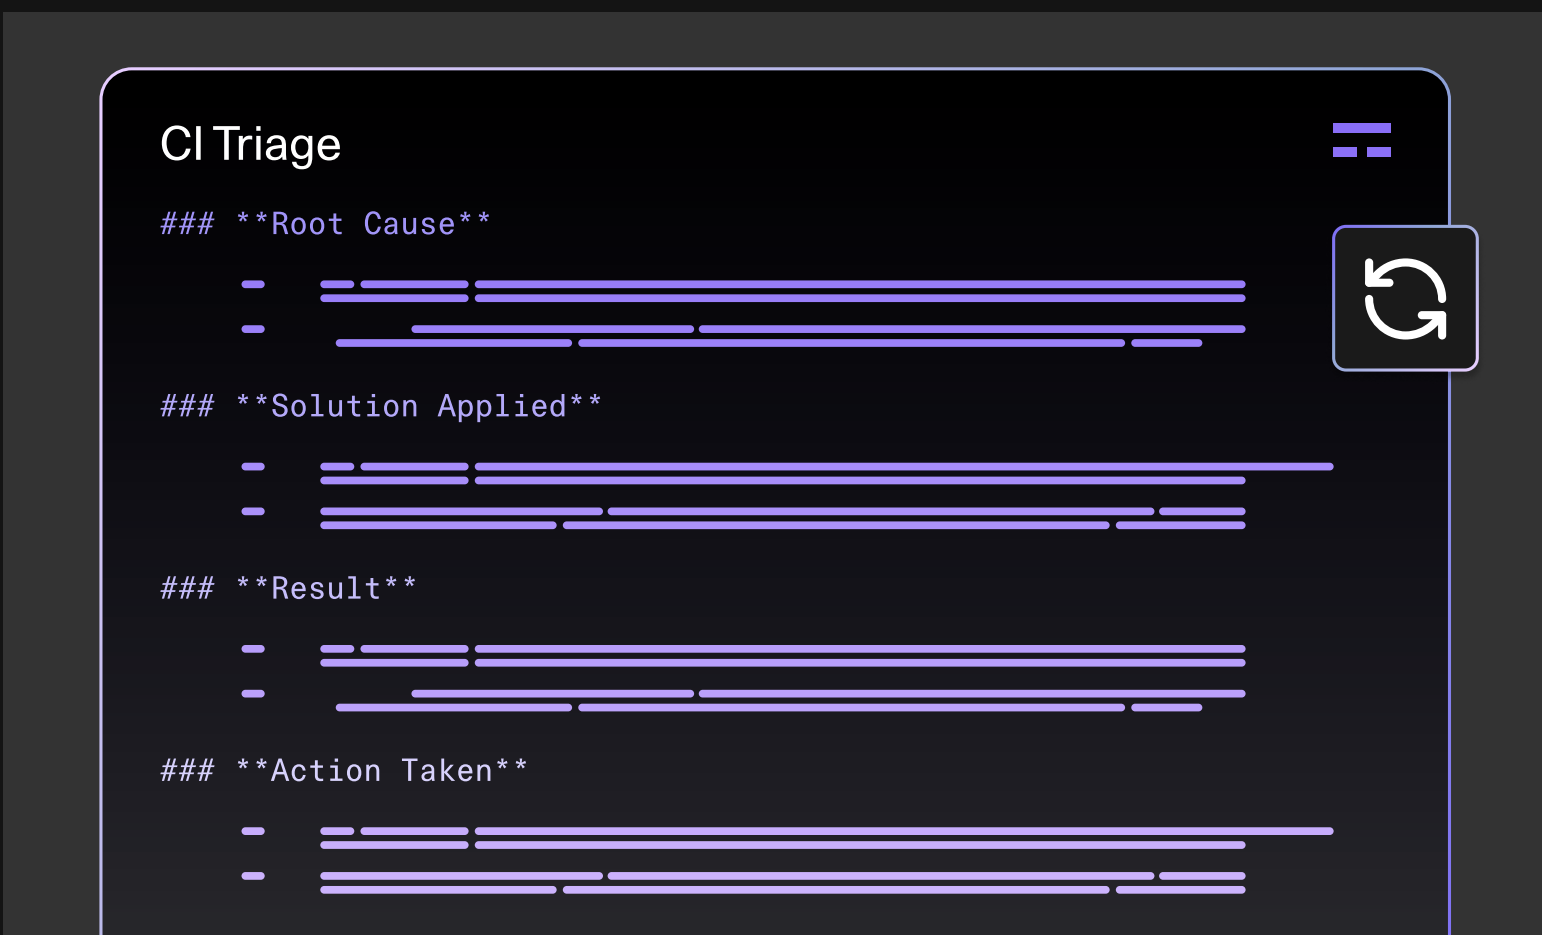

Govern and secure every workflow automatically

Multi-component-application-release.yaml			
Jobs	Test Results	Build Artifacts	Deployments
Environment	Artifact	Published By	Deployment Date
prod	App-APIs	CloudBees	2025/04/03 (07:22:21)
prod	App-Backend	CloudBees	2025/04/03 (07:22:19)
prod	App-Frontend	CloudBees	2025/04/03 (07:22:19)
pre-prod	App-APIs	CloudBees	2025/04/03 (07:22:12)
pre-prod	App-Backend	CloudBees	2025/04/03 (07:22:12)
pre-prod	App-Frontend	CloudBees	2025/04/03 (07:22:11)

