

Blue Lagoon Environmental Policy

The dynamic, sustainable relationship between man and nature is the cornerstone of Blue Lagoon's philosophy and driven by our motto: a society without waste. From this phrase countless initiatives have been and will be set fostering both societal uplift and environmental balance encapsulated in the following categories.

Sustainable experience

We respect our natural resources by using them efficiently and by reducing waste in our production and service processes. Continuously seeking new ways to utilize the natural streams of geothermal energy, rather it be to enhance our customers experience or formulating new products. We honor the sanctity of our surroundings, inspiring our guests to do the same, by protecting Blue Lagoon's natural ecosystem and maintaining its balance and purity.

Carbon neutral experience

We collectively advance our awareness and knowledge of Blue Lagoon's unique environment and the impact we have on our surroundings. We offer our customers a carbon free experience, while travelling to and from Blue Lagoon and experiencing all its wonder. We offset all CO2 emissions and thus neutralizing the impact on climate change and leaving our customers with a truly sustainable service, product and experience. We continuously seek new ways to reduce our carbon footprint and make more sustainable choices.

Plastic free experience

We reduce our environmental footprint by recycling and minimizing waste. We aim to provide a plastic free experience to our customers when it comes to single use plastic. Providing reusable or environmentally friendly packaging and materials in all our products.

In all our endeavors we always fulfill all legal requirements and strive for continuous improvement.
