Saturday November 12, 2022

9:00 a.m. – Noon Lecture

CHICAGO, IL | SHERATON SUITES | ROOM BLOCK AVAILABLE

Course Information

The Simplified Use of Diode Lasers in Restorative Dentistry

Diode lasers are the perfect adjunct to any restorative dental practice. Proper use of a diode laser requires understanding of the science and some basic tips to minimize the learning curve. Join us as we make you a laser expert in a day so that you can immediately incorporate diodes into your practice.

We will cover the following:

- The basics of laser science as it relates to clinical practice
- Direct restorative dentistry with adjunctive use of a diode laser
- Indirect restorative dentistry with adjunctive use of a diode laser
- The proper use of the diode laser in dental hygiene
- Photobiomodulation: Why would I want to do this in my practice?

DR. RON KAMINER

Dr. Ron Kaminer graduated in 1990 from SUNY at Buffalo School of Dental Medicine. He maintains two practices, one in Hewlett, NY and one in Oceanside, NY.

The Importance of Early Preventive Care

Poor oral hygiene contributes to decreased quality of life in both children and adults in the United States and worldwide. The Centers for Disease Control (CDC) reports that in the United States, tooth decay affects children more than any other infectious disease, and nearly one-third of adults have untreated tooth decay. While the prevalence of tooth decay poses a threat to the health of children and adults, tooth decay is preventable with good oral hygiene practices. Education, regular visits to the dentist, and healthy oral hygiene habits work together to prevent tooth decay and other oral diseases.

During this program practitioners will:

- Recognize the importance of early preventive care and common causes of dental disease
- Understand dental caries and prevention, along with proper sealant placement
- Discuss Coronal Polishing Techniques and the characteristics of disposable prophyl angles
- Learn how a bright smile not only presents a healthy impression but also increases one's interest in oral hygiene

SHANNON PACE-BRINKER

Shannon Pace-Brinker, CDA, is an international speaker, published author, and practicing dental assistant for over 30 years. She has published hundreds of articles in regards to Clinical Application and taught thousands of dental assistants across the U.S. and Canada.

Nationally Approved PACE Program Provider for FAGD/MAGD credit.
Approval does not imply acceptance by any regulatory authority or AGD endorsement.
4/1/2021 to 3/31/23.
Provider ID# 209016

ADA CERP

Continuing Education
Recognition Program

Ultradent Seminars is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Ultradent Seminars designates this activity for 10 continuing education credits.

A \$199.00 cancellation fee will be applied to any registration canceled five (5) business days or less prior to the meeting date.

Ultradent Products, Inc., is actively monitoring Coronavirus Disease (COVID-19) in regions across the U.S. where Ultradent Seminars are taking place. Ultradent is following guidance from local health departments and the Centers for Disease Control and Prevention (CDC) regarding large gatherings.

At this time, our upcoming Ultradent Seminar will take place as planned. However, if you are sick or feeling you are getting sick, we ask that you please stay home. Masks are mandatory at all events and some hotels will require temperature checks of attendees. Social distancing of attendees will be followed according to the local guidance.
