- 20 x 1.2 ml syringes

MORE THAN JUST GREAT TASTE!

Enamelast fluoride varnish has been proven to have both a high fluoride release and a high fluoride uptake.¹ And with a **patented adhesion-promoting agent** that enhances retention, you can be sure that your patients are receiving the full benefits of a fluoride varnish.

Enamelast fluoride varnish is a flavored, xylitol-sweetened 5% sodium fluoride in a resin carrier.

Everything You Need

EFFECTIVE FORMULA

Enamelast fluoride varnish has been proven to have both a high fluoride release and a high fluoride uptake when compared to similar products.¹ The high release rate indicates the amount of fluoride that's available in each treatment, and the high uptake reflects the efficient absorption of fluoride ions.

PATENTED ADHESION

Enamelast varnish features a patented adhesion-promoting agent that enhances retention, which means your patients can receive the full benefits of the varnish.

CONVENIENT DELIVERY

Choose between two delivery options: unit-dose blister packs or a syringe and tip delivery system with enough varnish for two to four patients.

INCREDIBLE VALUE

Enamelast varnish isn't just effective—it's also economical, giving you exceptional value for your time and money.

Everything Your Patient Wants

SMOOTH TEXTURE

The smooth feel of Enamelast varnish will make your patients want to leave it in place.

NEARLY INVISIBLE APPEARANCE

Enamelast varnish is nearly invisible on the tooth.

GREAT FLAVOR

Enamelast varnish comes in five great flavors—Walterberry, Orange Cream, Bubble Gum, Cool Mint, and Caramel. Every flavor is **NUT FREE** and **GLUTEN FREE**.