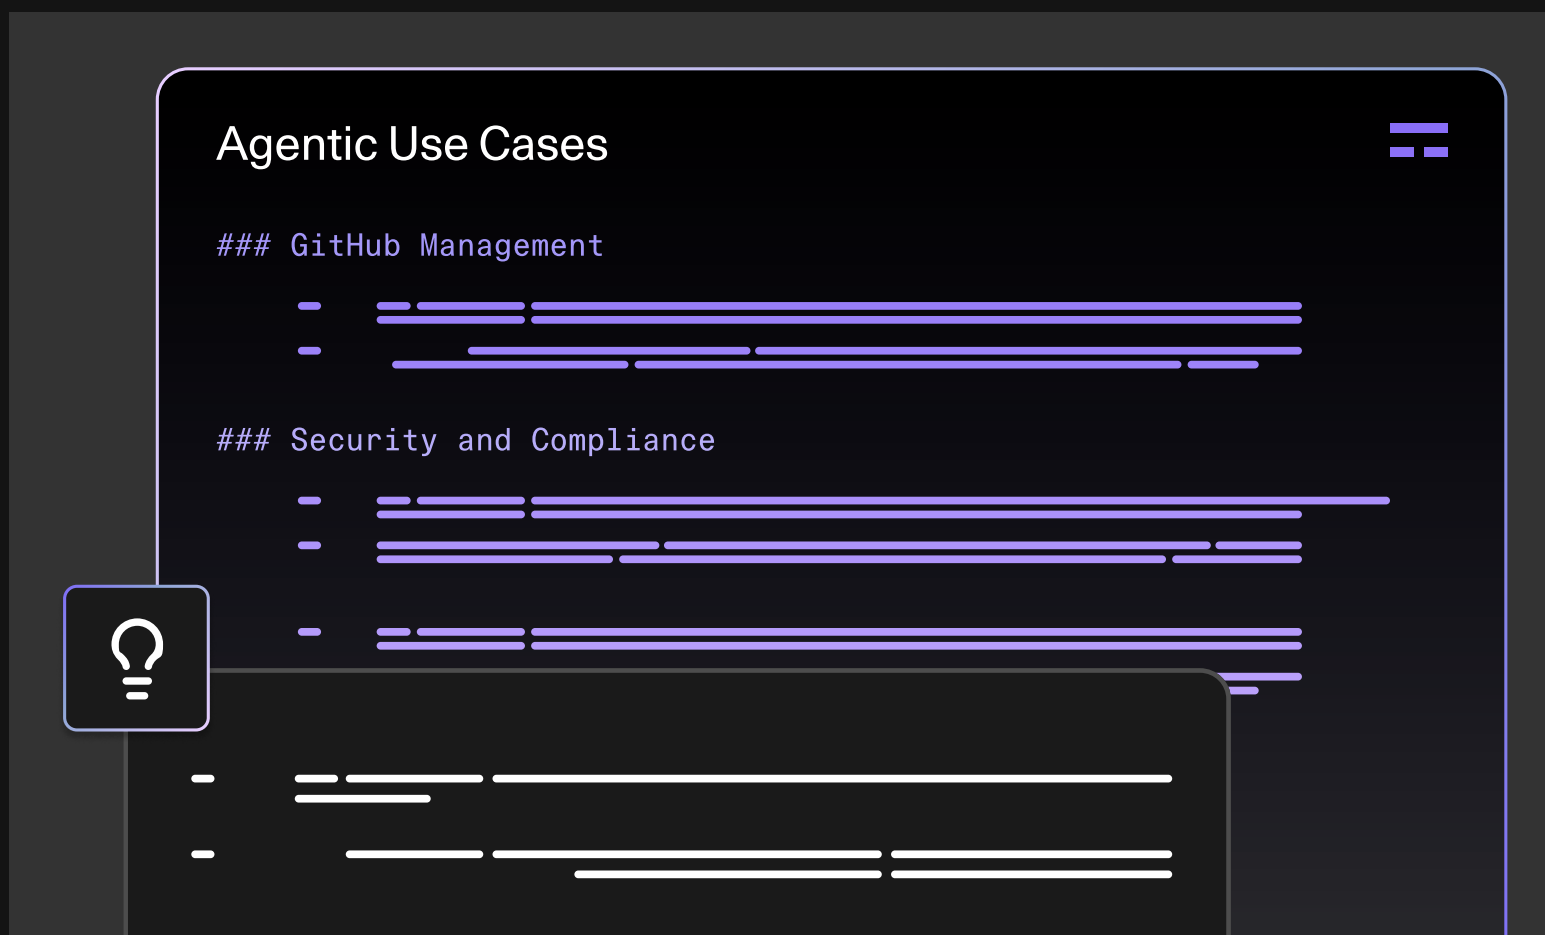

Connect best-of-breed tools without disruption

Reduce manual effort and operational overhead

Help developers move faster with built-in guardrails

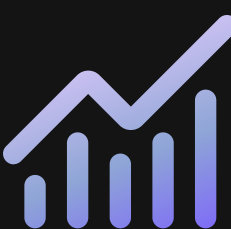

Use Agentic AI safely and effectively with trusted delivery context

Modernize Your DevSecOps, Without Starting Over

Accelerate delivery with connected pipelines, automated governance, and streamlined approvals across your existing toolchain.

Strengthen security through automatic continuous scanning and real-time evidence collection across every pipeline, application, and release - no matter where they are.

Use Agentic AI safely with trusted, contextual SDLC data, built-in governance, and human-in-the-loop oversight for every automated decision.

Evolve at your pace by modernizing gradually, no migrations, no downtime, and no disruption to current workflows.

Results start in weeks, not quarters.
Ready to bring AI intelligence and control to every part of your software delivery? Visit cloudbees.com/unify and book a demo.
