Enamelast™ Fluoride Varnish Common Allergen Verification

PRODUCT	Milk	Eggs	Peanuts	Tree Nuts	Fish	Shellfish	Soy	Wheat (Gluten)	Dye
Enamelast	No	No	No	No	No	No	No	No	No

Enamelast varnish is made in a facility that does not produce any products containing milk, eggs, peanuts, tree nuts, fish, shellfish, soy, or gluten.

Enamelast Flavor-Free varnish does not contain flavor allergens.

Note: All fluoride varnishes are made with rosins which are derived from trees and have shown no direct correlation to nut allergens or any other specific allergens. However, that does not eliminate the extremely rare chance that a patient may be allergic/show sensitivity to rosins. This would be an extremely rare case and to our knowledge has not been experienced by patients receiving a fluoride varnish treatment.

To see a full allergen list, please go to www.ultradent.com/resources/product-allergens.
