

God's masterpiece

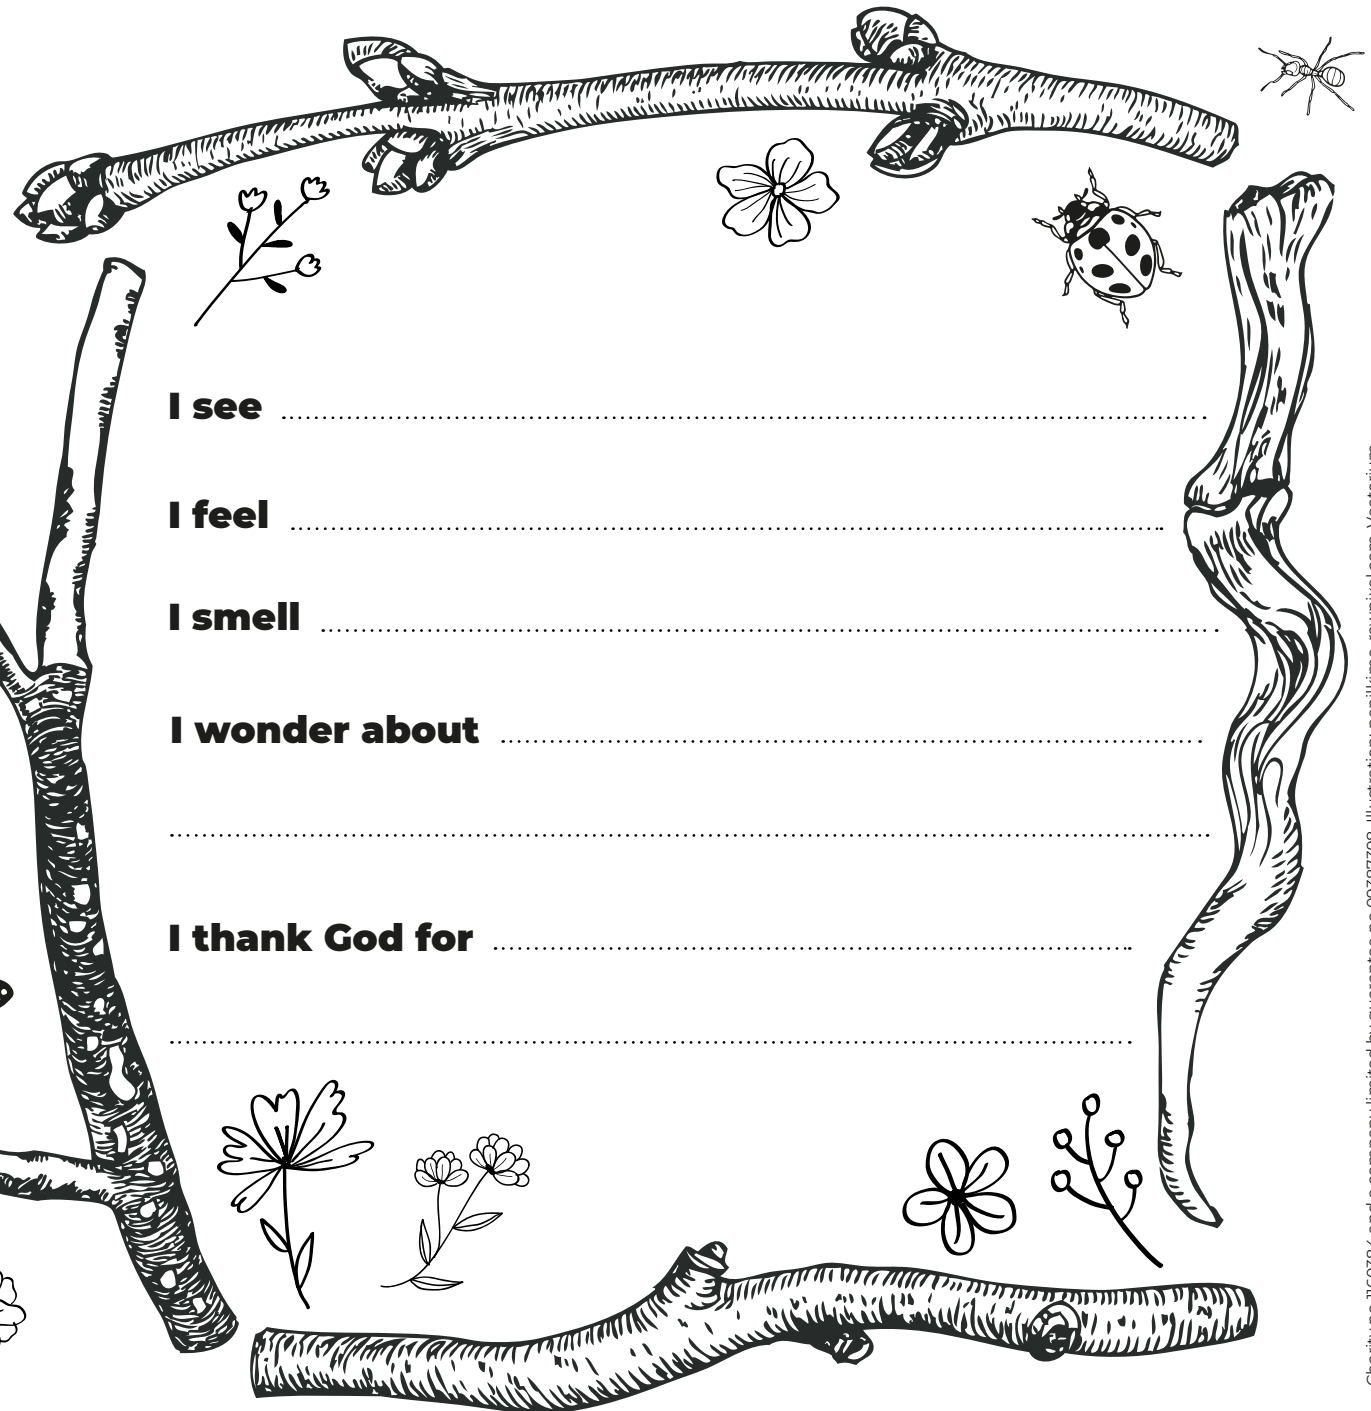

Make a frame out of four sticks or four strips of card.

Go for a walk as a family and when you are somewhere suitable, put the frame down onto the ground. How many different plants, flowers and insects can you see within the frame? Can you find out the names of any that you don't know? Try moving it to another location and see what you find in your frame there.

Each person may like to choose one small object to explore in more detail. Look at it, touch it, and wonder about it. Write down or discuss together some things you notice, by filling in the blanks.

Give thanks to God for the wonders of creation and pray that we may all be inspired to work together to protect the earth our common home. Use the prayer below or one of your own.

Generous God,
You delight in creation and so do we.
Thank you for all the wonderful works of your hands.
Help us to look after all that you have made.
Amen.

I see

I feel

I smell

I wonder about

.....

I thank God for

.....
