

# How to administer Cheristin® for cats (spinetoram)

**Cheristin**  
for cats  
spinetoram

Cheristin® is only for use on cats and kittens 8 weeks of age and older that weigh 1.8 pounds or greater. Do not use more than a single dose on cats that weigh more than 20 pounds.

1

Hold the applicator tube upright and press cap down until it clicks, indicating the tube has been punctured, remove cap. Make sure there is an opening at the tip of the tube.

2

Part the hair on your cat's neck at the base of the head until skin is visible. Place the tip of the tube directly above the skin and squeeze 2-4 times to dispense the contents directly on the skin.

For best results, apply at the base of the head, not between shoulder blades. Avoid getting Cheristin® in your pet's eyes or mouth. Treatment at the base of the head will minimize the risk of your cat directly licking the product. Do not allow your cat to ingest Cheristin®. There may be a small amount of residual product remaining in the tube after a full dose is administered. Discard the applicator tube in the trash.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Always read, understand and follow the label, and use directions.
