

Opalescence[™] Endo whitening

- Designed to brighten non-vital, endodontically treated teeth
- 35% hydrogen peroxide in a high-viscosity gel
- Easy to place inside pulp chamber
- One to five days per application

Opalustre[™] slurry

- Uses chemical and mechanical microabrasion to permanently remove superficial enamel imperfections, mild fluorosis, or demineralization
- Can provide life-changing results in one treatment
- Low 6.6% hydrochloric acid concentration with silicon carbide microparticles
- Provides minimally invasive permanent solution

Opalescence[™] Whitening Toothpaste

- Formulated to strengthen enamel and prevent cavities
- Gentle enough for everyday use
- Active stain removal for whiter teeth
- Unique Cool Mint flavor for fresh breath that lasts
- Also available in a Sensitivity Relief formula to treat sensitive teeth

UltraEZ[™] desensitizing gel

- Helps treat sensitivity from tooth whitening
- Available in disposable prefilled trays and syringes for use with custom trays
- Contains 3% potassium nitrate and .25% neutral NaF
- Sustained-release formula

Opalescence Whitening Family

Opalescence whitening has been the global leader in whitening for nearly 30 years. We are proud to offer whitening products that both clinicians and patients love.

Opalescence whitening gel is designed to maximize patient comfort—it contains high water content to help prevent dehydration and shade relapse.

The Opalescence whitening family offers a variety of products to fit any patient's lifestyle and brighten their smile. Each product can be used alone or with another Opalescence whitening product for a personalized combination treatment.

Opalescence Whitening Family

Opalescence™ PF whitening

- Used with custom-made trays tailored to each patient's smile
- Available in 10%, 15%, 20%, 35%, and 45% concentrations of carbamide peroxide for day or night wear
- Available in Mint, Melon, and Regular flavors
- Sticky, viscous gel won't migrate to soft tissues and ensures tray stays securely in place

Before and after

Before whitening.

After 16 days of treatment with Opalescence™ PF 20% whitening gel.

Moderate to advanced tetracycline stains.

Improvement in 2 weeks. With tetracycline stains, treatment can require 2 to 6 months.¹

1. Caughman WF, DMD, Frazier KB, Haywood, VB. Carbamide peroxide whitening of non-vital single discolored teeth: Case reports. Quintessence Int. 1999;30(3):155-61

Opalescence Go™ whitening

- Ready to use right out of the package
- Prefilled UltraFit™ tray's superior adaption ensures a comfortable, custom fit
- Available in 10% and 15% concentrations of hydrogen peroxide for fast, effective whitening
- Available in Mint (10% and 15%) and Melon (10%) flavors

Opalescence™ Boost™ in-office whitening

- Chemically activated, so no light is needed
- Distinct red color aids in proper placement and ensures complete removal
- Average treatment is completed in two to three 20-minute applications (do not exceed three applications per visit)
- Powerful 40% hydrogen peroxide gel
