## Enamelast® Fluoride Varnish Common Allergen Verification

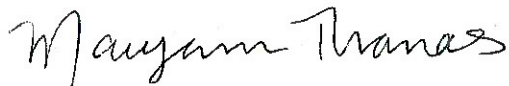

Product	Milk	Eggs	Peanuts	Tree Nuts	Fish	Shellfish	Soy	Wheat (Gluten)	Dye
Enamelast	No	No	No	No	No	No	No	No	No

\*Enamelast is made in a facility that does not produce any products containing milk, eggs, peanuts, tree nuts, fish, shellfish, soy, or gluten.

## Note:

All fluoride varnishes are made with rosins which are derived from trees and have shown no direct correlation to nut allergens or any other specific allergens. That being said, that does not eliminate the extremely rare chance that a patient may be allergic/show sensitivity to rosins. Again, this would be an extremely rare case and to our knowledge so far has not been experienced by patients receiving fluoride varnish.
