

TETHER INTERNATIONAL, S.A. DE C.V.

ASSURANCE REPORT ACCORDING TO ISAE 3000R ON
THE FINANCIALS FIGURES AND RESERVES REPORT

ASSURANCE REPORT ACCORDING TO ISAE 3000R ON THE FINANCIALS FIGURES AND RESERVES REPORT

To the Board of Directors of
TETHER INTERNATIONAL, S.A. de C.V.

We have been engaged by Tether Global Investments Fund SICAF SA to perform a reasonable assurance engagement on the Financials Figures and Reserves Report of Tether International, S.A. de C.V. (the “Company”) as at 30 September 2026, a copy of which has been attached to this report.

Board of Director’s Responsibility for the Financials Figures and Reserves Report

The Board of Director is responsible for the preparation of the Financials Figures and Reserves Report in compliance with the criteria, including Management’s Key Accounting Policies, set out in the Financials Figures and Reserves Report and for such internal control as Board of Directors determines is necessary to enable the preparation of the Financials Figures and Reserves Report that is free from material misstatement, whether due to fraud or error.

Practitioner’s Independence and quality control

We have complied with the independence and all other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

Our company applies *International Standard on Quality Management 1, Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements (ISQM1)* and, accordingly, maintains a system of quality control that includes directives and procedures concerning compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Practitioner’s responsibility

Our responsibility is to express our conclusion based on the procedures performed about the compliance of the Financials Figures and Reserves Report with the criteria, including Management’s Key Accounting Policies, set out therein.

We carried out our work in accordance with the criteria established in the International Standard on Assurance Engagements 3000 (Revised) ~ Assurance Engagements Other than Audits or Reviews of Historical Financial Information (“ISAE 3000 Revised”), issued by the International Auditing and Assurance Standards Board (IAASB) for reasonable assurance engagements. This standard requires that we plan and perform the engagement to obtain reasonable assurance whether the Financials Figures and Reserves Report is free from material misstatement.

The procedures performed on the Financials Figures and Reserves Report are based on our professional judgement and include inquiries, primarily of the company’s personnel responsible for the preparation of the information presented in the Financials Figures and Reserves Report, analysis of documents, recalculations and other procedures aimed to obtain evidence, as appropriate.

Specifically, we carried out the following procedures:

- obtain an understanding of internal control over the preparation of the subject matter information relevant to the engagement;
- perform enquiries with the management on the business operation of the last quarter, identifying material changes;
- compare financial data between the current Financials Figures and Reserves Report and the ones of the previous periods and discussion of possible significant differences;
- obtain confirmation letters directly from banks and depositaries and verify the reconciliations performed by management between the amounts in the accounting ledger/system and the bank statement to confirm the existence of the assets disclosed in the Financials Figures and Reserves Report;
- obtain reports from a specialized provider relating to inventory and quality testing, on sample basis, of precious metals and performing inventory procedures in order to confirm the existence of assets disclosed in the Financials Figures and Reserves Report;
- verify, for a significant sample, the correct valuation of the assets disclosed in the Financials Figures and Reserves Report in accordance with the criteria described in the Management's Key accounting policies;
- verify the reconciliations performed by management between the accounting ledger/system and the ledgers on the various blockchains relating to assets and liabilities as at 30 September 2026;
- verify, for a sample of outstanding secured loans, the existence of the collateral through the analysis of the contract and of the transactions;
- verify the correctness of the disclosures included in the Financials Figures and Reserves Report, excluding the Notes.

Conclusion

In our opinion, the Financials Figures and Reserves Report, as prepared by the Board of Directors of the Company as of 30 September 2026, is, in all material respects, fairly presented in accordance with the criteria, including Management's Key Accounting Policies, set out therein.

