

No light needed

Opalescence Boost in-office whitening is chemically activated, so it doesn't require a light or laser to whiten smiles. It safely provides excellent whitening results in about an hour.

- Water-based gel prevents shade relapse and dehydration
- Two to three 20-minute applications
- Syringe-to-syringe mixing ensures maximum strength
- Distinct red color aids proper placement and ensures complete removal
- 40% hydrogen peroxide
- Contains PF (potassium nitrate and fluoride)
- No refrigeration required for storage*

Before

After

Opalescence Boost in-office whitening delivers visible results in two to three 20-minute applications. Its convenient syringe-to-syringe chemical activation process ensures maximum strength and saves patients from the discomfort of lights or lasers.¹
