THE CLEAR APPROACH TO HEMOSTASIS

- SPECIALLY DESIGNED for the esthetic zone
- LEAVES NO RESIDUE and rinses off easily
- TRANSPARENT GEL stays on the sulcus
- DOES NOT INTERFERE with bonding

ViscoStat™ Clear
25% aluminum chloride
ACHIEVE HEMOSTASIS . . . ESTHETICALLY
This viscous yet spreadable 25% aluminum chloride gel quickly stops minor bleeding and sulcular fluid without the mess of a liquid or paste.

Subgingival preparation and bleeding sulcus.
Press Ultrapak™ cord into gel in sulcus around tooth preparations. Leave 4–5 minutes.
Rub hemostatic firmly against bleeding tissues. Achieve the most rapid hemostasis with the Metal Dento-Infusor™ tip. The clear gel allows easy visibility and rinses away quickly.

• SPECIALLY DESIGNED for the esthetic zone
• TRANSPARENT GEL stays on the sulcus
• LEAVES NO RESIDUE and rinses off easily
• DOES NOT INTERFERE with bonding*

6407 - ViscoStat Clear Dento-Infusor IndiSpense Syringe Kit
