

Jiffy™ spin

SHAPING AND FINISHING DISKS

RAPID AND EFFICIENT SHAPING AND FINISHING TO ACHIEVE HIGHLY ESTHETIC RESTORATIONS

The Jiffy™ Spin shaping and finishing disk system is a high-quality solution to shape and finish restorations, at a smart price, rapidly and efficiently. Clinicians love the finished results of any set in the Jiffy™ product line; but if you'd like a faster polish in your repertoire, this is the one to pick out of the lineup.

Key Benefits:

- Ultra-thin disks are perfect for interproximal finishing and shaping. Every component of the Jiffy system will assist clinicians in providing the esthetic restoration patients want.
- Aluminum oxide coated disks range from coarse to fine for smoothing and polishing, PLUS something only the Jiffy Spin shaping and finishing disks can offer: diamond grit for rapid shaping and gross removal! You'll be zipping through those restorations in no time.
- Suitable for use on composite and ceramic materials
- This new addition to the Jiffy™ family of products will be sure to bring the pristine finish patients love. Call your Ultradent Sales Representative today for a set, or shop at ultradent.com.
