Installation and Onboarding

From Spirent PNT Testing Services

Get up and running fast with your Spirent equipment

Gain the full value of your investment in Spirent GNSS simulators and software from day one. Spirent Services provide a worry-free installation and onboarding service that's designed to help you:

Accelerate testing: by ensuring your Spirent equipment is fully integrated into your test environment and ready to use when you need it

Test with confidence: in the knowledge that your Spirent investment is correctly set up and configured, and meets the requirements of your test programme

Reduce test costs: by getting your team up and running fast with correctly configured Spirent hardware and software, reducing the time required for familiarisation

Spirent™

How it works

Spirent engineers will work at your premises to set up and configure your Spirent equipment, and provide customised integration with your existing third-party software and hardware. Pick and choose from our menu of installation and onboarding services:

- **Installation and configuration:** We deploy experienced Spirent engineers to your site to set up and configure your newly purchased Spirent test equipment and software

- **Hardware and software acceptance testing:** To provide assurance that your Spirent investments meet your requirements, we can conduct standard or bespoke acceptance test procedures (ATPs) either as a Factory Acceptance Test (FAT) at our UK facilities in Paignton, or as a Customer Acceptance Test (CAT) at your own site

- **Hardware and software integration:** If required, our engineers will integrate the Spirent hardware and software into your existing test environment to ensure it works as expected with hardware and software solutions from other vendors

- **Onsite training:** Leverage the full value of your Spirent investment from day one, by combining Installation and Onboarding with a Spirent training programme for your test team

- **Project management:** A highly experienced Spirent project manager will manage and oversee the implementation of a new test environment combining Spirent equipment with hardware and software from other vendors

Installation & Configuration
SW & HW Acceptance Testing
System Integration
Installation & Onboarding
Project Management
Onsite Training

We tailor our Services very closely to your individual needs, so if you require help with installing and onboarding Spirent equipment but don't see what you need in the menu above, please do contact us to discuss your specific needs.

Why Spirent PNT Testing Services?

Spirent has spent over 30 years at the forefront of PNT, working with the defence, space, and commercial industry sectors to evaluate and test PNT solution performance.

Our test engineers and consultants have many years of professional test experience, combined with in-depth knowledge of PNT testing hardware and software. We can help you get started faster and make full use of Spirent's expertise to assure every aspect of your product's PNT capabilities.

Contact us to discuss your PNT test programme today.
