

PRODUCT INFORMATION

CSA Z614

With an arched, semi-circle footprint, the L16 Log Jam is our largest structure. Featuring two nets, seven ropes and a set of stainless steel bannister rails for sliding, hanging or climbing. It can handle a large number of users (30+) and is an intriguing and challenging structure for kids because of the number of log intersections, height changes and angles.

Maximum height: 4.3 m
 Fall height: 2.4 m
 Area of Safety Surfacing: 206 m²

The highest designated play surface and space required are according to CSA Z614. A buffer is included in the fall zone to account for fabrication and material variations.

Resilient safety surfacing is required within the fall zone of equipment.

If you have questions about the equipment or require changes, please contact Earthscape at 1-877-269-2972.
