

## PRODUCT INFORMATION

CSA Z614

Log Tangle 2.3 has options for a steep climb up the climbing wall or a gradual lower-challenge option via the timber beam to the lower platform. This is a great natural playground structure that has kinetic parts for gross motor development and fine motor play. The timber playground equipment includes repelling/attracting magnetic beads.

Maximum height: 4.8 m  
 Maximum fall height: 2.8 m  
 Area of Safety Surfacing: 85.4 m<sup>2</sup>

The highest designated play surface and space required are according to CSA Z614. A buffer is included in the fall zone to account for fabrication and material variations.

Resilient safety surfacing is required within the fall zone of equipment.

If you have questions about the equipment or require changes, please contact Earthscape at 1-877-269-2972.