Emphasis of Matter

We draw attention to the following in the accompanying Financials Figures and Reserves Report:

- The reporting date is limited to a point in time as of 30 September 2026. We did not perform procedures or provide any assurance at any other date or time in this report.
- Management's Key Accounting Policies provide mainly the following:
 - financial investments are valued at fair value in line with IFRS 9;
 - investments in precious metals are valued at fair value;
 - intangible digital assets are valued at fair value;
 - secured loans are over collateralized and regularly monitored and are measured at amortised cost (notional value for short-term secured loans) and adjusted for any expected credit loss allowance ("ECL") in line with IFRS 9;
 - Tether tokens issued have been classified as refund liabilities in line with IFRS 9, which are repayable on demand, and are recorded at the contractual redemption value of the tokens;
 - other assets and other liabilities are valued at amortised cost (notional value for short-term assets and liabilities) less any expected credit losses.

- The Board of Directors has applied a going concern basis of accounting to value the Company's assets. The going concern assessment requires significant judgment with regards to the Company's liquidity, market and credit risks. We do not provide any assurance in respect of such assessment.
- The valuation of the assets of the Company is based on normal trading conditions and does not reflect unexpected and extraordinary market conditions, or the case of key custodians or counterparties experiencing substantial illiquidity, which may result in delayed realisable values. No provision for expected credit losses was identified by management at the reporting date.
- At the reporting date, Tether International, S.A. de C.V. is defendant in an ongoing civil litigation proceeding, for which the outcome cannot yet be reasonably and reliably estimated by the Board of Directors and its counsels and therefore no provision is recognised by management.
- The digital tokens issued by Tether International, S.A. de C.V. allow holders to transact and settle transactions in a rapid manner, which may be pseudonymous, and may be verified by the sender and the recipient. The digital asset industry is nascent and innovating rapidly. Accordingly, any users of digital assets, including those tokens issued by the Company, should first inform themselves of the general risks and uncertainties of the industry, including as to evolving legal and regulatory requirements. Users of Tether tokens should familiarize themselves with the risk disclosures, as they may be changed and updated from time to time.

Our opinion is not modified in respect of these matters.

Basis of Accounting

Without modifying our conclusion, we draw attention to the Management's Key Accounting Policies included in the Financials Figures and Reserves Report, which describe the basis of accounting. The Financials Figures and Reserves Report is prepared by the Board of Directors of Tether International, S.A. de C.V. for transparency purposes. As a result, the Financials Figures and Reserves Report may not be suitable for another purpose.

Scope limitations

Our opinion is limited solely to the Financials Figures and Reserves Report and the corresponding total assets and total liabilities as of 30 September 2026. Activity prior to and after this time and date was not considered when testing the balances and information described above. In addition, we have not performed any procedures or provided any level of assurance on the financial or non-financial activity on dates or times other than that noted within this report.

The Notes to the Financials Figures and Reserves Report are provided by the Board of Directors of the Company for additional information only, and this information has not been subject to the scope of our assurance engagement and, accordingly, we do not express an opinion or provide any assurance on it. Our responsibility is to read the other information in the Notes, and, in doing so, consider whether the other information is materially inconsistent with the Financials Figures and Reserves Report or our knowledge obtained in the course of the engagement, or otherwise appears to be materially misstated.

Financial Figures & Reserves Report

This report includes financial information for and in respect of **Tether International, S.A. de C.V. (ES)** (the “**Company**”). This report does not represent the financial statements of the Company but discloses financial information extracted from its accounting records.

The assets owned by the Company are considered to be reserves backing the fiat-denominated Tether tokens in circulation (the “**Reserves**”). The Reserves include all assets owned by the Company, including assets held in excess of those required to meet applicable regulatory reserve and liquidity requirements. Additional details are provided about the Reserves in the dedicated section below.

