

CloudBees Release Orchestration SaaS

CI Insights

Timely visibility into your CloudBees CI and Jenkins environments to provide great control over your software delivery goals.

End-to-End Pipeline Orchestration and Visibility

Unified platform to plan and execute your orchestrations using the tools you already have in one place.

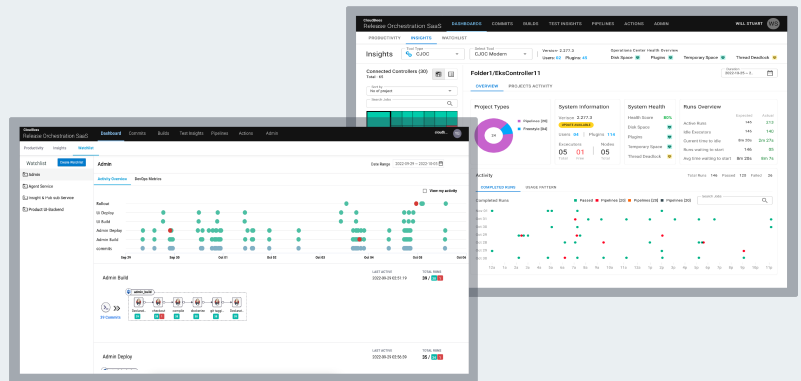

Value Stream Mangement

Connect software delivery to business outcomes by providing Flow and DORA metrics.

Key Features

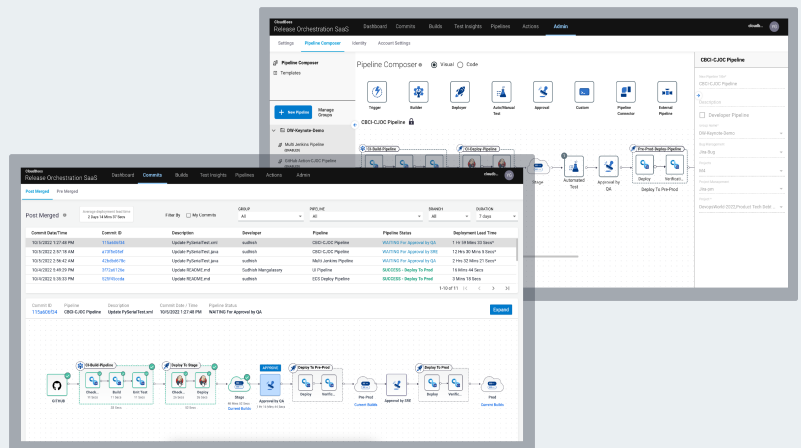

CloudBees CI Insights

The insights dashboard provides a consolidated view across controllers and jobs to help keep Jenkins Instances stable and clean.

End-to-End Pipeline Orchestration

Orchestrate end-to-end release pipelines to automate workflows between multiple tools with ease, with visibility from commit to production.

Value Stream Management

Measure the effectiveness of software delivery and their relation to business outcomes through DORA & Flow metrics.
