

Lancaster County Puberty Parenting Class Events

Byrnes Health Education is thrilled to announce the expansion of our community programs into Lancaster County, beginning in Spring 2020. Taking place at our satellite office in downtown Lancaster, these programs are health education events designed to create an open environment to learn about puberty and the natural changes that occur during adolescence. Subject matter includes stages of human development, hygiene, the major events of puberty, reproductive system basics and the menstrual cycle (*specific to the Girls & Moms program only*).