Key financial figures as of 30 September 2026 and its comparative as of 31 December 2025 at 11:59 PM UTC are:

FINANCIAL FIGURES	30 September 2026			31 December 2025		
<i>In US\$ Millions</i>	Total Assets	Total Liabilities	Equity	Total Assets	Total Liabilities	Equity¹
Tether International, S.A. de C.V. ²	191,451	(183,496)	7,955	193,458	(186,644)	6,814

The value of the assets composing the Reserves as of 30 September 2026, exceeds the value of the liabilities of the Company issuing fiat-denominated Tether tokens by US\$7,954,630,470.

CHANGE IN NET EQUITY	As of beginning of the period: 31 December 2025¹	During the period		As of end of the period: 30 September 2026
<i>In US\$ Millions</i>		Financial result	Net capital movements	
Tether International, S.A. de C.V.	6,814	1,660	(519)	7,955

¹ The Company's financial statements as at and for the year ended 31 December 2025 were audited and approved by the Shareholders' Meeting on 13 August 2026. Equity as at 31 December 2025 reported in those audited financial statements differs from the opening equity as at 1 January 2026 previously presented in the 2026 Financial Figures and Reserves Reports, principally reflecting the accounting policies and presentation applied in the audited financial statements, including the treatment of subsequent events and refinement of accounting policies. To ensure consistency with the audited financial statements, management has aligned the accounting policies applied in this report with those applied in the audited financial statements and has applied those policies during the period. The audited comparative figures as at 31 December 2025 and opening equity as at 1 January 2026 have been aligned accordingly.

² Figures are presented rounded; totals may not sum exactly due to rounding

Management's Key Accounting Policies:

- This report is prepared using the recognition and measurement principles of IFRS as issued by the IASB but does not contain sufficient information in terms of general presentation, required primary statements, and disclosures to comply with IFRS.
- Management has applied a going concern basis of accounting to value the Company's assets.
- Financial investments are valued at fair value in line with IFRS 9.
- Investments in precious metals are valued at fair value.
- Intangible digital assets are valued at fair value.
- Secured loans are over collateralized and regularly monitored and are measured at amortized cost (notional value for short-term secured loans) and adjusted for any expected credit loss allowance ("ECL") in line with IFRS 9.
- Tether tokens issued have been classified as refund liabilities in line with IFRS 9, which are repayable on demand, and are recorded at the contractual redemption value of the tokens.
- Other assets and other liabilities are valued at amortized cost (notional value for short-term assets and liabilities) less any ECL.
- The valuation of the assets of the Company is based on normal trading conditions and does not reflect unexpected and extraordinary market conditions, or the case of key custodians or counterparties experiencing substantial illiquidity, which may result in delayed realizable values. No provision for ECL was identified by management at the reporting date.

Fiat-denominated Tether tokens Reserves report

- *Reporting Date:* The reporting date is limited to a point in time as of 30 September 2026 at 11:59 PM UTC.
- The Reserves for Tether tokens in circulation amount to US\$ 191,451,091,374
- The liabilities of the Company amount to US\$ 183,496,460,904 of which US\$ 183,469,787,261 relates to digital tokens issued³.
- **The value of the assets composing the Reserves as of 30 September 2026 exceeds the value of the liabilities of the Company by US\$ 7,954,630,470**
- *Key accounting policies:* The policies disclosed above are applicable for the Reserves' reporting.
- *Outstanding Litigation:* At the date stated above, the Company is a defendant in one civil litigation proceeding, the outcome of which cannot yet be reasonably reliably estimated by Company's management and its counsel. No provision is recognized in the Financial Figures and Reserves Report. The case is in the courts of New York. It is a class action alleging a variety of claims relating to the drop in the price of bitcoin in 2017 and 2018.

³ The liabilities related to digital tokens issued comprises the amount related to the total digital tokens issued less digital tokens held by the Company but not in its treasury wallet. Digital tokens in the treasury wallet are authorized but not yet issued and are not considered liabilities. The total gross contractual redemption value related to all digital tokens issued is equal to US\$ 183,790,989,029. The amount related to digital tokens held by the Company but not in its treasury wallet is equal to US\$ 321,887,842. The digital tokens held by the Company do not form any part of the assets or liabilities of the Company.

