

# Ultrawave™ XS NitiSonic Tip and Bottle Connector Kit

SAVE TIME, INCREASE EFFICIENCY

The common method of irrigation is syringe-based, which generates low fluid velocity with little interaction between the irrigant and canal walls.<sup>1-4</sup> The unique Ultrawave NiTiSonic tip is designed for continuous and intermittent passive ultrasonic irrigation, making the most important procedure in endodontics more efficient. The ultrasonic vibration of the tip allows the irrigation liquid to disrupt surface-adherent biofilms and to reach anatomic complexities within root canal systems.<sup>5</sup> The NiTiSonic tip is smooth and flexible, designed to navigate the curvatures of the root without removing dentin.

## The Ease of Efficiency

Don't waste time and materials by filling and refilling the tank on your piezoelectric device during your root canal treatments. The Ultrawave XS Bottle Connector allows you to connect Ultradent bottles directly to your Ultrawave XS device and use the irrigant immediately. Plus, you can easily complete the final flush with water, making sure your device is internally clean.

### Step-by-Step Instructions

1. Remove water tank.

2. Place the bottle cap on the bottle of desired irrigant.

3. Connect bottle cap to the connector base.

4. Press connector base onto your Ultrawave XS device.

5. Remove connector base by pulling on the bottle.

6. Twist off the connector base and bottle cap.
