Opalescence

Tooth Whitening

Professional whitening to go

Get more confidence in your smile

Your smile says more about you than any other physical feature.
It's the first thing people notice. Wouldn't it be great to have
a simple, affordable method for whitening your smile that's
convenient enough to take with you anywhere?

Introducing Opalescence Go whitening, the easiest, fastest, and
most convenient way to brighten your smile. Opalescence Go
whitening gives you professional results in the convenience of
pre-loaded disposable trays, so it is ready to go when you are.

Instructions

Instructions

1. Before using, allow product to warm to room temperature. This will make it easier for the tray to adhere to the teeth. Remove from package.

2. Center tray on arch.

3. Gently suck down on the tray. Do not press tray against teeth as it pushes the whitening gel against the gums, causing tissue irritation.

4. Remove outer tray.

5. Suck down.

6. Wear Opalescence Go whitening 10% for 30–60 minutes, and Opalescence Go whitening 15% for 15–20 minutes per day. When finished, remove whitening tray and brush teeth.

10% | 30–60

15% | 15–20

For professional use only

Precautions

1. If you have any questions regarding the appropriate use of this product, including how long it will take to whiten your teeth, please consult your dentist.
2. Regular dental checkups and cleanings are important before and after whitening to maintain a healthy smile.
3. Some patients experience sensitivity with whitening. Should this occur, stop treatment and contact your dentist.
4. Some patients have noticed temporary discomfort of the gums, lips, throat, or tongue. Should any of these symptoms persist more than two days or progressively worsen, call your dentist. These side effects will usually subside within 1–3 days after treatment is discontinued.
5. Pregnant or breastfeeding women, or patients with serious health concerns, should not whiten. Consult your primary care provider prior to treatment.
6. If you have a known allergy or chemical sensitivity to any of the ingredients in Opalescence whitening, do not use. Mint or Melon flavor can be irritating to some patients. If you have a known sensitivity to flavorings, please use the non-flavored Opalescence™ PF whitening.
7. Do not use household bleach to whiten teeth.
8. Do not use tobacco or eat while whitening trays are in place.
9. Teeth are naturally darker along the gum line. These areas may require more time to lighten than the rest of the tooth surface and usually remain slightly darker.
10. White spots that appear on the enamel during the whitening process may blend with continued whitening.
11. Crowns, bridges, partial dentures, veneers, and composite fillings will not whiten.
12. Coffee, tobacco, and other products can re-stain your teeth over time. Should this occur, teeth can be re-whitened.
13. Some amalgam fillings may leave a dark purple color in your whitening tray; this is normal.
14. Check expiration date and store according to instructions.
15. Avoid swallowing large amounts of gel or water used to rinse gel residue from the teeth.
16. Avoid contact with eyes.
17. Do not reuse to avoid cross contamination.

Do not re-use to avoid cross contamination

Keep away from heat/sunlight

Refrigerate