¹² The "Public Equities" category comprises indirect gold, bitcoin, and other asset exposure, which are traded on active markets and are valued at their respective closing prices as published by Bloomberg on 30 September 2026.

¹³ The "Other Investments" category comprises other investments within the Reserves that do not meet any of the criteria set out in the other categories.

¹⁴ The "Secured Loans" category comprises loans over collateralized by assets, subject to margin call and liquidation mechanisms designed to maintain collateral coverage.

Other Information

- *Cash and Cash Equivalent and other short-term deposits:* At the reporting date, the value of US treasuries provided as collateral for the Overnight Reverse Repurchase Agreement activity, is as follows:

<i>In USD</i>	Fair value	Fair value of the US Treasuries Collateralizing the exposure¹⁵
Overnight Reverse Repurchase Agreement	9,518,706,336	9,509,369,481

- *Risks Associated with Digital Tokens:* The digital tokens issued by the Company allow holders to transact and settle transactions in a rapid manner, which may be pseudonymous, and may be verified by the sender and the recipient. The digital asset industry is nascent and innovating rapidly. Accordingly, any users of digital assets, including those tokens issued by the Company, should first inform themselves of the general risks and uncertainties of the industry, including as to evolving legal and regulatory requirements. Users of Tether tokens should familiarize themselves with the risk disclosures, as they may be changed and updated from time to time, available at the "Risk Disclosure Statement" tabs at <https://tether.to/legal/>.

Authorized and approved by the Board of Directors on 30 October 2026 and signed on behalf of the Board of Directors by Giancarlo Devasini, as Chairman of the Board of Directors:

Giancarlo Devasini

¹⁵ Overnight Reverse Repurchase agreements are marked to market every morning, with adjustment to collateral as needed. Any difference is due to intraday movements in collateral value.

Notes to the Financial Figures and Reserves Report

(no assurance provided by the independent auditor on these notes)

1. Responsibilities of Management:

Management is responsible for the preparation and fair presentation of this Financial Figures and Reserves Report, and for such internal control as management determines is necessary to enable its preparation free from material misstatement.

2. Background Information:

- 2.1. The Company is an El Salvador Sociedad Anónima de Capital Variable. The Company is registered as a Money Services Business with the Financial Crimes Enforcement Network of the U.S. Department of the Treasury. Following the Company's relocation to El Salvador, the Company reports to the Financial Investigation Unit of El Salvador pursuant to applicable law.
- 2.2. The Company is an authorized Stablecoin Issuer and Digital Assets Service Provider under the Digital Asset Issuance Law of El Salvador and is subject to the regulatory requirements specified by the National Commission of Digital Assets of El Salvador.
- 2.3. Tether tokens are stablecoin utility tokens that facilitate commercial transactions and activity in various marketplaces. As of the reporting date, Tether tokens are available on 13 discrete blockchains¹⁶, all as approved by the Company. The total number of authorized and issued tokens is made publicly available by the Company. All Tether tokens are backed by an equivalent amount of assets held in Reserves. The use of fiat-denominated Tether tokens is governed by Tether's terms of service, as they may be changed and updated from time to time, available at <https://tether.to/legal/>

¹⁶ Tether tokens are currently issued on the Ethereum, Tron, Ton, Liquid, Solana, Avalanche, Tezos, Near, Cosmos, Celo, Kaia, Aptos, and Polkadot Asset Hub blockchains. On 1 September 2025, the Company ceased to be obligated to accept redemption of all remaining USD₮ on the Kusama, Bitcoin Cash SLP, Omni layer (Bitcoin), EOS and Algorand blockchains. On 27 November 2025, the Company ceased to be obligated to accept redemption of all remaining EUR₮. On 20 February 2026, the Company announced that, effective 20 February 2027, it will no longer be obligated to accept redemptions of CNH₮.
