

PRODUCT INFORMATION

ASTM F1487

The Spiderweb Post and Rope element is a higher challenge element because ropes are not in a straight line and spacing is not equal between the ropes. There are a variety of routes and ways to climb the Spiderweb playground piece. It is best used in combination with other Post and Rope elements or Log Jams in a natural playground.

Maximum height: 10'-0"
 Fall height: 9'-2"
 Area of Safety Surfacing: 335 ft²

The highest designated play surface and space required are according to ASTM F1487. A buffer is included in the fall zone to account for fabrication and material variations.

Resilient safety surfacing is required within the fall zone of equipment.

If you have questions about the equipment or require changes, please contact Earthscape at 1-877-269-2972.
