

About CloudBees

CloudBees is a leading DevOps solution for enterprises navigating the complexity of modernizing software development at scale. Built for global enterprises, CloudBees bridges the gap between legacy systems and emerging technologies, helping organizations innovate securely, intelligently, and on their own terms.

As the industry's most open and flexible DevOps solution, CloudBees integrates with any developer tool, allowing teams to build better, faster, and safer across any environment. CloudBees automates and optimizes software delivery at scale with continuous compliance and enterprise-grade governance built-in, accelerated with AI capabilities.

Founded in 2010, CloudBees is backed by Goldman Sachs, Morgan Stanley, Bridgepoint Capital, HSBC, Golub Capital, Delta-v Capital, Matrix Partners, and Lightspeed Venture Partners.
