

Complete protection you can see

OpalDam™ Green

Light-Cured Resin Barrier

OpalDam Green resin barrier offers effective coverage of oral tissues, making in-office whitening easier than ever before.

OpalDam™ Green
Light-Cured Resin Barrier

OpalDam™ Green Resin Barrier

- Vibrant green color is easily seen for complete coverage
- Viscous solution is easy to apply on tissue, resulting in fast preparation times

OpalDam Green methacrylate-based resin barrier is used to isolate tissue during in-office tooth whitening procedures. The green color is easy to see against gingiva and teeth, resulting in a complete barrier. OpalDam Green resin barrier is easy to apply and remove and has been specifically designed to easily break from undercuts during removal.

Viscous solution is easy to apply.

Light-reflective properties focus heat away from teeth and gingiva for patient comfort.

Complete barrier is ideal for tooth whitening.

OpalDam Green resin cleanly breaks from undercuts.

1824-U - OpalDam Green Syringe Kit
 4 x 1.2 ml OpalDam Green syringes
 10 x Black Mini tips
 10 x Micro 20 ga tips

1825-U - OpalDam Green Syringe 4pk
1826-U - OpalDam Green Syringe 20pk
 1.2 ml syringes

OpalDam™ Resin Barrier

- Passive adhesive (sealing)
- Methacrylate-based resin

OpalDam resin barrier is used to isolate tissue adjacent to teeth being whitened. For single-tooth whitening, OpalDam resin barrier may be used to protect adjacent teeth.

Viscous solution is easy to apply.

OpalDam resin cleanly breaks from undercuts.
