

Spirent Landslide 5GC Automation Package

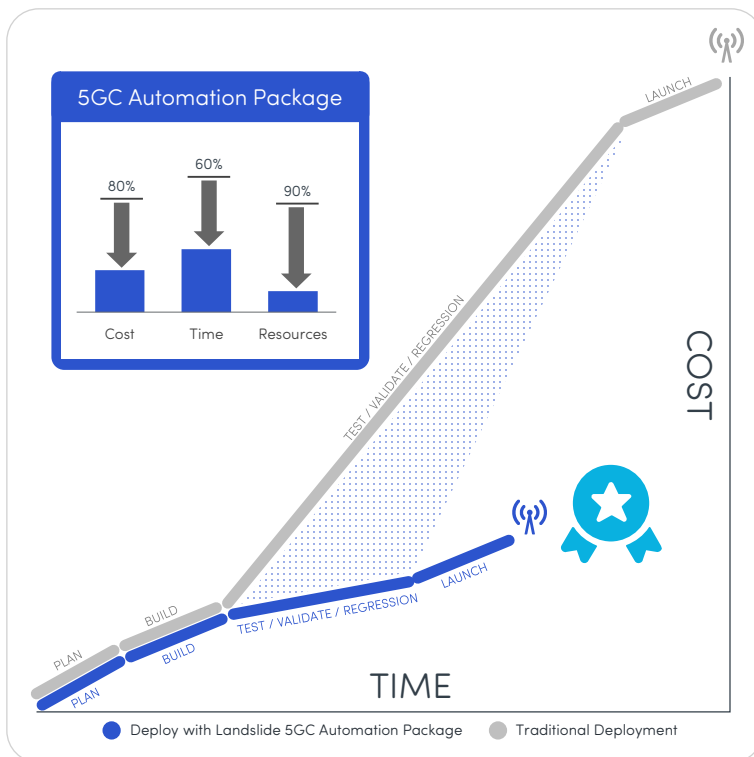

The race to 5G has begun.

To deliver on the promise of 5G, service providers need to work fast, but equally important, meet the high expectations of service quality. Validation of the increasingly complex landscape of new technology, multi-vendor environments, and new delivery models adds extreme pressure to the timeline and budget. Expectations for 5G are higher than ever, and a false start, or poor implementation will wreak havoc for organizations advertising a newly minted 5G network.

Jumpstart 5G core testing with the Landslide 5GC Automation Package

Leverage a library of managed test cases, developed by 5G experts, to save your organization valuable time and money in the race to 5G. Whether you need resources and expertise, require vendor agnostic validation, or are looking for a way to speed your 5G core deployments, the Landslide 5GC Automation Package will help you deliver on your 5G promise.

Get immediate access to 5G core test cases for compliance, capacity, and performance by pairing Spirent's industry-leading Landslide and Velocity automation capabilities into a turn-key solution, maintained over time as standards evolve and requirements change. Tailored service offerings ensure your implementation is executed quickly and achieves the outcomes your organization requires.

Benefits:

Save Time, Money & Resources

Accelerate time-to-market by 60%, while achieving 80% savings

Gain 5G Expertise

Leverage Spirent's 5G expertise, proven test methodologies, and years of experience in global 5G ecosystems

Ensure Vendor-Neutral Validation

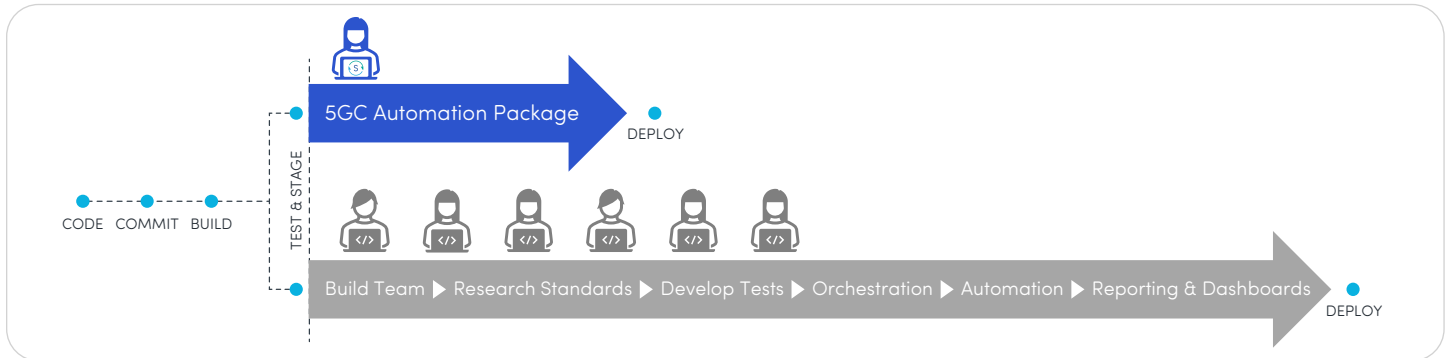

Test with confidence to assure 5G core accurately, without vendor bias

Over an 18-month period, customers can expect to save an average of \$2.7M in resourcing and test case development and management.

The Landslide 5G Automation Package includes:

- **Test Libraries** – hundreds of prebuilt compliance, capacity, and performance tests
- **Test Coverage** – nodal, adjacency and end-to-end testing of over 15 nodal functions including AMF, SMF, UPF, NRF, PCF, and AUSF
- **Automation** – performance goal seeking, PCAP analysis, DUT validation, customizable reports and dashboards.
- **Services** – available in standard and customizable packages

At Spirent we understand the challenges our customers face and the pressure to be faster, spend less, and reduce risk. Our products, solutions, and services drive operational excellence across the entire lifecycle, from lab environments to live operations, with industry-leading automation, coverage, and analytics capabilities.

About Spirent Communications

Spirent Communications (LSE: SPT) is a global leader with deep expertise and decades of experience in testing, assurance, analytics and security, serving developers, service providers, and enterprise networks. We help bring clarity to increasingly complex technological and business challenges. Spirent’s customers have made a promise to their customers to deliver superior performance. Spirent assures that those promises are fulfilled. For more information visit: www.spirent.com
